Completed Transfer Application Map.
Completed Evidence of Use Affidavit and supporting documentation.
Affidavit(s) of Consent from Landowner(s) (if the applicant does not own the land the water right is on.)
Supplemental Form D - For water rights served by or issued in the name of an irrigation district. Complete when the transfer applicant is not the irrigation district.
Land Use Information Form with approval and signature (or signed land use form receipt stub). Not required if water is to be diverted, conveyed, and/or used only on federal lands or if all of the following apply: a) a change in place of use only, b) no structural changes, c) the use of water is for irrigation only, and d) the use is located within an irrigation district or an exclusive farm use zone.
Water Well Report/Well Log for changes in point(s) of appropriation (well(s)) or additional point(s) of appropriation.
Geologist Report for a change from a surface water point of diversion to a ground water point of appropriation (well), if the proposed well is more than 500' from the surface water source and more than $1000^{\prime}$ upstream or downstream from the point of diversion. See OAR 690-380-2130 for requirements and applicability.

## Your transfer application will be returned if any of the map requirements listed below are not met.

Please be sure that the transfer application map you submit includes all the required items and matches the existing water right map. Check all boxes that apply.
$\searrow \square$ N/A Certified Water Right Examiner (CWRE) Stamp and Original Signature. For a list of CWREs, see http://apps.wrd.state.or.us/apps/wr/cwre license view/. CWRE stamp and signature are not required for substitutions.

If more than three water rights are involved, separate maps are needed for each water right.
Permanent quality printed with dark ink on good quality paper.
The size of the map can be $8 \frac{1}{2} \times 11$ inches, $81 / 2 \times 14$ inches, $11 \times 17$ inches, or up to $30 \times 30$ inches. For $30 \times 30$ inch maps, one extra copy is required.

A north arrow, a legend, and scale.
The scale of the map must be: 1 inch $=400$ feet, 1 inch $=1,320$ feet, the scale of the Final Proof/Claim of Beneficial Use Map (the map used when the permit was certificated), the scale of the county assessor map if the scale is not smaller than 1 inch $=1,320$ feet, or a scale that has been pre-approved by the Department.

Township, Range, Section, $1 / 41 / 4$, DLC, Government Lot, and other recognized public land survey lines.

Tax lot boundaries (property lines) are required. Tax lot numbers are recommended.
Major physical features including rivers and creeks showing direction of flow, lakes and reservoirs, roads, and railroads.

Major water delivery system features from the point(s) of diversion/appropriation such as main pipelines, canals, and ditches.

Existing place of use that includes separate hachuring for each water right, priority date, and use including number of acres in each quarter-quarter section, government lot, or in each quarter-quarter section as projected within government lots, donation land claims, or other recognized public land survey subdivisions. If less than the entirety of the water right is being changed, a separate hachuring is needed for lands left unchanged.
$\boxtimes \square$ N/A Proposed place of use that includes separate hachuring for each water right, priority date, and use including number of acres in each quarter-quarter section, government lot, or in each quarter-quarter section as projected within government lots, donation land claims, or other recognized public land survey subdivisions.

Existing point(s) of diversion or well(s) with distance and bearing or coordinates from a recognized survey corner. This information can be found in your water right certificate or permit.
$\boxtimes \square \mathrm{N} / \mathrm{A}$ If you are proposing a change in point(s) of diversion or well(s), show the proposed location RECEIVED BY OWRDd label it clearly with distance and bearing or coordinates. If GPS coordinates are used, latitude-longitude coordinates may be expressed as either degrees-minutes-seconds with at least one digit after the decimal (example $-42^{\circ} 32^{\prime} 15.5^{\prime \prime}$ ) or degrees-decimal with five or more digits after the decimal (example - $42.53764^{\circ}$ ).

*Example for Line 5a calculation to transfer 45.0 acres of Primary Certificate 12345 (total 1.25 cfs for 100 acres) and 45.0 acres of Supplemental Certificate 87654 ( $1 / 80 \mathrm{cfs}$ per acre) on the same land:

1. For irrigation calculate cfs for each water right involved as follows:
a. Divide total authorized cfs by total acres in the water right (for C12345, $1.25 \mathrm{cfs} \div 100 \mathrm{ac}$ ); then multiply by the number of acres to be transferred to get the transfer $\mathrm{cfs}(x 45 a c=0.56 \mathrm{cfs}$ ).
b. If the water right certificate does not list total cfs, but identifies the allowable use as $1 / 40$ or $1 / 80$ of a cfs per acre; multiply number of acres proposed for change by either 0.025 (1/40) or 0.0125 (1/80). (For C87654, 45.0 ac $x 0.0125$ $c f s / a c=0.56 c f s)$
2. Add cfs for the portions of water rights on all the land included in the transfer; however do not count cfs for supplemental rights on acreage for which you have already calculated the cfs fee for the primary right on the same land. The fee should be assessed only once for each "on the ground" acre included in the transfer. (In this example, blank 5a would be only $0.56 c f s$, since both rights serve the same 45.0 acres. Blank $5 b$ would be 0 and Line 5 would then also become 0 ).

