Part 4 of 4 – Water Right and Instream Use Information

Use a separate Part 4 for each water right to be leased instream

Table 2

Use Table 2 to illustrate the totals for the water right proposed to be leased instream (based on Part 3 of 4) Water Right # 83571

Total rate and volume by priority date, POD, use and acreage as appropriate considering the right to be leased. If not enough room below, you may add rows (see instructions) or create a spreadsheet (matching Table 2 and clearly labeled) and attach.
(cfs = cubic feet per second and af = acre-feet)

Priority Date	POD #	Use	Acres	Other Information (such as conditions/limitations on the right)	Rate (cfs)	Volume (af)
10/31/1900	11	Irrig	9.55	Season 1 Rate / Total Volume	0.109	90.12

OR <input type="checkbox"/> Please check this box if you are not sure of the proposed reach and want water to be protected within a reach below the POD, if possible. If no reach is identified or the above box is not checked, and there is only one POD listed on the water right, the lease may be processed to be protected at the POD.)						
Instream Portion: May not exceed the maximum rate/volume for the right (identified in Table 2)						
Use the table 3 to illustrate the instream rate, volume and instream period by priority date, POD, Use and acreage, as appropriate. If not enough room below, you may add rows (see instructions) or create a spreadsheet (clearly labeled and matching the below portion of Table 3) and attach.

This calculator is primarily designed to facilitate the calculation of how much water may be protected instream through instream leases and transfers. However, the calculator can also be used to determine the rate and duty associated with other transfers and cancellations. For questions regarding its use, please contact Laura Wilke at 503-986-0884.

The following tables show the amount of water that is protectable for Instream Leases and Instream Transfers, under the October 31, 1900 priority date. (Please contact the Department if you prefer to protect water instream under the combined October 31, 1900 and December 2, 1907 priority dates.) To prevent enlargement and injury, the instream use has been modified from the authorized season of April 1 through October 31, to April 1 through October 26.
