*Example for Line 5a calculation to transfer 45.0 acres of Primary Certificate 12345 (total 1.25 cfs for 100 acres) and 45.0 acres of Supplemental Certificate 87654 (1/80 cfs per acre) on the same land:

- 1. For irrigation calculate cfs for each water right involved as follows:
 - a. Divide total authorized cfs by total acres in the water right (for C12345, 1.25 cfs \div 100 ac); then multiply by the number of acres to be transferred to get the transfer cfs (x 45 ac= 0.56 cfs).
 - b. If the water right certificate does not list total cfs, but identifies the allowable use as 1/40 or 1/80 of a cfs per acre; multiply number of acres proposed for change by either 0.025 (1/40) or 0.0125 (1/80). (For C87654, 45.0 ac x 0.0125 cfs/ac = 0.56 cfs)
- 2. Add cfs for the portions of water rights on all the land included in the transfer; however do not count cfs for supplemental rights on acreage for which you have already calculated the cfs fee for the primary right on the same land. The fee should be assessed only once for each "on the ground" acre included in the transfer. (In this example, blank 5a would be only 0.56 cfs, since both rights serve the same 45.0 acres. Blank 5b would be 0 and Line 5 would then also become 0).

Description of Water Delivery System

FEB 0 5 2016

System capacity: ____ cubic feet per second (cfs) **OR**

350 gallons per minute (gpm)

WATER RESOURCES DEPT SALEM, OREGON

Describe the current water delivery system or the system that was in place at some time within the last five years. Include information on the pumps, canals, pipelines and sprinklers used to divert, convey and apply the water at the authorized place of use.

Well and Pump System: The irrigation pump is a Goulds submersible pump with a 75 hp, 460 volt 3 phase motor. The pump is controlled by a variable frequency drive. Connected to the pump discharge are several bladder pressure tanks used to minimize pump cycling and maintain pressure in the system. The pump discharge is equipped with a flow meter.

Piping: The pump discharge has a tee connected to buried 3-inch diameter PVC mainlines that supply 22 zones that irrigate the two ball fields (place of use) shown on the transfer map.

Zones and Sprinklers: The place of use irrigated under this certificate has 13 zones with I-40 Hunter Sprinklers and 9 zones with I-25 Hunter Sprinklers.
