Your temporary transfer application <u>will be returned</u> if any of the map requirements listed below are not met.

Please be sure that the temporary transfer application map you submit includes all the required items and matches the existing water right map. Check all boxes that apply.

	N/A	If more than three water rights are involved, separate maps are needed for each water right.
\boxtimes		Permanent quality printed with dark ink on good quality paper.
\boxtimes		The size of the map can be $8\frac{1}{2} \times 11$ inches, $8\frac{1}{2} \times 14$ inches, 11×17 inches, or up to 30×30 – inches. For 30 x 30 inch maps, one extra copy is required.
\boxtimes		A north arrow, a legend, and scale.
		The scale of the map must be: 1 inch = 400 feet, 1 inch = 1,320 feet, the scale of the Final \neg Proof/Claim of Beneficial Use Map (the map used when the permit was certificated), the scale of the county assessor map if the scale is not smaller than 1 inch = 1,320 feet, or a scale that has been pre-approved by the Department.
\boxtimes		Township, Range, Section, ¹ / ₄ ¹ / ₄ , DLC, Government Lot, and other recognized public land - survey lines.
\boxtimes		Tax lot boundaries (property lines) are required. Tax lot numbers are recommended.
\boxtimes		Major physical features including rivers and creeks showing direction of flow, lakes and - reservoirs, roads, and railroads.
\boxtimes		Major water delivery system features from the point(s) of diversion/appropriation such as – main pipelines, canals, and ditches.
		Existing place of use that includes separate hachuring for each water right, priority date, and – use including number of acres in each quarter-quarter section, government lot, or in each quarter-quarter section as projected within government lots, donation land claims, or other recognized public land survey subdivisions. If less than the entirety of the water right is being changed, a separate hachuring is needed for lands left unchanged.
	N/A	Proposed temporary place of use that includes separate hachuring for each water right, – priority date, and use including number of acres in each quarter-quarter section, government lot, or in each quarter-quarter section as projected within government lots, donation land claims, or other recognized public land survey subdivisions.
\boxtimes		Existing point(s) of diversion or well(s) with distance and bearing or coordinates from a \neg recognized survey corner. This information can be found in your water right certificate or permit.
	□ N/A	If you are proposing a change in point(s) of diversion or well(s) to convey water to the new – temporary place of use, show the proposed location and label it clearly with distance and bearing or coordinates. If GPS coordinates are used, latitude-longitude coordinates may be expressed as either degrees-minutes-seconds with at least one digit after the decimal (example – 42°32'15.5") or degrees-decimal with five or more digits after the decimal (example – 42.53764°).

7 If no box is applicable, enter 0 on line 7» » » » » » » » » » » » » » » » »	7	0
8 Subtract line 7 from line 6 » » » » » » » » » » » » » » » Transfer Fee:	8	1,656.00

	FEE WORKSHEET for TEMPORARY DROUGHT TRANSFERS										
1	Base Fee (includes drought application and recording fee for up to 1 cfs)	1	\$200.00								
	Enter the cfs for the portions of the rights to be transferred (see example below*):										
	<u>(2a)</u>										
	Subtract 1.0 from the number in 2a above:(2b)										
	If 2b is 0, enter 0 on line 2 » » » » » » » » » » » » » » » » » »										
	If 2b is greater than 0, round up to the nearest whole number: <u>(2c)</u> and										
2	multiply 2c by \$50, then enter on line 2 » » » » » » » » » »	2									
3	Add entries on lines 1 through 2 above » » » » » » » » » Transfer Fee:	3									

*Example for Line 2a calculation to transfer 45.0 acres of Primary Certificate 12345 (total 1.25 cfs for 100 acres) and 45.0 acres of Supplemental Certificate 87654 (1/80 cfs per acre) on the same land:

1. Divide total authorized cfs by total acres in the water right (for C12345, 1.25 cfs \div 100 ac); then multiply by the number of acres to be transferred to get the transfer cfs (x 45 ac = 0.56 cfs).

2. If the water right certificate does not list total cfs, but identifies the allowable use as 1/40 or 1/80 of a cfs per acre; multiply number of acres proposed for change by either 0.025 (1/40) or 0.0125 (1/80). (For C87654, 45.0 ac x 0.0125 cfs/ac = 0.56 cfs)

3. Add cfs for the portions of water rights on all the land included in the transfer; however **do not count cfs for supplemental** rights on acreage for which you have already calculated the cfs fee for the primary right on the same land. The fee should be assessed only once for each "on the ground" acre included in the transfer. (In this example, blank 2a would be only 0.56 cfs, since both rights serve the same 45.0 acres. Blank 2b would be 0 and Line 2 would then also become 0).

