Description of Water Delivery System

 _____ gallons per minute (gpm)

WATER RESOURCES DEPT
 SALEM, OREGON

Describe the current water delivery system or the system that was in place at some time within the last five years. Include information on the pumps, canals, pipelines and sprinklers used to divert, convey and apply the water at the authorized place of use. **Water is conveyed from Well 2 (MARI 4757) using a 50 Hp turbine pump through a six-inch PVC mainline to the south. At the end of TL 600 the mainline turns east along the southern property line. From this mainline are hydrants connecting solid sets of aluminum handlines running north-south through blueberry fields irrigated with impact sprinklers. The mainline continues south to the NE corner of TL 1600, then turns west along the northern property boundary then around the house to the south, ending at the SW corner of the house. Along this line are hydrants where handlines or wheel lines can be attached to irrigate sod and grass seed in this area. To irrigate the property north of Linnet road, a handline is run through a conduit under the road to the northern property which is irrigated by handlines or wheel lines with impact sprinklers.**

Are there other water right certificates, water use permits or ground water registrations associated with the “from” or the “to” lands? Yes No NA

If YES, list the certificate, water use permit, or ground water registration numbers: NA.

Pursuant to ORS 540.510, any “layered” water use such as an irrigation right that is supplemental to a primary right proposed for transfer must be included in the transfer or be cancelled. Any change to a ground water registration must be filed separately in a ground water registration modification application.

For a change in point(s) of appropriation (well(s)) or additional point(s) of appropriation:

- Well log(s) are attached for each authorized and proposed well(s) that are clearly labeled and associated with the corresponding well(s) in Table 1 above and on the accompanying application map.

Tip: You may search for well logs on the Department’s web page at:

- Describe the construction of the authorized and proposed well(s) in Table 3 for any wells that do not have a well log. For *proposed wells not yet constructed or built*, provide “a best estimate” for each requested information element in the table. The Department recommends you consult a licensed well driller, geologist, or certified water right examiner to assist with assembling the information necessary to complete Table 3.

Any well(s) in this listing must be clearly tied to corresponding well(s) described in Table 1 and shown on the accompanying application map. Failure to provide the information will delay the processing of your transfer application until it is received. The information is necessary for the department to assess whether the proposed well(s) will access the same source aquifer as the authorized point(s) of appropriation (POA). The Department is prohibited by law from approving POA changes that do not access the same source aquifer.
