Application for Permanent Water Right Transfer

Part 1 of 5 – Minimum Requirements Checklist

This transfer application will be returned if Parts 1 through 5 and all required attachments are not completed and included.
 For questions, please call (503) 986-0900, and ask for Transfer Section.

Check all items included with this application. (N/A = Not Applicable)

- Part 1 – Completed Minimum Requirements Checklist.
- Part 2 – Completed Transfer Application Map Checklist.
- Part 3 – Application Fee, payable by check to the Oregon Water Resources Department, and completed Fee Worksheet, page 3. Try the new online fee calculator at: http://apps.wrd.state.or.us/apps/misc/wrd_fee_calculator. If you have questions, call Customer Service at (503) 986-0801.
- Part 4 – Completed Applicant Information and Signature.
- Part 5 – Information about Water Rights to be Transferred: **How many water rights are to be transferred? 1 List them here: An APOA To Cert. 90942**
 Please include a separate Part 5 for each water right. (See instructions on page 6)

Attachments:

- Completed Transfer Application Map.
- Completed Evidence of Use Affidavit and supporting documentation.
- N/A Affidavit(s) of Consent from Landowner(s) (if the applicant does not own the land the water right is on.)
- N/A Supplemental Form D – For water rights served by or issued in the name of an irrigation district. Complete when the transfer applicant is not the irrigation district.
- N/A Land Use Information Form with approval and signature (or signed land use form receipt stub). Not required if water is to be diverted, conveyed, and/or used only on federal lands or if **all** of the following apply: a) a change in place of use only, b) no structural changes, c) the use of water is for irrigation only, and d) the use is located within an irrigation district or an exclusive farm use zone.
- N/A Water Well Report/Well Log for changes in point(s) of appropriation (well(s)) or additional point(s) of appropriation.
- N/A Geologist Report for a change from a surface water point of diversion to a ground water point of appropriation (well), if the proposed well is more than 500' from the surface water source and more than 1000' upstream or downstream from the point of diversion. See OAR 690-380-2130 for requirements and applicability.

(For Staff Use Only)

WE ARE RETURNING YOUR APPLICATION FOR THE FOLLOWING REASON(S):

<input type="checkbox"/> Application fee not enclosed/insufficient	<input type="checkbox"/> Map not included or incomplete
<input type="checkbox"/> Land Use Form not enclosed or incomplete	<input type="checkbox"/> Additional signature(s) required
<input type="checkbox"/> Other/Explanation _____	<input type="checkbox"/> Part _____ is incomplete

Part 4 of 5 – Applicant Information and Signature

Applicant Information

APPLICANT/BUSINESS NAME City of Vale			PHONE NO. 541-473-3133	ADDITIONAL CONTACT NO.
ADDRESS 252 B Street West			FAX NO. 541-473-3895	
CITY Vale	STATE Oregon	ZIP 97918	E-MAIL lfindley@cityofvale.com	
BY PROVIDING AN E-MAIL ADDRESS, CONSENT IS GIVEN TO RECEIVE ALL CORRESPONDENCE FROM THE DEPARTMENT ELECTRONICALLY. COPIES OF THE FINAL ORDER DOCUMENTS WILL ALSO BE MAILED.				

Agent Information – The agent is authorized to represent the applicant in all matters relating to this application.

AGENT/BUSINESS NAME Mike Posada - Anderson Perry & Associates Inc.			PHONE NO. 541-963-8309	ADDITIONAL CONTACT NO.
ADDRESS 1901 N Fir Street			FAX NO. 541-963-5456	
CITY La Grande	STATE Oregon	ZIP 97850	E-MAIL mposada@andersonperry.com	
BY PROVIDING AN E-MAIL ADDRESS, CONSENT IS GIVEN TO RECEIVE ALL CORRESPONDENCE FROM THE DEPARTMENT ELECTRONICALLY. COPIES OF THE FINAL ORDER DOCUMENTS WILL ALSO BE MAILED.				

Explain in your own words what you propose to accomplish with this transfer application, and why: Add an Additional Point of Appropriation (APOA) to Certificate 90942. Certificate 90942 includes seven wells at the Vale Airport and Gellerman-Froman Canal. Certificate 90942 contains a total of 5 CFS. This transfer intends to add an APOA, the "Washington Street Well" to Certificate 90942. This Transfer is intended to TIE the Washington St Well to Well 6 (5) POD 5 of Certificate 90942 so that the Washington St Well can Share the 1.30 CFS from Well 6 (5) POD 5 of Certificate 90942. The intention is to then have the capacity to pump 0.75 CFS from Cert 87397 at the Washington St Well as well as to share the 1.30 CFS from Well 6 (5) POD 5 of Certificate 90942 and pump it from either well.

This transfer is being done in preparation for a Water System Improvements Project that will improve the overall efficiency of the water distribution system for the City of Vale.