Explain in your own words what you propose to accomplish with this transfer application; and why:

If you need additional space, continue on a separate piece of paper and attach to the application as "Attachment 1".

Check this box if this project is fully or partially funded by the American Recovery and Reinvestment Act. (Federal stimulus dollars)

I (we) affirm that the information contained in this application is true and accurate.

Is the applicant the sole owner of the land on which the water right, or portion thereof, proposed for transfer is located? \boxtimes Yes \square No

If NO, include signatures of all landowners (and mailing and/or e-mail addresses if different than the applicant's) or attach affidavits of consent (and mailing and/or e-mail addresses) from all landowners or individuals/entities to which the water right(s) has been conveyed.

Additional remarks: The authorized POA for Cert. 61114 is a 20 ft. deep by 9 ft. diameter pit well. The proposed POA for this Cert. is a 30 ft. deep well by a 5 ft. diameter pit well. The 1900 Courtney water will be delivered by the Westland Irrigation District, (WID), Westland Canal from the Umatilla River to a 40 hp ditch pump. If and when supplemental water is needed, a 20 hp pump will deliver supplemental Well #1 water to the 40 hp ditch pump. Both well and ditch pumps are equipped with flow meters. Currently water level in 5 ft. diameter Well #1 is 10 ft. below land surface. During the irrigation season, the water table normally drops to 12 to 15 ft. below land surface. The elevation of this well is 600 ft. above sea level. Currently the water level in the 9 ft. diameter authorized well is 3 ft. below the land surface. During the irrigation season the water level will drop to 9 to 10 ft. below land surface. The elevation of this well is 590 ft. above sea level. The authorized land is not in the WID but is served by the WID under a 1917 delivery contract. The proposed land is not in the district and is served under a separate water right (Cert. 54758) described later in this application.

RECEIVED BY OWRD

Revised 7/1/2013	Temporary Transfer Application - Page 7 of 15	Ĩ	12022	TACS	MAR 30 2015

SALEM, OR

For Place of Use Changes

Are there other water right certificates, water use permits or ground water registrations associated with the "from" or the "to" lands? \boxtimes Yes \square No

If YES, list the certificate, water use permit, or ground water registration numbers: <u>Certificate #</u> 61114 and Certificate # 54758.

Pursuant to ORS 540.525, any "layered" water use such as an irrigation right that is supplemental to a primary right proposed for temporary transfer can be included in the transfer or remain unused on the authorized place of use. If the primary water right does not revert soon enough to allow use of the supplemental right within five years, the supplemental right shall become subject to cancellation for nonuse under ORS 540-610.

For a change in point(s) of appropriation (well(s)) or additional point(s) of appropriation if necessary to convey the water to the new temporary place of use:

Well log(s) are attached for each authorized and proposed well(s) that are clearly labeled and associated with the corresponding well(s) in Table 1 above and on the accompanying application map. (**Tip**: You may search for well logs on the Department's web page at: http://apps.wrd.state.or.us/apps/gw/well_log/Default.aspx)

AND/OR

Describe the construction of the authorized and proposed well(s) in Table 3 for any wells that do not have a well log. For *proposed wells not yet constructed or built*, provide "a best estimate" for each requested information element in the table. The Department recommends you consult a licensed well driller, geologist, or certified water right examiner to assist with assembling the information necessary to complete Table 3.

Table 3. Construction of Point(s) of Appropriation

Any well(s) in this listing must be clearly tied to corresponding well(s) described in Table 1 and shown on the accompanying application map. Failure to provide the information will delay the processing of your transfer application until it is received. The information is necessary for the department to assess whether the proposed well(s) will access the same source aquifer as the authorized point(s) of appropriation (POA). The Department is prohibited by law from approving POA changes that do not access the same source aquifer.

Propose d or Authori zed POA Name or Number	Is well already built? The authorized land is not in the WID but is served by the WID under a 1917 delivery contract. The proposed land is not in the district and is served under a separate water right (Cert. 54758) described later in this application.

