Re: Application for Water Right Temporary Transfer - Green Spring Farms

Dear Mr. Starnes:

On behalf of Green Spring Farms, I am submitting the enclosed Application for a Water Right Temporary Transfer for Certificates 43607 and 47649. (A 0.08 cfs portion of Certificate 43607 and all of Certificate 47649 is to be transferred.) The Temporary Transfer Application requests to temporarily change the place of use and point of diversion for the transferred portions of both certificates. The requested time period for this temporary transfer is five years (terminating at the end of the 2020 irrigation season).

Enclosed is the required application fee of \$997.20, which was calculated as follows:

| \$700 | Base Fee, single water right |
|------------|--|
| \$225 | Fee for two water rights |
| + \$ 72.20 | Acre Fee of \$2/acre of primary irrigation (36.1 acres \times 2 = \$72.20) |
| \$997.20 | Total Application Fee |

If you have any questions or concerns, please contact me at 541-257-9004. I look forward to hearing from you soon.

Sincerely,

Kimberly Grigsby

Senior Water Resources Consultant

^{*}Example for Line 2a calculation to transfer 45.0 acres of Primary Certificate 12345 (total 1.25 cfs for 100 acres) and 45.0 acres of Supplemental Certificate 87654 (1/80 cfs per acre) on the same land:

^{1.} Divide total authorized cfs by total acres in the water right (for C12345, 1.25 cfs \div 100 ac); then multiply by the number of acres to be transferred to get the transfer cfs (x 45 ac= 0.56 cfs).

^{2.} If the water right certificate does not list total cfs, but identifies the allowable use as 1/40 or 1/80 of a cfs per acre; multiply number of acres proposed for change by either 0.025 (1/40) or 0.0125 (1/80). (For C87654, 45.0 ac x 0.0125 cfs/ac = 0.56 cfs)

^{3.} Add cfs for the portions of water rights on all the land included in the transfer; however do not count cfs for supplemental rights on age for which you have already calculated the cfs fee for the primary right on the same land. The fee should be assessed by once for each "on the ground" acre included in the transfer. (In this example, blank 2a would be only 0.56 cfs, since both rights serve the same 45.0 acres. Blank 2b would be 0 and Line 2 would then also become 0).

Any well(s) in this listing must be clearly tied to corresponding well(s) described in Table 1 and shown on the accompanying application map. Failure to provide the information will delay the processing of your transfer application until it is received. The information is necessary for the department to assess whether the proposed well(s) will access the same source aquifer as the authorized point(s) of appropriation (POA). The Department is prohibited by law from approving POA changes that do not access the same source aquifer. N/A: Certificate 43607 is a Surface Water Right.

Revised Temporary_ T-12369 Table 1s_5_18_16.pdf; Revised_Temp_Transfer_map.pdf

Hi Tracy,

On May 4, GSI filed temporary transfer T-12369 on behalf of Green Spring Farms. As we discussed, GSI recently became aware that the proposed point of diversion identified in the temporary transfer application does not accurately reflect the location where our client intends to divert water. We have developed a revised map and modified the two Table 1s to correct this problem. The revised map and two modified pages of the application attached.

Please let me know if you have any questions or need additional information.

Best regards,

Kim
