*Example for Line 5a calculation to transfer 45.0 acres of Primary Certificate 12345 (total 1.25 cfs for 100 acres) and 45.0 acres of Supplemental Certificate 87654 (1/80 cfs per acre) on the same land:

1. For irrigation calculate cfs for each water right involved as follows:

a. Divide total authorized cfs by total acres in the water right (for C12345, 1.25 cfs ÷100 dc) ithen making the lander of acres to be transferred to get the transfer cfs (x 45 ac = 0.56 cfs).

b. If the water right certificate does not list total cfs, but identifies the allowable use as 1/40 or 1/80/012 2/52/04-facre; multiply number of acres proposed for change by either 0.025 (1/40) or 0.0125 (1/80). (For C87654, 45.0 ac x 0.0125 $cfs/ac = 0.56 \ cfs$)

Add cfs for the portions of water rights on all the land included in the transfer; however do not counters for the portions of water rights on all the land included in the transfer; however do not counters for the portions of water rights on all the land included in the transfer; however do not counters for the portions of water rights on all the land included in the transfer; however do not counters for the portions of water rights on all the land included in the transfer; however do not counters for the portions of water rights on all the land included in the transfer; however do not counters for the portions of water rights on all the land included in the transfer; however do not counters for the portions of water rights on all the land included in the transfer; however do not counters for the portions of water rights on all the land included in the transfer; however do not counters for the portions of water rights on all the land included in the transfer; however do not counters for the portions of water rights on all the land included in the transfer; however do not counters for the portions of water rights on all the land included in the transfer. rights on acreage for which you have already calculated the cfs fee for the primary right on the same land. The fee should be assessed only once for each "on the ground" acre included in the transfer. (In this example, blank 5a would be only 0.56 cfs, since both rights serve the same 45.0 acres. Blank 5b would be 0 and Line 5 would then also become 0).

CERTIFICATE # 89450

Description of Water Delivery System

System capacity: <u>0.4</u> cubic feet per second (cfs) **OR**_____ gallons per minute (gpm)

Describe the current water delivery system or the system that was in place at some time within the last five years. Include information on the pumps, canals, pipelines and sprinklers used to divert, convey and apply the water at the authorized place of use. Water is withdrawn from Rock Creek using a 25 Hp pump. Water is conveyed from Rock Creek through 370 feet of 4-inch-diameter above-ground aluminum mainline to the reservoir. From the reservoir pumping station, water is withdrawn using a 25 Hp pump and conveyed through 3,300 feet of buried 5-inch diameter PVC to the authorized place of use.

For Place of Use or Character of Use Changes
Are there other water right certificates, water use permits or ground water registrations associated with the "from" or the "to" lands? Yes No
If YES, list the certificate, water use permit, or ground water registration numbers: NA.
Pursuant to ORS 540.510, any "layered" water use such as an irrigation right that is supplemental to a primary right proposed for transfer must be included in the transfer or be cancelled. Any change to a ground water registration must be filed separately in a ground water registration modification application.
For Substitution (ground water supplemental irrigation will be substituted for surface water primary irrigation)
Ground water supplemental Permit or Certificate # <u>NA</u> ; Surface water primary Certificate # <u>NA</u> .
For a change from Supplemental Irrigation Use to Primary Irrigation Use
Identify the primary certificate to be cancelled. Certificate # NA
For a change in point(s) of appropriation (well(s)) or additional point(s) of appropriation:
Well log(s) are attached for each authorized and proposed well(s) that are clearly labeled and associated with the corresponding well(s) in Table 1 above and on the accompanying application map. Tip: You may search for well logs on the Department's web page at: http://apps.wrd.state.or.us/apps/gw/well_log/Default.aspx
AND/OR
Describe the construction of the authorized and proposed well(s) in Table 3 for any wells that do not have a well log. For <i>proposed wells not yet constructed or built</i> , provide "a best estimate" for each requested information element in the table. The Department recommends you consult a licensed well driller, geologist, or certified water right examiner to assist with assembling the information necessary to complete Table 3.

Any well(s) in this listing must be clearly tied to corresponding well(s) described in Table 1 and shown on the accompanying application map. Failure to provide the information will delay the processing of your transfer application until it is received. The information is necessary for the department to assess whether the proposed well(s) will access the same source aquifer as the authorized point(s) of appropriation (POA). The Department is prohibited by law from approving POA changes that do not access the same source aquifer.
