Certificate 65972 Additional Point of Appropriation

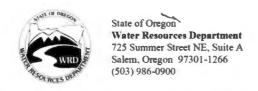

Robert Wood owns Tax Lot 1000, Map 15-11-30C, as described in Document No. 2016-46969, Deschutes County Official Records, and currently shares a POA (Well 1) with the parcel to the west owned by Martin (TL 1100, Map 15-11-30C, Document No. 2016-51981, Deschutes County Official Records). Well 1 (L-41289) is on the Martin's land, TL 1100.

The applicant wishes to transfer 4.3 acres of this water on to Well 2 (L-57249) on TL 1000.

When the final proof survey was done in 1987, TL 1000 had no development, so the entire area of approximately 5.4 acres was irrigated. Improvements now cover approximately 1.1 acres of TL 1000, so this application is only concerned with the 4.3 acres of water that is subject to transfer on the Wood parcel.

*Example for Line 5a calculation to transfer 45.0 acres of Primary Certificate 12345 (total 1.25 cfs for 100 acres) and 45.0 acres of Supplemental Certificate 87654 (1/80 cfs per acre) on the same land:

1. For irrigation calculate cfs for each water right involved as follows:

a. Divide total authorized cfs by total acres in the water right (for C12345, 1.25 cfs \div 100 ac); then multiply by the number of acres to be transferred to get the transfer cfs (x 45 ac = 0.56 cfs).

b. If the water right certificate does not list total cfs, but identifies the allowable use as 1/40 or 1/80 of a cfs per acre; multiply number of acres proposed for change by either 0.025 (1/40) or 0.0125 (1/80). (For C87654, 45.0 ac x 0.0125 cfs/ac = 0.56 cfs)

2. Add cfs for the portions of water rights on all the land included in the transfer; however do not count cfs for supplemental rights on acreage for which you have already calculated the cfs fee for the primary right on the same land. The fee should be assessed only once for each "on the ground" acre included in the transfer. (In this example, blank 5a would be only 0.56 cfs, since both rights serve the same 45.0 acres. Blank 5b would be 0 and Line 5 would then also become 0).

Additional remarks: TL 1000 was undeveloped at the time of the final proof survey, so the entire parcel (5.4 acres) was irrigated. After the house and other improvements were built, irrigated area totals approximately 4.3 acres. This is the acreage intended to transfer on the the APOA. *TL 1100 is approximately 5.1 acres in size, with approximately 4.7 acres of land available for irrigation.
