Part 2 of 5 – Transfer Application Map Checklist

Your transfer application will be returned if any of the map requirements listed below are not met.

Please be sure that the transfer application map you submit includes all the required items and matches the existing water right map. Check all boxes that apply.

- N/A Certified Water Right Examiner (CWRE) Stamp and Original Signature. For a list of CWREs, see http://apps.wrd.state.or.us/apps/wr/cwre_license_view/. CWRE stamp and signature are not required for substitutions.
- N/A If **more than three** water rights are involved, separate maps are needed for each water right.
- Permanent quality printed with dark ink on good quality paper.
- The size of the map can be 8½ x 11 inches, 8½ x 14 inches, 11 x 17 inches, or up to 30 x 30 inches. For 30 x 30 inch maps, one extra copy is required.
- A north arrow, a legend, and scale.
- The scale of the map must be: 1 inch = 400 feet, 1 inch = 1,320 feet, the scale of the Final Proof/Claim of Beneficial Use Map (the map used when the permit was certificated), the scale of the county assessor map if the scale is not smaller than 1 inch = 1,320 feet, or a scale that has been pre-approved by the Department.
- Township, Range, Section, ¼ ¼, DLC, Government Lot, and other recognized public land survey lines.
- Tax lot boundaries (property lines) are required. Tax lot numbers are recommended.
- Major physical features including rivers and creeks showing direction of flow, lakes and reservoirs, roads, and railroads.
- Major water delivery system features from the point(s) of diversion/appropriation such as main pipelines, canals, and ditches.
- Existing place of use that includes separate hachuring for each water right, priority date, and use including number of acres in each quarter-quarter section, government lot, or in each quarter-quarter section as projected within government lots, donation land claims, or other recognized public land survey subdivisions. If less than the entirety of the water right is being changed, a separate hachuring is needed for lands left unchanged.
- N/A Proposed place of use that includes separate hachuring for each water right, priority date, and use including number of acres in each quarter-quarter section, government lot, or in each quarter-quarter section as projected within government lots, donation land claims, or other recognized public land survey subdivisions.
- Existing point(s) of diversion or well(s) with distance and bearing or coordinates from a recognized survey corner. This information can be found in your water right certificate or permit.
- N/A If you are proposing a change in point(s) of diversion or well(s), show the proposed location and label it clearly with distance and bearing or coordinates. If GPS coordinates are used, latitude-longitude coordinates may be expressed as either degrees-minutes-seconds with at least one digit after the decimal (example – 42°32'15.5") or degrees decimal with five or more digits after the decimal (example – 42.53764°).

Explain in your own words what you propose to accomplish with this transfer application, and why:

Place of Use (POU) Transfer

The recording of Tract 1314 Pine Ridge Ranches divided lots into 5 acre plots. Some of these lots lie along the edge of the Williamson River. Under the original water right, Certificate 65750, the water right does not extend to the river's edge. The owner of Tract 1314 Lots 16 & 17 has constructed a homesite near the water's edge and would like to use the water right to irrigate the portion of the lot which lies outside of the original water right. They would like to transfer an equal portion of their water right within the parameters of their lots to a portion that is next to the river where their homesite lies so they can irrigate their lawn and pasture.

Point of Diversion (POD) Transfer

The owner of Lots 16 & 17, Tract 1314 Pine Ridge Ranches is requesting a proposed POD at the river's edge on Lot 16 so they can be more efficient in watering their properties. Currently they have to coordinate with a second party to operate a 30 HP pump, located at the authorized POD, and fill/pressurize the entire system of 9900± feet of 6" to 14" buried piping in order to supply irrigation water to their property. If the proposed POD at Lot 16 is granted, they will have the ability to irrigate their two lots without coordinating with a second party and wasting water by filling/pressurizing lengthy and large diameter water conveyance piping. The proposed POD currently has a 1 1/2 HP pump which will conserve energy. Without the need to fill/pressurize lengthy and large diameter water conveyance piping, only the amount of water needed to irrigate Lots 16 & 17 will be drawn from the Williamson River. The use of the proposed POD at their lot will save time, conserve energy and water, as well as eliminate second party requirements.

If you need additional space, continue on a separate piece of paper and attach to the application as "Attachment 1".

CERTIFICATE # 65750

Description of Water Delivery System

System capacity: 3.17 cubic feet per second (cfs)

Describe the current water delivery system or the system that was in place at some time within the last five years. Include information on the pumps, canals, pipelines and sprinklers used to divert, convey and apply the water at the authorized place of use.

The water conveyance system begins at the authorized POD “From” which has a 30 HP pump able to deliver approximately 1400 gpm from the Williamson River. From the pump, water is conveyed via a 14” buried pipe extending easterly 890± feet to a tee. At the tee a 12” buried pipe extends southerly 1480± feet to a valve. From the valve a 10” buried pipe extends southerly 1070± feet to the subject property (Lots 16 & 17, Tract 1314 Pine Ridge Ranches, Tax Lots 2100 & 2200). A 6” buried pipe then extends westerly 40± feet across a gravel road to a 3” above-ground connection point where the lot owner connects piping and sprinklers to irrigate their property.

For Place of Use or Character of Use Changes

Are there other water right certificates, water use permits or ground water registrations associated with the “from” or the “to” lands? Yes No

If YES, list the certificate, water use permit, or ground water registration numbers: _____.

Pursuant to ORS 540.510, any “layered” water use such as an irrigation right that is supplemental to a primary right proposed for transfer must be included in the transfer or be cancelled. Any change to a ground water registration must be filed separately in a ground water registration modification application.

For Substitution (ground water supplemental irrigation will be substituted for surface water primary irrigation)

Ground water supplemental Permit or Certificate # N/A

Surface water primary Certificate # N/A

For a change from Supplemental Irrigation Use to Primary Irrigation Use

Identify the primary certificate to be cancelled. Certificate # N/A

For a change in point(s) of appropriation (well(s)) or additional point(s) of appropriation: N/A
