

June 1, 1965

Mr. Theodore A. Hendrickson  
Route 2  
Echo, Oregon

Dear Mr. Hendrickson:

A change in point of diversion or place of use can be made only for a completed and perfected water right as evidenced by a certificate.

Although you have filed notice of completion in connection with your permit No. 29867, we have not made the customary final proof survey and proof has not been submitted.

If you complete the installation of the additional diversion point within the time limits to complete construction under your permit, which is October 1, 1966, we can make record of it when the final proof survey is made and if no one is injured by such a change and no protests are received, this location would be confirmed when the certificate is issued.

This relieves the necessity of a transfer.

Our refund check in the amount of \$15 is enclosed covering the \$15 submitted. If, after completion of the right under your permit No. 29867, you desire to change your diversion point you could make the proper application.

Very truly yours,

CHRIS L. WHEELER  
State Engineer