## Check One Box

By signing this application, I understand that, upon receipt of the draft preliminary determination and prior to Department approval of the transfer, I will be required to provide landownership information and evidence that I am authorized to pursue the transfer as identified in OAR 690-380-4010(5); OR

RECEIVED BY OWR:
I affirm the applicant is a municipality as defined in ORS $540.510(3)(\mathrm{b})$ and that the right is in the name of the municipality or a predecessor; $\mathbf{O R}$I affirm the applicant is an entity with the authority to condemn property and is acquiring by
condemnation the property to which the water right proposed for transfer is appurtenant and have supporting documentation.

I understand that prior to Department approval of the transfer application, I may be required to submit payment to the Department for publication of a notice in a newspaper with general circulation in the area where the water right is located, once per week for two consecutive weeks. If more than one qualifying newspaper is available, I suggest publishing the notice in the following newspaper: Burns Herald $\qquad$ -

Is the applicant the sole owner of the land on which the water right, or portion thereof, proposed for transfer is located? $\boxtimes$ Yes $\square$ No If NO, include signatures of all deeded landowners (and mailing and/or e-mail addresses if different than the applicant's) or attach affidavits of consent (and mailing and/or email addresses) from all landowners or individuals/entities to which the water right(s) were conveyed.Check the following boxes that apply:
$\boxtimes$ The applicant is responsible for completion of change(s). Notices and correspondence should continue to be sent to the applicant.
$\square$ The receiving landowner will be responsible for completing the proposed change(s) after the final order is issued. Copies of notices and correspondence should be sent to this landowner.
$\square$ Both the receiving landowner and applicant will be responsible for completion of change(s). Copies of notices and correspondence should be sent to this landowner and the applicant.
At this time, are the lands in this transfer application in the process of being sold? $\square$ Yes $\boxtimes$ No
If YES, and you know who the new landowner will be, please complete the receiving landowner information table below. If you do not know who the new landowner will be, then a request for assignment will have to be filed for at a later date.

If a property sells, the certificated water right(s) located on the land belong to the new owner, unless a sale agreement or other document states otherwise. For more information see:

## Description of Water Delivery System

System capacity: $\mathbf{0 . 8}$ for irrigation; $\mathbf{3 . 2 3}$ for supplemental irrigation \& $\mathbf{3 . 2 3}$ for industrial use cubic feet per second (cfs) OR
___ gallons per minute (gpm)
Describe the current water delivery system or the system that was in place at some time within the last five years. Include information on the pumps, canals, pipelines and sprinklers used to divert, convey and apply the water at the authorized place of use. Water is pumped from the Monaco Well and conveved by closed conduit into a geothermal heating system for the large fabrication building. Also, tail water from the heating system is released and conveyed to the flood irrigated fields to the south by ditch or canal.

## For Place of Use or Character of Use Changes

If YES, list the certificate, water use Are there other water right certificates, water use permits or ground water registrations associated
with the "from" or the "to" lands? Yes No
permit, or ground water registration numbers: 14088.
Pursuant to ORS 540.510, any "layered" water use such as an irrigation right that is supplemental to a primary right proposed for transfer must be included in the transfer or be cancelled. Any change to a ground water registration must be filed separately in a ground water registration modification application.

For Substitution (ground water supplemental irrigation will be substituted for surface water primary irrigation)

For a change in point(s) of appropriation (well(s)) or additional point(s) of appropriation:
$\boxtimes$ Well $\log (s)$ are attached for each authorized and proposed well(s) that are clearly labeled and associated with the corresponding well(s) in Table 1 above and on the accompanying application map. Tip: You may search for well logs on the Department's web page at: http://apps.wrd.state.or.us/apps/gw/well_log/Default.aspx

## AND/OR

$\square$ Describe the construction of the authorized and proposed well(s) in Table 3 for any wells that do not have a well log. For proposed wells not yet constructed or built, provide "a best estimate" for each requested information element in the table. The Department recommends you consult a licensed well driller, geologist, or certified water right examiner to assist with assembling the information necessary to complete Table 3.

## Table 3. Construction of Point(s) of Appropriation

Any well(s) in this listing must be clearly tied to corresponding well(s) described in Table 1 and shown on the accompanying application map. Failure to provide the information will delay the processing of your transfer application until it is received. The information is necessary for the department to assess whether the proposed well(s) will access the same source aquifer as the authorized point(s) of appropriation (POA). The Department is prohibited by law from approving POA changes that do not access the same source aquifer.

List the change proposed for the acreage in each $1 / 41 / 4$. If more than one change is proposed, specify the acreage associated with each change.
If there is more than one POD/POA involved in the proposed changes, specify the acreage associated with each POD/POA.
