SUBJECT: Application for Permanent Water Right Transfer of Certificate No. 38981

To Whom It May Concern:

JLR, LLC has enclosed the Permanent Water Right Transfer for Certificate No. 38981.

The purpose of the Permanent Water Right Transfer is to add a point of appropriation (APOA) to the existing water right in order to improve redundancy and reliability with newer equipment. The existing point of appropriation (POA) will likely be replaced with this APOA, but we would like both the existing POA and the APOA to be authorized points of appropriation under the right. The well flow will remain at 800 gpm.

Also, we would note that this water right was involved in a prior specific-to-general industrial use change, which also included a change in the authorized place of use (POU) (to reflect the property owned by the land owner at the time of the original water right application for the specific industrial use). Thus, while the certificate identifies the POU as the SW 1/4, as projected within Bonney DLC 47, section 17, T5S, R1W, WM, the Department has recognized a larger POU, pursuant to a letter dated Oct. 12, 2012 to the Department (Notice of specific-to-general industrial water use change pursuant to ORS 540.520(9) (Certificate No. 38981)), and pursuant to the Department's response, dated October 29, 2012. Copies of these letters are included in Attachment C, and we would request that any final transfer order reflect the current authorized POU, as recognized in the Department October 29, 2012 correspondence.

Please feel free to contact me if you have any questions about the contents of these materials

Sincerely,

Keith Beckman

1. For irrigation calculate cfs for each water right involved as follows:

a. Divide total authorized cfs by total acres in the water right (for C12345, 1.25 cfs  $\div$ 100 ac); then multiply by the number of acres to be transferred to get the transfer cfs (x 45 ac = 0.56 cfs).

b. If the water right certificate does not list total cfs, but identifies the allowable use as 1/40 or 1/80 of a cfs per acre; multiply number of acres proposed for change by either 0.025 (1/40) or 0.0125 (1/80). (For C87654, 45.0 ac x 0.0125 cfs/ac = 0.56 cfs)

2. Add cfs for the portions of water rights on all the land included in the transfer; however do not count cfs for supplemental rights on acreage for which you have already calculated the cfs fee for the primary right on the same land. The fee should be assessed only once for each "on the ground" acre included in the transfer. (In this example, blank 5a would be only 0.56 cfs, since both rights serve the same 45.0 acres. Blank 5b would be 0 and Line 5 would then also become 0).

### **INSTRUCTIONS** for editing the Application Form

To add additional lines to tables within the forms or to copy and paste additional Part 5 pages, please save the application form to your computer. Unlock the document by using one of the following

instructions for your Microsoft Word software version:

#### Microsoft Word 2003

Unlock the document by one of the following:

• Using the Tools menu => click Unprotect Document; OR

• Using the Forms toolbar => click on the Protect/Unprotect icon.

To relock the document to enable the checkboxes to work, you will need to:

• Using the Tools menu => click Protect Document; OR

Using the Forms toolbar => click on the Protect/Unprotect icon.

Once the application has been unlocked, you may:

- add additional rows to tables using the Table tools, and
- select and copy the pages of Part 5 and paste as many additional sets of Part 5 pages as needed at the end of the application.

After editing, re-lock the document to enable checkboxes to work.

#### Microsoft Word 2007

- Unlock the document by clicking the Review tab, then click Protect Document, then click **Stop Protect**
- To relock the document, click Editing Restrictions, then click Allow Only This Type of Editing, select Filling In Forms from the drop-down menu, then check Yes, Start Enforcing Protection.

#### Microsoft Word 2010

- Unlock the document by clicking the Review tab, toggle the Restrict Editing icon at the upper right, then click Stop Protect at the bottom right. Then uncheck the "Allow only this type of editing in the document: Filling in forms" in the "Editing restrictions" section on the right-hand list of options.
- To relock the document, check the Editing Restrictions/Allow Only This Type of Editing/Filling In Forms box from the drop-down menu, then check Yes, Start Enforcing Protection. You do not need to assign a password for the editing restrictions.

#### Other Alternatives:

- Photocopy pages or tables in Part 5, mark-through any non-applicable information, insert/attach photocopied pages to document in the appropriate location, and manually amend page numbers as necessary (e.g. Page 5 6 of 9 10).
- You may refer to additional attachments that you may include, such as separately produced tables or spreadsheets to convey large numbers of rows of place of use listings, owner/property parcels, etc. You may contact the Department at 503-986-0900 and ask for Transfer Staff if you have questions.

System capacity: 1.782 cubic feet per second (cfs) OR

800 gallons per minute (gpm)

Describe the current water delivery system or the system that was in place at some time within the last five years. Include information on the pumps, canals, pipelines and sprinklers used to divert, convey and apply the water at the authorized place of use. A pump house located at TL701 conveys water by underground pipe to the waters designated POU on TL 700. There the water is used in the distribution system for the classified USE, general industrial purposes.

Any well(s) in this listing must be clearly tied to corresponding well(s) described in Table 1 and shown on the accompanying application map. Failure to provide the information will delay the processing of your transfer application until it is received. The information is necessary for the department to assess whether the proposed well(s) will access the same source aquifer as the authorized point(s) of appropriation (POA). The Department is prohibited by law from approving POA changes that do not access the same source aquifer.
