### Description of Water Delivery System

System capacity: 0.11 cubic feet per second (cfs) OR  
 \_\_\_\_\_ gallons per minute (gpm)

Describe the current water delivery system or the system that was in place at some time within the last five years. Include information on the pumps, canals, pipelines and sprinklers used to divert, convey and apply the water at the authorized place of use. **Water is pumped from the Owyhee River from the current POD (number 2) and delivered to the fields by a series of irrigation ditches as shown on the drought transfer application map.**

Additional remarks: Certificate 75676 states that there are 0.7 acres in the SE NE of Section 7. This location appears to be a typo as this location is across the river from the rest of the farm. A map provided by the OWRD showed 0.7 acres in the NE SW of section 7, this is how the CWRE has drawn it on the transfer map. The APOD will be used over the entire right.
