## Part 2 of 4 – Instream Lease Application Map Checklist

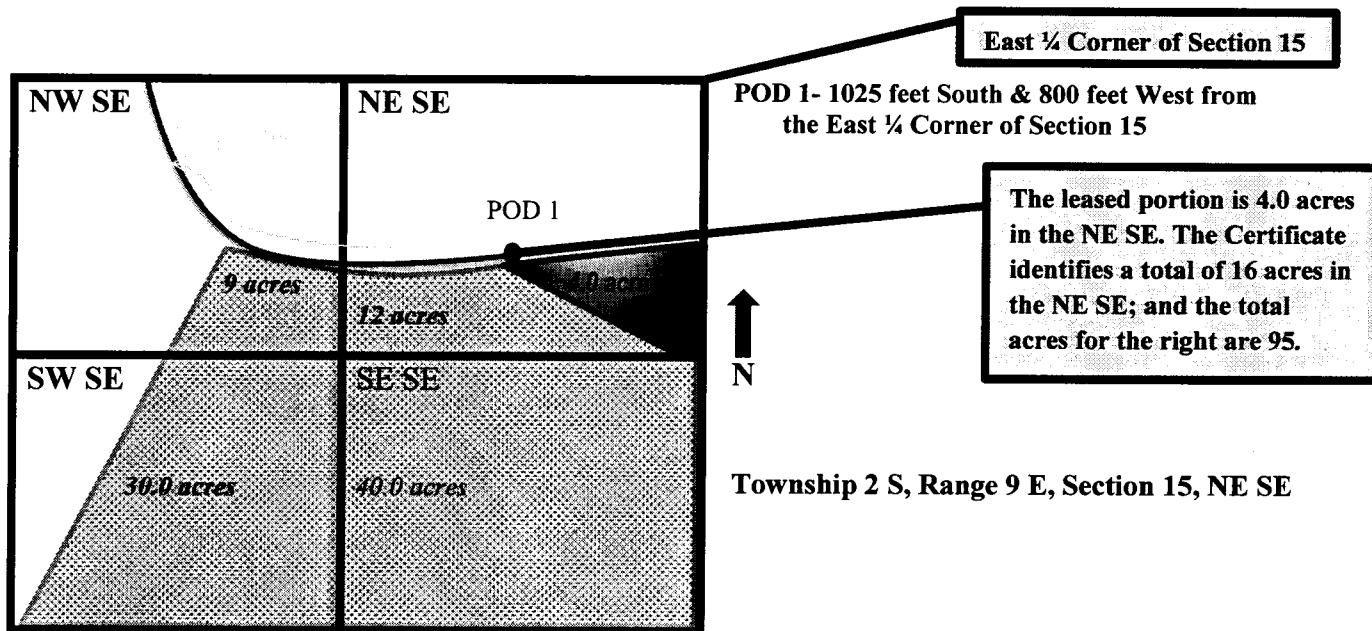

**A Map is generally required for each water right not leased in its entirety**

The application map (if required) should include all the items listed below and match the existing water right(s) of record. Check all boxes that apply.

This should be a simple map. (See example below). A copy of a final proof survey map with the portion to be leased shaded or hachured in will also suffice.

- N/A     A map is required for each water right not leased in its entirety. More than one QQ and property may be included on each map. A map is not required, if leasing the entire right or if the right to be leased is for municipal or quasi-municipal water use.
- The map should be of sufficient quality to be reproducible. Please do not use highlighters to mark items on the map as highlighters do not always copy.
- A North arrow and map scale (no smaller than 1" = 1320').
- Township, Range, Section, quarter quarter (QQ), and a clearly labeled survey corner.
- For irrigation or other similar use, the number of acres to be leased in each quarter-quarter clearly labeled and hachured to differentiate between the acres being leased and any remaining. If the place of use is broken down by more than one priority date, or source stream, and/or point of diversion you must identify each with separate hachuring and clearly label.
- If available, identify the existing point(s) of diversion.

