RE: PROPOSED INSTREAM WATER TRANSFER(S) IN YOUR JURISDICTION

We are notifying you of our intent to transfer a portion of a water right to instream use. Three Sisters Irrigation District has submitted an application to the Oregon Water Resources Department changing the place of use and type of use of a portion of its water right from Whychus Creek from an out-of-stream use to permanent instream use, creating an instream water right from the Three Sisters Irrigation District's diversion structure upstream of Sisters to the confluence of Whychus Creek and the mainstem of the Deschutes River and then to Lake Billy Chinook.

Three Sisters Irrigation District will pipe approximately 4,400 feet of its main canal in 2016 and 2017. The project will generate 424 acre-feet of conserved water that will be allocated permanently instream, restoring stream flows by 1 cfs. If you have any questions regarding the proposed application(s), or are interested in receiving additional information, please contact me at the number or email listed below.

Sincerely,

Brett Golden, Director of Program Operations

#### **EXHIBIT G**

#### **Three Sisters Irrigation District**

#### **Conserved Water Policy**

Adopted July 5<sup>th</sup>, 2005 Reviewed & Adopted July 6, 2010 Reviewed & Adopted September 1, 2015

- A. Authority & Purpose. The Board of Directors (the "Board") of the Three Sisters Irrigation District (the "District") is required to adopt this Conserved Water Policy (this "Policy") pursuant to Oregon Administrative Rule ("OAR") 690-018-0025 if the district wants to allocate conserved water. The rule requires that if the District seeks allocations of conserved water pursuant to ORS 537.455 to 537.500, then it must adopt a policy that, at a minimum:
  - Describes how water saved by conservation measures will be allocated by the District
  - Describes how the District will address the allocation of conserved water percentages under ORS 537.470
  - Provides District patrons the opportunity to fund a share of the conservation project
    that is proportionate to the patron's share of the water rights involved in the allocation
    of conserved water and to receive a corresponding share of the conserved water
  - Provides District patrons an opportunity to petition for a vote by all District patrons on this Policy
  - Provides District patrons an opportunity to appeal a proposed District conservation project to the Board for failure to follow this Policy

The purpose of this Policy is to provide District patrons with the information required by OAR 690-018-0025 and to set the procedures by which this Policy will be implemented.

- B. Definitions. The following definitions shall apply in this Policy.
  - 1. "Commission" means the Water Resources Commission.
  - 2. "Conservation" means the reduction of the amount of water diverted to satisfy an existing beneficial use achieved either by improving the technology or method for diverting, transporting, applying or recovering the water or by implementing other approved conservation measures.
  - 3. "Conserved Water" means that amount of water that results from conservation measures, measured as the difference between:

    RECEIVED

MAY 3 0 2017

**OWRD** 

- The smaller of the amount stated on the water right or the maximum amount of water that can be diverted using the existing facilities; and
- b. The amount of water needed after implementation of conservation measures to meet the beneficial use under the water right certificate.
- 4. "District Allocation" means the amount of Conserved Water allocated to the District by the Commission.
- 5. "Funding Patron" means a patron or patrons of the District that funds all or a portion of a water conservation project as provided in paragraph C of this Policy.
- 6. "Funding Partner" means a granting agency including Federal, State or local agencies as well as non-profits that fund a portion of the water conservation project. Examples include but not limited to DRC- Deschutes River Conservancy, OWEB-Oregon Watershed Enhancement Board, NFWF- National Fish and Wildlife Foundation, BOR- Bureau of Reclamation, NRCS- National Resources Conservation Service, USFS United States Forest Service, Soil & Water Conservation Districts, Watershed Councils, PGE, Tribes of Warm Springs, Bonneville Environmental Foundation, Northwest Power Conservation Council, Oregon Water Trust, etc.
- C. Applicability. This Policy applies only to applications for allocations of conserved water filed with the Oregon Water Resources Department by the District after November 5, 2004. This Policy does not apply to applications for allocations of conserved water filed by individuals, including District patrons.
- D. Conservation Projects with Funding Partners. For funding partners, conserved water will be divided into 2 portions. Saved water portion and conserved water application portion. The saved water will be used to firm up supply of the deliveries to existing water rights in the district. The conserved water application portion will be used to secure grant funding from funding partners to pay for the materials needed for the conservation project.

#### For a Funding Partner:

Total project cost \$600,000.00

Total conserved water 1,000 acre feet Funding partners contribution \$300,000.00

Conserved water portion 500 acre feet

(covers 25% in stream required by statute)

District in-kind Contribution \$300,000.00 Saved water portion 500 acre feet

(shared by all patrons)

For funding partners cost per acre ft \$600.00

E. Patrons May Fund Part of Water Conservation Project. Patrons may fund a water conservation project in an amount that is proportionate to the patron's share of the water rights involved in the allocation of Conserved Water. Patrons that provide funding to the District for a water conservation project in advance, or within one year of, the District first making expenditures for the conservation project shall be a Funding Patron and receive the portion of the District Allocation to which Funding Patron is entitled under this Policy. Proportionate costs will include all costs associated not only with the completion of the project, but those costs associated with the planning and design of the project, all accompanying and necessary application and processing fees, including but not limited to legal and consulting fees to secure the Final Order from the Oregon Water Resources Department, and/or to respond to any legal challenges subsequent to receipt of the Final Order until conclusively resolved as determined by the Board of Directors.

