Explain in your own words what you propose to accomplish with this transfer application, and why: The transfer is intended to address planned changes to the places of use and the planting of an orchard on the eastern side of the property. A total of 2.2 acres also will be voluntarily canceled if this transfer is approved. The Point of Diversion (POD) relocation on the To Map is not a transfer, but is allowed under ORS 540.510(5) which authorizes the relocation of a POD as necessary to follow the movements of a naturally changing stream channel. The relocated POD is within 500 feet of the POD on record and the change does not move the POD upstream or downstream beyond the diversion of another appropriator. No fee should be attached to the POD relocation as the statute states that this type of change is not a transfer. A permit amendment application for Permit S-54707 (Application S-87531) is being concurrently filed with this transfer application. The permit amendment is contingent on approval of the transfer and vice versa.

#### Description of Water Delivery System

System capacity: 0.308 cubic feet per second (cfs) OR

\_\_\_\_\_ gallons per minute (gpm)

Describe the current water delivery system or the system that was in place at some time within the last five years. Include information on the pumps, canals, pipelines and sprinklers used to divert, convey and apply the water at the authorized place of use. **There are two similar systems for use in the two sources. Each system consists of a 7.5 horsepower motor connected to a Berkeley pump with a 1½ inch inlet by 1 inch outlet. Each pump forwards water to a Kifko traveler with a 9/16-inch nozzle. One traveler has 700 feet of 3-inch-diameter hose and 300 feet of 2-inch-diameter hose. The second traveler has 1,100 feet of 3-inch-diameter hose and 200 feet of 2½-inch-diameter hose.**

**For Place of Use or Character of Use Changes**

Are there other water right certificates, water use permits or ground water registrations associated with the "from" or the "to" lands?  Yes  No

If YES, list the certificate, water use permit, or ground water registration numbers: Permit S-54707 (App S-87531).

 Pursuant to ORS 540.510, any "layered" water use such as an irrigation right that is supplemental to a primary right proposed for transfer must be included in the transfer or be cancelled. Any change to a ground water registration must be filed separately in a ground water registration modification application.

**For Substitution** (ground water supplemental irrigation will be substituted for surface water primary irrigation)

Ground water supplemental Permit or Certificate # NA;  
Surface water primary Certificate # NA.

**For a change from Supplemental Irrigation Use to Primary Irrigation Use**

Identify the primary certificate to be cancelled. Certificate # NA

**For a change in point(s) of appropriation (well(s)) or additional point(s) of appropriation:**

Well log(s) are attached for each authorized and proposed well(s) that are clearly labeled and associated with the corresponding well(s) in Table 1 above and on the accompanying application map.

**Tip:** You may search for well logs on the Department's web page at:

[http://apps.wrd.state.or.us/apps/gw/well\\_log/Default.aspx](http://apps.wrd.state.or.us/apps/gw/well_log/Default.aspx)

**AND/OR**

Describe the construction of the authorized and proposed well(s) in Table 3 for any wells that do not have a well log. For *proposed wells not yet constructed or built*, provide "a best estimate" for each requested information element in the table. The Department recommends you consult a licensed well driller, geologist, or certified water right examiner to assist with assembling the information necessary to complete Table 3.

**Table 3. Construction of Point(s) of Appropriation**

Any well(s) in this listing must be clearly tied to corresponding well(s) described in Table 1 and shown on the accompanying application map. Failure to provide the information will delay the processing of your transfer application until it is received. The information is necessary for the department to assess whether the proposed well(s) will access the same source aquifer as the authorized point(s) of appropriation (POA). The Department is prohibited by law from approving POA changes that do not access the same source aquifer.