**Part 4 of 4 – Lease Provisions and Party Signatures**

<p><b>Term of the Lease (may be from 1 year up to 5 years):</b>                  The lease is requested to begin in: <b>month <u>March 1</u> year <u>2015</u></b> and end: <b>month <u>October 31</u> year <u>2019</u></b>                  Note: The begin month is generally the first month of the irrigation season and the end month is the last month in the irrigation season. If not an irrigation right, this would be the first and last month of your authorized period of allowed use.</p>	
<p><b>Public use:</b> Check the public use(s) this lease will serve (as defined by ORS 537.332):  <input checked="" type="checkbox"/> Conservation, maintenance and enhancement of aquatic, fish and wildlife, fish and wildlife habitat and any other ecological values.  <input type="checkbox"/> Recreation  <input checked="" type="checkbox"/> Pollution abatement  <input type="checkbox"/> Navigation</p>	<p><b>Termination provision (for multiyear leases):</b>  <b>The parties to the lease request (choose one):</b>  <input checked="" type="checkbox"/> a. The option of terminating the lease prior to expiration of the full term with written notice to the Department by the Lessor(s) and/or Lessee.  <input type="checkbox"/> b. The option of terminating the lease prior to expiration of the full term, with consent by all parties to the lease.  <input type="checkbox"/> c. The parties would not like to include a Termination Provision.                  (See instructions for limitations to this provision)</p>
<p><b>Additive/Replacing Relationship to other instream water rights:</b> Instream leases are generally additive to other existing instream water rights created as a result of instream leases, transfers and/or allocations of conserved water. Since instream leases are also generally senior to other instream rights created through a state agency process or conversion of minimum flows, they generally replace a portion of these junior instream rights.                  If you would like this lease to relate to other instream water rights differently, please check this box. <input type="checkbox"/>                  And attach an explanation of your intent.</p>	
<p><b>Validity of the Right(s) to be leased (check the appropriate box):</b>  <input checked="" type="checkbox"/> The water right(s) to be leased have been used under the terms and conditions of the right(s) during the last five years or have been leased instream; or  <input type="checkbox"/> The water right(s) have not been used for the last five years according to the terms and conditions of the right(s). However, the water right(s) is not subject to forfeiture under ORS 540.610(2). Documentation describing why the water right(s) is not subject to forfeiture is provided.</p>	

**Precedent:** If a right which has been leased is later proposed to be leased again or later transferred or become part of an allocation of conserved water project, a new injury review shall be required. An instream lease shall not set a precedent on a future transaction.

**The undersigned declare:**

1. The Lessor(s) agree during the term of this lease, to suspend use of water allowed under the subject water right(s) and under any appurtenant primary or supplemental water right(s) not involved in the lease application; and
2. The Lessor(s) certify that I/we are the water right holder(s) of the right(s) described in this instream lease application. If not the deeded landowner, I/we have provided documentation with the lease application that I/we have authorization to pursue the lease application and/or have obtained consent from the deeded landowner; and
3. All parties affirm that information provided in this lease application is true and accurate.

## STATE OF OREGON

COUNTY OF

DOUGLAS

## CERTIFICATE OF WATER RIGHT

**This Is to Certify, That**                      HOWARD L. BROWNSON

of Myrtle Creek    , State of Oregon 97457 , has made proof to the satisfaction of the Water Resources Director, of a right to the use of the waters of South Myrtle Creek

a tributary of South Umpqua River    for the purpose of irrigation of 62.2 acres

under Permit No. 19302                      and that said right to the use of said waters has been perfected in accordance with the laws of Oregon; that the priority of the right hereby confirmed dates from March 14, 1950

that the amount of water to which such right is entitled and hereby confirmed, for the purposes aforesaid, is limited to an amount actually beneficially used for said purposes, and shall not exceed 0.75 cubic foot per second, if available at the original point of diversion, NE 1/4 NW 1/4, as projected within H. Weaver DLC 39, Section 21, T29S, R4W, WM: 1,400 feet North and 3,200 feet West from E 1/4 Corner, Section 21,

or its equivalent in case of rotation, measured at the point of diversion from the stream. The point of diversion is located in the NE 1/4 NW 1/4 and SW 1/4 NE 1/4, both as projected within H. Weaver DLC 39, Section 21, T29S, R4W, WM; Number 1 - 1,400 feet North and 3,200 feet West, and Number 3 - 1,300 feet North and 2,040 feet West, both from E 1/4 Corner, Section 21

The amount of water used for irrigation, together with the amount secured under any other right existing for the same lands, shall be limited to one-eightieth of one cubic foot per second per acre, or its equivalent for each acre irrigated and shall be further limited to a diversion of not to exceed 2 1/2 acre-feet per acre for each acre irrigated during the irrigation season of each year

and shall conform to such reasonable rotation system as may be ordered by the proper state officer.

A description of the place of use under the right hereby confirmed, and to which such right is appurtenant, is as follows:
