## Application for Allocation of Conserved Water Part 1 of 4 – Minimum Requirements Checklist

**This application will be returned if Parts 1 through 4 and all required attachments are not completed and included.**  
 For questions, please call (503) 986-0900, and ask for Allocation of Conserved Water Section.

Check all items included with this application. (N/A = Not Applicable)

- Part 1 – Completed Minimum Requirements Checklist.
- Part 2 – Completed Applicant Information and Signature.
- Part 3 – Completed Water Right Information and Conservation Measures. Please include a separate Part 3 for each water right. List all water right certificates involved in this application here: C-74135.
- Part 4 – Completed Mitigation, Proposed Use, Project Schedule, Funding, and Fee Calculation.

**Attachments:**

- Fees – Amount enclosed: \$ 500 (From last page of application).
- Application Map. Must have sufficient detail to locate and describe the facilities and areas involved in the conservation measures. Must show the place of use where water is being used if the rate or duty are changing.
- Land Use Information Form with approval and signature. (Not required if 100% of Conserved Water is being transferred instream.) **or**  
 Land Use Notice - Notice of the intent to create an instream water right must be provided to each affected county, city, municipal corporation, or tribal government along the proposed instream reach.
- N/A Completed Evidence of Use Affidavit and Supporting Documentation.
- N/A Affidavit(s) of Consent.
- N/A Letter of approval from Irrigation or Water Control District. For water rights served by or issued in the name of a District, this must be provided when the transfer applicant is not the District.
- N/A Irrigation or Water Control District's adopted policy on allocation of conserved water.
- N/A If construction of the project has begun or been completed and if more than 25 percent of the project costs have been expended before applying for allocation of conserved water, evidence that you have attempted to identify and resolve the concerns of water right holders in the area, governmental entities or other organizations who have asked to be consulted regarding the allocation of conserved water.
- N/A Evidence for Fee Waiver.
- N/A Notice of Completion.
- N/A Request for Finalization. (Entire project listed on the application must be complete. No partial finalization will be recognized.)

SALEM, OR

In your own words tell us what conservations measures you have made or propose to make and the reason for the change(s): This application describes Phase 8 of the Three Sisters Irrigation District (TSID) Main Canal Piping Program. TSID proposes to replace approximately 4,400 feet of open ditch on the Main Canal with a combination of dual, buried HDPE pipelines (one 42" and one 36" graduating to 24"), conserving approximately 424 acre-feet of water per year from seepage or evaporation. The Deschutes River Conservancy (DRC) and TSID estimated the amount of conserved water for Phase 8 using a seepage loss study completed by Black Rock Consulting on April 20th, 2012. TSID will allocate all (100%) of the water conserved from this project to the state (i.e. instream), with a single priority date of 1895. OWRD will permanently protect the conserved water from this project any time TSID is diverting water from Whychus Creek. TSID began construction of Phase 8 in fall of 2016 and is expected to complete construction by the end of August 2017.

➔ To meet State Land Use Consistency Requirements, you must list all local governments (each county, city, municipal corporation, or tribal government) within whose jurisdiction the conservation project and/or proposed instream reach will be located.

**Part 3 of 4 – Water Right Information and Conservation Measures**

WATER RESOURCES DEPT  
SALEM, OREGON

Please use a separate Part 3 for each water right involved in the proposed allocation of conserved water.

**WATER RIGHT INFORMATION:**

Water Right Subject to Transfer (check and complete **ONE** of the following):

<input checked="" type="checkbox"/> Certificated Right	74135	See Vol.96, Pg. 545
	Certificate Number	Permit Number or Decree Name
<input type="checkbox"/> Adjudicated, Un-certificated Right		
	Name of Decree	Page Number
<input type="checkbox"/> Permit for which Proof has been Approved		
	Permit Number	Special Order Volume ____, Page ____
<input type="checkbox"/> Transferred Right for which Proof has been Filed		
	Previous Certificate / Transfer Number	Date Claim of Beneficial Use Submitted

County: Deschutes

Describe the pre-project water delivery system. Include information on the diversion structure, pumps, and conveyance facilities (including canals, pipelines and sprinklers used to divert, convey and apply the water at the authorized place of use). *Provide sufficient detail for the Department to determine the system capacity.*

The TSID Main Canal diversion structure is located south of the town of Sisters on Whychus Creek at river mile 23.5 at T.15S, R10E, Sec.21, SW/SW. Diverted water passes through a horizontal dual bay fish screen and into dual 54" buried pipelines. After approximately 3.8 miles, the water flows into Watson Reservoir at the TSID main office about 4 miles East of Sisters. From Watson Reservoir water runs through the Main Canal and Cloverdale Canal to the McKenzie Reservoir. Along the way, the canals feed a series of private ditches, each with their own head gates and measuring devices. From the McKenzie Reservoir, water runs down the Association and Black Butte Pipelines where it serves the needs of McKenzie Canyon and Lower Bridge patrons. Over 50 of the 60 miles of canals and ditches are now piped, and over 5000 of the 7572 irrigated acres are now delivered pressurized water from the installed pipelines.

TSID's water right certificate (C-74135) has been altered since it was issued by OWRD to reflect an instream transfer and multiple allocations of conserved water. OWRD recently issued a final order for Phase 7 of TSID's Main Canal Piping Program (CW-90). The starting point for water rights in this application reflects the water right as described in the CW-90 final order.

**Table 1: Pre-Project Description**

List: A) the maximum rate and annual duty (volume) of water that may be diverted as stated on the water right of record; and B) the maximum amount of water that can be diverted using the pre-project facilities ("system capacity"). If there are multiple priority dates on the water right, list the rate and duty associated with each priority date. *(If the water right is only limited by rate, do not list a duty, and conversely, if the water is only limited by duty, do not list a rate.)*

PRE-PROJECT DESCRIPTION											
			Column A Water Right of Record				Column B System Capacity

Describe the proposed changes to the physical system, operations and application methods that will result in the conservation of water. If these proposed changes will change the point of diversion, you must meet the ODFW fish screen and bypass requirements pursuant to ORS 540.525. *Please include a description and details of how the estimate of water conserved was determined. Please provide sufficient detail for the Department to provide notice of the project.* TSID proposes to replace approximately 4,400 feet of open ditch on the Main Canal with a combination of dual, buried HDPE pipelines (one 42" and one 36" graduating to 24"), conserving approximately 424 acre-feet of water per year from seepage or evaporation. The Deschutes River Conservancy (DRC) and TSID estimated the amount of conserved water for Phase 8 using a seepage loss study completed by Black Rock Consulting on April 20th, 2012. TSID will allocate all (100%) of the water conserved from this project to the state (i.e. instream), with a single priority date of 1895. OWRD will permanently protect the conserved water from this project any time TSID is diverting water from Whychus Creek. TSID began construction of Phase 8 in fall of 2016 and is expected to complete construction by the end of August 2017.

**Place of Use Involved in Conservation Measures**

List only the part of the right that will be affected. If the entire right is being affected, just state "entire Certificate."

Twp	Rng	Sec	¼	¼	Tax Lot	Gvt Lot or DLC	Acres	Type of Use listed On Certificate	Priority Date

MAY 26 2017

SALEM, OR

Part 4 of 4 – Mitigation, Proposed Use,  
Project Schedule, Funding, and  
Fee Calculation

Describe any expected effects from the proposed allocation of conserved water on other water rights. Describe what currently happens to the water that is proposed to be conserved. The water conserved through Phase 8 is currently lost from the system, primarily through seepage, and is not available to other appropriators on Whychus Creek. Seepage water eventually enters the Deschutes River or its tributaries around Lake Billy Chinook, contributing to streamflow entering the lower Deschutes River. By allocating 100% of Phase 8's conserved water to the state for instream use, this project expressly intends to produce no net change in consumptive use and ensure that no harm to lower Deschutes River instream water rights will occur.

Describe any mitigation or other measures that are planned to avoid harm to other water rights. No harm to other water rights will occur from this project.

PROPOSED USE:

N/A For new out-of-stream uses, describe the intended use and boundaries of the expected area within which the diversion structures and places of use of the applicants' conserved water right will be located. This is land other than that to which this water right is appurtenant. Intended Use: ; Boundaries: \_\_\_\_\_

For instream uses to be created:

Originating Water Right (as identified in Part 3)	Priority Date	Source	Proposed Instream Period	Rate (cfs)*	Volume (ac-ft)**
C-74135	1895	Whychus Creek	4/1 - 11/1	1.0	424.0
<b>TOTAL VOLUME</b>					424.0

\*Tip: To calculate rate (if other than the rate allowed by the right), divide the volume by the number of days in the period and then divide by 1.983471; or

To calculate volume, multiply the rate by the number of days in the instream period and then multiply by 1.983471.

Note: The instream rate may not exceed the maximum rate conserved and the total volume may not exceed to maximum volume or duty conserved (Table 3, Column C)

Location of the proposed instream water right.

Water is requested to be protected within a reach. Location of the proposed reach (identify the extent of the reach): (e.g., from the upstream POD located at RM \_\_\_\_\_ to downstream location at the mouth at RM \_\_\_\_\_) The proposed permanent instream water right will be for 1.0 cfs and 424.0 acre-feet. This quantity of water will be protected instream from the POD south of the town of Sisters on Whychus Creek at river mile 23.5 at T.15S, R10E, Sec.21, SW/SW and permanently protected instream to the confluence of Whychus Creek and then mainstem Deschutes River to Lake Billy Chinook. The season of use will be from April 1st through November 1st and any other time (such as during stock runs) that TSID is diverting water from Whychus Creek.

OR

Water is requested to be protected at a point at the following location (i.e. legal description of the point of diversion (POD)) \_\_\_\_\_

Public Use for which conserved water right should be managed under an instream right (check at least one box):

- Conservation, maintenance and enhancement of aquatic and fish life, wildlife, fish and wildlife habitat, and other ecological values.
- Recreation.
- Pollution Abatement.

**RECEIVED**

MAY 30 2017

WATER RESOURCES DEPT  
SALEM, OREGON

**RECEIVED**

MAY 30 2017

WATER RESOURCES DEPT  
SALEM, OREGON

~~RECEIVED BY OWRD~~

~~MAY 26 2017~~

~~SALEM, OR~~

List any existing instream water rights at the same point or within the same requested reach(es):

- None.
- Instream Water Right Certificates: There are multiple instream leases and permanent instream water rights within all or a portion of the requested reach. They are managed and tracked by OWRD.

Is it your intent to have the proposed instream water right transfer be additive to any instream water right established under ORS 537.348 (instream transfer application process) and ORS 537.470 (allocation of conserved water) and replace a portion of any instream water right established under ORS 537.341 (state agency application process) and ORS 537.346 (conversion of minimum perennial streamflows) with an earlier priority date?

- Yes
- No. If no, please explain your intent below:

Is the requested instream flow intended to exceed the estimated average natural flow or natural lake level occurring from the drainage system?

- No; **OR**
- Yes (Provide supporting documentation that demonstrates why additional flows are significant for the public use requested.); **OR**
- Yes, and it is presumed that flows that exceed the estimated average natural flow or natural lake levels are significant because:
  - The requested flow does not exceed the maximum amount of any instream water right applied for under ORS 537.338 (state agency instream water right application process); the requested public use is for the same public use; and the requested reach covers a portion or same reach as the state agency instream water right; **and**
  - The stream is in an ODFW flow restoration priority watershed during the requested instream period; **or**
  - The stream is listed as water quality limited by DEQ.

**FUNDING**

N/A Federal or state public funds that are not subject to repayment are to be used for the project. Refer to OAR 690-018-0040(18)(a)-(d) for further information in completing this section.

Source of Funding:  Federal: \$297,016  State: \$215,802.00

Total cost for project engineering N/A  
Total cost for construction \$1,439,737.00

The present value of any incremental changes in the cost of operations and maintenance that are directly attributable to the project that would not be incurred or realized in the absences of the project is Pressurized deliveries will eliminate the need for TSID patrons to use 1-2 million kwh of electricity. Additionally, when future phases are complete, TSID will have the ability to install a 0.3 MW in line hydroelectric turbine, generating 1 million kwh annually.

The amount of funding and the value of any in-kind contributions for project engineering and construction and for any incremental changes in the costs of operations and maintenance to be provided from federal or state public funds that are not subject to repayment is \$512,818.00

The amount of funding and the value of any in-kind contributions for project engineering and construction and for any incremental change since costs of operations and maintenance to be provided from other funds is \$926,919.00

N/A Enter the percentage from Table 3, Column B (Applicant's Portion of Conserved Water) 0%. If this is more than 25%, what portion of project funds (expressed as a percentage) come from federal or state public sources? \_\_\_\_\_%

N/A The Oregon Watershed Enhancement Board (OWEB) will have a contractual interest in this project. The OWEB project number is 216-8200-14050.

**FEE CALCULATION**

Fee Schedule – ORS 536.050 <a href="http://www.oregon.gov/owrd/pubs/docs/forms/fee_schedule_4_2012.pdf">http://www.oregon.gov/owrd/pubs/docs/forms/fee_schedule_4_2012.pdf</a>	
\$1,000.00 - Base (1 <sup>st</sup> Water Right)	Add \$350.00 for each additional right
$\$1,000 + (\$0 \times \$350) = \text{Total Fee } \$1000$	

Fee Waiver Worksheet	
To qualify for a waiver of up to 50%, you must provide evidence to establish your application meets the following criteria:	
<input type="checkbox"/>	(a) Will be converted to an instream right pursuant to ORS 537.348; or
<input type="checkbox"/>	(b) Is necessary to complete a project funded under ORS 541.375 (OWEB); or
<input type="checkbox"/>	(c) Is approved by the Oregon Department of Fish and Wildlife as a project that will result in a net benefit to fish and wildlife habitat. See OAR 690-018-0040(25).
If the project meets one of the above standards, use the following formula to calculate the fees:	
<input type="checkbox"/>	(d) Enter Percentage from Table 3, Column A = <u>100%</u>
<input type="checkbox"/>	(e) Deduct 25% from percentage in (d) above = <u>75%</u>
<input type="checkbox"/>	(f) Enter the lesser of (e) above or 50% = <u>50%</u>
<input type="checkbox"/>	(g) Total Fee x % waived (f) = Fee Waiver <u>\$500.00*</u>
Example: (d) = 100% - 25% (e) = 75% (max 50% waived) = Fee x 50% = Fee Waiver	
Total Fee <u>\$1,000</u> – Fee Waiver (g) <u>\$500</u> = Amount Due <u>\$500</u>
