Please be sure that the temporary transfer application map you submit includes all the required items and matches the existing water right map. Check all boxes that apply.

	N/A	If more than three water rights are involved, separate maps are needed for each water right.
\boxtimes		Permanent quality printed with dark ink on good quality paper.
\square		The size of the map can be $8\frac{1}{2} \times 11$ inches, $8\frac{1}{2} \times 14$ inches, 11×17 inches, or up to 30 x 30 inches. For 30 x 30 inch maps, one extra copy is required.
\square		A north arrow, a legend, and scale.
		The scale of the map must be: 1 inch = 400 feet, 1 inch = $1,320$ feet, the scale of the Final Proof/Claim of Beneficial Use Map (the map used when the permit was certificated), the scale of the county assessor map if the scale is not smaller than 1 inch = $1,320$ feet, or a scale that has been pre-approved by the Department.
\boxtimes		Township, Range, Section, ¹ / ₄ ¹ / ₄ , DLC, Government Lot, and other recognized public land survey lines.
\square		Tax lot boundaries (property lines) are required. Tax lot numbers are recommended.
\square		Major physical features including rivers and creeks showing direction of flow, lakes and reservoirs, roads, and railroads.
\boxtimes		Major water delivery system features from the point(s) of diversion/appropriation such as main pipelines, canals, and ditches.
		Existing place of use that includes separate hachuring for each water right, priority date, and use including number of acres in each quarter-quarter section, government lot, or in each quarter-quarter section as projected within government lots, donation land claims, or other recognized public land survey subdivisions. If less than the entirety of the water right is being changed, a separate hachuring is needed for lands left unchanged.
	N/A	Proposed temporary place of use that includes separate hachuring for each water right, priority date, and use including number of acres in each quarter-quarter section, government lot, or in each quarter-quarter section as projected within government lots, donation land claims, or other recognized public land survey subdivisions.

*Example for Line 2a calculation to transfer 45.0 acres of Primary Certificate 12345 (total 1.25 cfs for 100 acres) and 45.0 acres of Supplemental Certificate 87654 (1/80 cfs per acre) on the same land:

1. Divide total authorized cfs by total acres in the water right (for C12345, 1.25 cfs \div 100 ac); then multiply by the number of acres to be transferred to get the transfer cfs (x 45 ac= 0.56 cfs).

2. If the water right certificate does not list total cfs, but identifies the allowable use as 1/40 or 1/80 of a cfs per acre; multiply number of acres proposed for change by either 0.025 (1/40) or 0.0125 (1/80). (For C87654, 45.0 ac x 0.0125 cfs/ac = 0.56 cfs) 3. Add cfs for the portions of water rights on all the land included in the transfer; however **do not count cfs for supplemental rights on acreage for which you have already calculated the cfs fee for the primary right on the same land**. The fee should be assessed only once for each "on the ground" acre included in the transfer. (In this example, blank 2a would be only 0.56 cfs, since both rights serve the same 45.0 acres. Blank 2b would be 0 and Line 2 would then also become 0).

Description of Water Delivery System

System capacity: cubic feet per second (cfs) **OR**

Developed POD: 144 (gpm)

Proposed POD: 2,500*(see Additional Remarks) (gpm)

Describe the current water delivery system or the system that was in place at some time within the last five years. Include information on the pumps, canals, pipelines and sprinklers used to divert, convey and apply the water at the authorized place of use. Water was diverted from the authorized point of diversion using a 40-Hp pump and conveyed through 6-inch mainlines and 3-inch laterals. Water is applied to the developed place of use using a combination of nozzles that are 9/64 and 3/16.

Additional remarks:

- 1. <u>The POD is also the authorized POD for multiple water rights. The applicant proposes</u> to use no more than the authorized rate under Certificate 16677 at any one time, being <u>0.32 CFS.</u>
- 2. <u>The applicant understands the proposed hatchered area on the map (119.8 acres) is</u> greater than the proposed place of use (25.6). The proposed place of use describes the number of wetted acres of irrigation within the hatchered areas on the map.
- 3. <u>In order to ensure water is only applied to the proposed 25.6 acres of wetted irrigation</u> <u>the applicant proposes to irrigate using drip irrigation only. The irrigation schedule</u> <u>and plan follows:</u>
 - a. Use of water at any one time will not exceed the authorized rate under the developed Certificate, being 0.32 CFS;
 - b. Water is applied to hazelnut trees using drip emitters only;
 - c. Each emitter delivers 0.26 gph or 0.0043 gpm or;
 - d. Water will be applied to the proposed place of use a maximum of one time per day and a minimum of once every 4 days; and
 - e. Water will be applied to the proposed place of use for a maximum of 4 hours and a minimum of 45 minutes.

For Place of Use Changes

Are there other water right certificates, water use permits or ground water registrations associated with the "from" or the "to" lands? \boxtimes Yes \square No

If YES, list the certificate, water use permit, or ground water registration numbers: <u>Certificate</u> 89459

Pursuant to ORS 540.525, any "layered" water use such as an irrigation right that is supplemental to a primary right proposed for temporary transfer can be included in the transfer or remain unused on the authorized place of use. If the primary water right does not revert soon enough to allow use of the supplemental right within five years, the supplemental right shall become subject to cancellation for nonuse under ORS 540-610.

For a change in point(s) of appropriation (well(s)) or additional point(s) of appropriation if necessary to convey the water to the new temporary place of use:

Well log(s) are attached for each authorized and proposed well(s) that are clearly labeled and associated with the corresponding well(s) in Table 1 above and on the accompanying application map. (**Tip**: You may search for well logs on the Department's web page at: <u>http://apps.wrd.state.or.us/apps/gw/well_log/Default.aspx</u>)

AND/OR

Describe the construction of the authorized and proposed well(s) in Table 3 for any wells that do not have a well log. For *proposed wells not yet constructed or built*, provide "a best estimate" for each requested information element in the table. The Department recommends you consult a licensed well driller, geologist, or certified water right examiner to assist with assembling the information necessary to complete Table 3.

Table 3. Construction of Point(s) of Appropriation

Any well(s) in this listing must be clearly tied to corresponding well(s) described in Table 1 and shown on the accompanying application map. Failure to provide the information will delay the processing of your transfer application until it is received. The information is necessary for the department to assess whether the proposed well(s) will access the same source aquifer as the authorized point(s) of appropriation (POA). The Department is prohibited by law from approving POA changes that do not access the same source aquifer.
