SUBJECT: Water Right Transfer Application T-11980

Please find enclosed the Preliminary Determination indicating that, based on the information available, the Department intends to approve application T-11980. This document is an intermediate step in the approval process; water may not be used legally as proposed in the transfer application until a Final Order has been issued by the Department. Please read this entire letter carefully to determine your responsibility for additional action.

A public notice is being published in the Department's weekly publication, simultaneously with issuance of the Preliminary Determination. The notice initiates a period in which any person may file either a protest opposing the decision proposed by the Department in the Preliminary Determination or a standing statement supporting the Department's decision. The protest period will end 30 days after the Department's notice.

If no protest is filed, the Department will issue a Final Order consistent with the Preliminary Determination. You should receive a copy of the Final Order about 30 days after the close of the protest period.

If a protest is filed, the application may be referred to a contested case proceeding. A contested case provides an opportunity for the proponents and opponents of the decision proposed in the Preliminary Determination to present information and arguments supporting their position in a quasi-judicial proceeding.

Please do not hesitate to contact me at 503-986-0890 or [Sarah.A.Henderson@wrdd.state.or.us](mailto:Sarah.A.Henderson@wrdd.state.or.us) if I may be of assistance.

Sincerely,

### ***Transfer Review Criteria [OAR 690-380-4010(2)]***

8. Water has been used within the last five years according to the terms and conditions of the right. There is no information in the record that would demonstrate that the right is subject to forfeiture under ORS 540.610.
9. A pump, pipeline, and sprinkler system sufficient to use the full amount of water allowed under the existing right were present within the five-year period prior to submittal of Transfer Application T-11980.
10. The proposed change would not result in enlargement of the right.
11. The proposed change would not result in injury to other water rights.

### **Determination and Proposed Action**

The change in point of diversion proposed in Transfer Application T-11980 appears to be consistent with the requirements of ORS 540.505 to 540.580 and OAR 690-380-5000. If protests are not filed pursuant to OAR 690-380-4030, the transfer application will be approved.

*If Transfer Application T-11980 is approved, the final order will include the following:*

1. *The change in point of diversion proposed in Transfer Application T-11980 is approved.*
2. *The right to the use of the water is restricted to beneficial use at the place of use described, and is subject to all other conditions and limitations contained in Certificate 89407 and any related decree.*
3. *Water right Certificate 89407 is cancelled.*
4. *The quantity of water diverted at the new point of diversion, shall not exceed the quantity of water lawfully available at the original point of diversion.*
5. *Prior to diverting water, the water user shall install an approved fish screen at the new point of diversion and shall provide to the OWRD a written statement from Oregon Department of Fish and Wildlife (ODFW) that the installed screen meets the state's criteria, or that ODFW has determined a screen is not necessary.*  
*The water user shall operate and maintain the fish screen at the new point of diversion consistent with ODFW's operational and maintenance standards. If ODFW determines the screen is not functioning properly, and is unsuccessful in working with the water user to meet ODFW standards, ODFW may request that OWRD regulate the use of water until OWRD receives notification from ODFW that the fish screen is functioning properly.*
6. *Full beneficial use of the water shall be made, consistent with the terms of this order, on or before **October 1, 2016**. A Claim of Beneficial Use prepared by a Certified Water Right Examiner shall be submitted by the applicant to the Department within one year after the deadline for completion of the change and full beneficial use of the water.*

7. *After satisfactory proof of beneficial use is received, a new certificate confirming the right transferred will be issued.*

Dated at Salem, Oregon this 14 day of May, 2015.