If you need additional space, continue on a separate piece of paper and attach to the application as "Attachment 1".

- Check this box if this project is fully or partially funded by the American Recovery and Reinvestment Act. (Federal stimulus dollars)

Check One Box

- By signing this application, I understand that, upon receipt of the draft preliminary determination and prior to Department approval of the transfer, I will be required to provide landownership information and evidence that I am authorized to pursue the transfer as identified in OAR 690-380-4010(5); **OR**
- I affirm the applicant is a municipality as defined in ORS 540.510(3)(b) and that the right is in the name of the municipality or a predecessor; **OR**
- I affirm the applicant is an entity with the authority to condemn property and is acquiring by condemnation the property to which the water right proposed for transfer is appurtenant and have supporting documentation.

Part 5 of 5 – Water Right Information

Please use a separate Part 5 for each water right being changed. See instructions on page 6, to copy and paste additional Part 5s, or to add additional rows to tables within the form.

CERTIFICATE # 90942

Description of Water Delivery System

System capacity: 5.00 CFS and further limited to 1.30 CFS at Well 6(5) POD 5 cubic feet per second (cfs) OR

2,245 GPM (total right) and further limited to 584 GPM at Well 6(5) POD 5 gallons per minute (gpm)

Describe the current water delivery system or the system that was in place at some time within the last five years. Include information on the pumps, canals, pipelines and sprinklers used to divert, convey and apply the water at the authorized place of use.

The intended APOA for this Transfer is known as the "Washington Street Well", located at the intersection of Washington St. and 17th St. The Washington Street Well was hand-dug in 1912 when the City water system was originally constructed. The well is roughly 16 feet in diameter and 30 feet deep. The well is constructed of reinforced concrete walls and top slab, and has a gravel bottom. The bottom of the concrete casing is perforated 18 inches from the bottom of the well, for a length of 2 feet. The well utilizes a shallow alluvial aquifer. See Attachment "B" for a recent pump test of the Washington Street Well.

Well 6 (5), POD 5 for Certificate 90942 is 35' feet deep with a recorded static water level of 6.5 feet based on the data included in Well Log MALH 51524, Attachment "C". Certificate 90942 includes seven wells and is locally known as "The Airport Well Field", the wells, including Well 6 (5), POD 5 were constructed in 2000 as part of a City of Vale water system improvements project. Both wells have water meters at each individual well, and also a master meter in the City's chlorination facility. The wells are also equipped with pressure transducers to read the static and drawdown water levels.

Operation of both wells is controlled by a telemetry and SCADA system, based on an "On Demand" system that remotely monitors the operating level of the City's "Rhinehart" and "Airport" Reservoirs. The remote system activates the pump motor controls to pump water to fill the reservoirs, as needed, based on preset operating levels. Water from the reservoirs then supplies the water distribution system for the entire place of use, the City of Vale water use area, through a system of water transmission and distribution lines.

Certificate # Cert 90942, POD 5, Well No. 6 (5), see Well Log MALH 51524, Attachment C

For Place of Use or Character of Use Changes

Are there other water right certificates, water use permits or ground water registrations associated with the "from" or the "to" lands? Yes No

If YES, list the certificate, water use permit, or ground water registration numbers: **Cert 87397 - The Washington St Well, POD 1, Well No. 1, see Pump Test, Attachment B.**

Pursuant to ORS 540.510, any "layered" water use such as an irrigation right that is supplemental to a primary right proposed for transfer must be included in the transfer or be cancelled. Any change to a ground water registration must be filed separately in a ground water registration modification application.

For Substitution (ground water supplemental irrigation will be substituted for surface water primary irrigation)

Ground water supplemental Permit or Certificate # N/A;
Surface water primary Certificate # N/A.

For a change in point(s) of appropriation (well(s)) or additional point(s) of appropriation:

Well log(s) are attached for each authorized and proposed well(s) that are clearly labeled and associated with the corresponding well(s) in Table 1 above and on the accompanying application map.

Tip: You may search for well logs on the Department's web page at:

http://apps.wrd.state.or.us/apps/gw/well_log/Default.aspx

AND/OR

Describe the construction of the authorized and proposed well(s) in Table 3 for any wells that do not have a well log. For *proposed wells not yet constructed or built*, provide "a best estimate" for each requested information element in the table. The Department recommends you consult a licensed well driller, geologist, or certified water right examiner to assist with assembling the information necessary to complete Table 3.

Table 3. Construction of Point(s) of Appropriation

Any well(s) in this listing must be clearly tied to corresponding well(s) described in Table 1 and shown on the accompanying application map. Failure to provide the information will delay the processing of your transfer application until it is received. The information is necessary for the department to assess whether the proposed well(s) will access the same source aquifer as the authorized point(s) of appropriation (POA). The Department is prohibited by law from approving POA changes that do not access the same source aquifer.