T 12022

NATIONAL CONTRACT AND MODERN

For Place of Use Changes

Are there other water right certificates, water use permits or ground water registrations associated with the "from" or the "to" lands? \boxtimes Yes \square No

If YES, list the certificate, water use permit, or ground water registration numbers: <u>Umatilla River</u> <u>Supplemental Findings Page 429, (McFaul), and Certificate # 54758.</u>

Pursuant to ORS 540.525, any "layered" water use such as an irrigation right that is supplemental to a primary right proposed for temporary transfer can be included in the transfer or remain unused on the authorized place of use. If the primary water right does not revert soon enough to allow use of the supplemental right within five years, the supplemental right shall become subject to cancellation for nonuse under ORS 540-610.

For a change in point(s) of appropriation (well(s)) or additional point(s) of appropriation if necessary to convey the water to the new temporary place of use:

Well log(s) are attached for each authorized and proposed well(s) that are clearly labeled and associated with the corresponding well(s) in Table 1 above and on the accompanying application map. (**Tip**: You may search for well logs on the Department's web page at: http://apps.wrd.state.or.us/apps/gw/well_log/Default.aspx)

AND/OR

Describe the construction of the authorized and proposed well(s) in Table 3 for any wells that do not have a well log. For *proposed wells not yet constructed or built*, provide "a best estimate" for each requested information element in the table. The Department recommends you consult a licensed well driller, geologist, or certified water right examiner to assist with assembling the information necessary to complete Table 3.

Table 3. Construction of Point(s) of Appropriation

Any well(s) in this listing must be clearly tied to corresponding well(s) described in Table 1 and shown on the accompanying application map. Failure to provide the information will delay the processing of your transfer application until it is received. The information is necessary for the department to assess whether the proposed well(s) will access the same source aquifer as the authorized point(s) of appropriation (POA). The Department is prohibited by law from approving POA changes that do not access the same source aquifer.

Propose d or Authori zed POA Name or Number	Is well already built? Additional remarks: The authorized POA for Cert. 61114 is a 20 ft. deep by 9 ft. diameter pit well. The proposed POA for this Cert. is a 30 ft. deep well by a 5 ft. diameter pit well. The 1900 Courtney water will be delivered by the Westland Irrigation District, (WID), Westland Canal from the Umatilla River to a 40 hp ditch pump. If and when supplemental water is needed, a 20 hp pump will deliver supplemental Well # 1 water to the 40 hp ditch pump. Both well and ditch pumps are equipped with flow meters. Currently water level in 5 ft. diameter Well # 1 is 10 ft. below land surface. During the irrigation season, the water level in the 9 ft. diameter authorized well is 3 ft. below the land surface. During the irrigation season the water level will drop to 9 to 10 ft. below land surface. The elevation of this well is 590 ft. above sea level. The authorized land is not in the WID but is served by the WID under a 1917 delivery contract through the Courtney Irrigation Company system.

For Place of Use Changes

Are there other water right certificates, water use permits or ground water registrations associated with the "from" or the "to" lands? \boxtimes Yes \square No

If YES, list the certificate, water use permit, or ground water registration numbers: <u>Umatilla</u> <u>River Supplemental Findings Page 429, (McFaul), and Certificate # 61114.</u>

Pursuant to ORS 540.525, any "layered" water use such as an irrigation right that is supplemental to a primary right proposed for temporary transfer can be included in the transfer or remain unused on the authorized place of use. If the primary water right does not revert soon enough to allow use of the supplemental right within five years, the supplemental right shall become subject to cancellation for nonuse under ORS 540-610.

For a change in point(s) of appropriation (well(s)) or additional point(s) of appropriation if necessary to convey the water to the new temporary place of use:

Well log(s) are attached for each authorized and proposed well(s) that are clearly labeled and associated with the corresponding well(s) in Table 1 above and on the accompanying application map. (Tip: You may search for well logs on the Department's web page at: http://apps.wrd.state.or.us/apps/gw/well_log/Default.aspx)

AND/OR

Describe the construction of the authorized and proposed well(s) in Table 3 for any wells that do not have a well log. For *proposed wells not yet constructed or built*, provide "a best estimate" for each requested information element in the table. The Department recommends you consult a licensed well driller, geologist, or certified water right examiner to assist with assembling the information necessary to complete Table 3.

Table 3. Construction of Point(s) of Appropriation

Any well(s) in this listing must be clearly tied to corresponding well(s) described in Table 1 and shown on the accompanying application map. Failure to provide the information will delay the processing of your transfer application until it is received. The information is necessary for the department to assess whether the proposed well(s) will access the same source aquifer as the authorized point(s) of appropriation (POA). The Department is prohibited by law from approving POA changes that do not access the same source aquifer.
