RE: Transfer Application for Certificates 25477, 26836, 36702

To Whom It May Concern:

On behalf of our client, Michael and Ardele Obrist, please find enclosed a point of diversion transfer application, transfer map, and supporting documents for Certificates 25477, 26836 and 36702. A check in the amount of \$950 for this ODFW supported fish friendly application is also enclosed.

In addition, the applicant would like to request a five year period in which to make the point of diversion change as moving the point of diversion will require reconstruction and redistribution of the pumps, water delivery, and irrigation systems.

Should you have any questions regarding the application or documents, please do not hesitate to contact me.

Sincerely,

ATTN: Transfer Section
725 Summer Street NE, Suite A
Salem, OR 97301-1266

Subject: Rowe Creek POD Transfer

To Whom It Many Concern,

The Oregon Department of Fish and Wildlife is submitting this letter of support for Mr. Obrist's water right point of diversion (POD) transfer application that will move Rowe Creek water rights to the John Day River. The Obrist's property is located in Wheeler County on Tax Lots 102, 109 and 110 of T9S, R21E – Section 27.

Mr. Obrist has been working towards this consolidation for many years to benefit instream flows of Rowe Creek. The consolidation will provide benefits for both the water user and fish species present in Rowe Creek. Rowe Creek has very low base stream flows during irrigation season.

In addition to the POD transfers several fish passage and stream habitat improvements are planned for this reach of Rowe Creek. The combination of all these projects will greatly enhance natural resource conditions of Rowe Creek.

ODFW believes that this application will provide a net benefit to federally listed steelhead and other native resident fish species rearing in Rowe Creek. Improving fish rearing habitat and stream flow quantity and quality is a priority for ODFW. We recommend that the Water Resources Department consider reducing application fees for Mr. Obrist that are associated with the Rowe Creek POD transfers. We will review the application as it proceeds through the inter-agency review process.

Sincerely,

Brent Smith

1. For irrigation calculate cfs for each water right involved as follows:
 - a. Divide total authorized cfs by total acres in the water right (*for C12345, 1.25 cfs ÷ 100 ac*); then multiply by the number of acres to be transferred to get the transfer cfs (*x 45 ac = 0.56 cfs*).
 - b. If the water right certificate does not list total cfs, but identifies the allowable use as 1/40 or 1/80 of a cfs per acre; multiply number of acres proposed for change by either 0.025 (1/40) or 0.0125 (1/80). (*For C87654, 45.0 ac x 0.0125 cfs/ac = 0.56 cfs*)
2. Add cfs for the portions of water rights on all the land included in the transfer; however **do not count cfs for supplemental rights on acreage for which you have already calculated the cfs fee for the primary right on the same land**. The fee should be assessed only once for each “on the ground” acre included in the transfer. (*In this example, blank 5a would be only 0.56 cfs, since both rights serve the same 45.0 acres. Blank 5b would be 0 and Line 5 would then also become 0*).

1. For irrigation calculate cfs for each water right involved as follows:
 - a. Divide total authorized cfs by total acres in the water right (*for C12345, 1.25 cfs ÷ 100 ac*); then multiply by the number of acres to be transferred to get the transfer cfs (*x 45 ac = 0.56 cfs*).
 - b. If the water right certificate does not list total cfs, but identifies the allowable use as 1/40 or 1/80 of a cfs per acre; multiply number of acres proposed for change by either 0.025 (1/40) or 0.0125 (1/80). (*For C87654, 45.0 ac x 0.0125 cfs/ac = 0.56 cfs*)
2. Add cfs for the portions of water rights on all the land included in the transfer; however **do not count cfs for supplemental rights on acreage for which you have already calculated the cfs fee for the primary right on the same land**. The fee should be assessed only once for each “on the ground” acre included in the transfer. (*In this example, blank 5a would be only 0.56 cfs, since both rights serve the same 45.0 acres. Blank 5b would be 0 and Line 5 would then also become 0*).