#### For a Patron Funding 100% of Project:

Total project costs \$600,000.00

Total conserved water 1,000 acre feet

Minimum in-stream contribution 250 acre feet – 25%

(required by statute)

Net available acre feet to funding patron 750 acre feet

For funding patrons cost per acre ft \$800.00

- F. Allocation of Conserved Water. Except for a Funding Patron, no patron shall be entitled to any of the District Allocation other than the amount necessary to maintain the patron's full delivery rate at its regular turn out(s). A Funding Patron shall be entitled to a portion of the District Allocation equal to the percentage of the funding for the water conservation project paid to the District by the Funding Patron.
- G. Petitions to Vote on Policy. District patrons may petition the Board to hold a vote of all District patrons on the approval of this Policy. The petition must be signed by fifty or more qualified electors within the District pursuant to ORS 545.199(1)(b) to be valid and to cause the District to hold a vote. Upon receiving a valid petition, the District shall hold a vote of all District patrons. The vote shall be whether to approve or reject this Policy. The vote shall be conducted according to the laws and procedures that govern District elections.

- H. Approval of Project by Board. Proposed water conservation projects shall be discussed and approved by the Board at any one of its regularly scheduled Board meetings. The Board shall limit its consideration to whether the proposed water conservation project complies with this Policy. Patrons may comment on the compliance of the proposed water conservation project with the conservation policy during the Board meeting at which it is discussed.
- ١. Appeal of Water Conservation Projects. If the Board approves the proposed water conservation project, any patron in good standing may appeal the Board's decision in writing within two weeks from the date of the Board's decision. The appeal shall include the name, address, and telephone number of the patron appealing the Board's decision, a concise statement of the reasons the patron believes the proposed water conservation project does not comply with this Policy, and a concise statement of how the water conservation project should be modified to comply with this Policy. The Board shall consider a properly filed appeal at its next regularly scheduled meeting. The patron appealing the Board's decision shall have an opportunity to address the Board concerning the patron's appeal. The Board may take any of the following actions: (1) grant the appeal and reject the proposed water conservation project, (2) modify the proposed water conservation project as proposed by the appealing patron to comply with this Policy, (3) direct the District Manager to modify the proposed water conservation project so as to comply with this Policy, or (4) reject the appeal and approve the proposed water conservation project as proposed.
- Policy Review and Updates. The Board shall review and update this Policy at the first regularly scheduled Board meeting following every fifth anniversary of the Board either adopting or reviewing and updating this Policy. The Board may, in its sole discretion, review and update this Policy at any other Board meeting. The Board shall follow the process and provisions of this Policy, as required by OAR 690-018-0025(2), whenever reviewing and updating this Policy.

### THREE SISTERS IRRIGATION DISTRICT BOARD OF DIRECTORS MEETING

MINUTES July 6, 2010

#### E. Review Conserved Water Policy

The District has a Conserved Water Policy and every 5 years the Board is to review the policy. Marc is not looking to make any changes to the policy, we did spend about 6 months writing this policy and feels no changes are needed at this time. Marc will make copies for the audience and we will come back to this at the end of the meeting when everyone has had a chance to review it.

Marc answered questions the audience members had. Don Boyer moved to accept the policy as written with review again in 5 years or sooner. Thayne Dutson seconded the motion. Motion carried unanimously.

### BOARD OF DIRECTORS MEETING MINUTES

**JULY 5, 2016** 

CALL TO ORDER: 4:00 PM BY DON BOYER

ANNOUNCEMENT: The August board meeting will be held on Tuesday, August 2<sup>nd</sup> at 10:00 am.

#### IN ATTENDANCE:

Don Boyer, President; Pattie Apregan, Vice President; Thayne Dutson, Secretary/Treasurer; Marc Thalacker; District Manager; Linda Thompson, Office Administrator

#### **ALSO IN ATTENDANCE:**

#### **BOARD BUSINESS ACTION ITEMS:**

- A Consideration of minutes of previous meeting(s)
  - 1 Regular BOD 06/07/2016

A motion was made to approve the minutes as written.

Motion: Pattie Apregan

Second: Don Boyer

**Vote: Unanimous** 

- **B** Consideration of financial reports
  - 1 Previous month's transaction report

A motion was made to approve the May transaction report.

Motion: Pattie Apregan

Second: Thayne Dutson

Vote: Unanimous

- 2 Checks to be Approved 06/01/2016 to 06/30/2016
  - a BOTC Checking Acct 1110

E-Pay: 1 First Check: 7970

Last Checks: 8022

Void: 7978, 7997, 7998

A motion was made to approve the E-Pays, voids, and checks issued on BOTC account 1110

Motion: Thayne Dutson

Second: Pattie Apregan

Vote: Unanimous

b BOTC McKenzie Canyon 1130

E-Pay: Fir

First Check: 1865

Last Check:

Void: 1864

A motion was made to approve the check issued on BOTC account 1130

Motion: Pattie Apregan

Second: Don Boyer

Vote: Unanimous

c BOTC Main Canal 1140

E-Pay: 1

First Check: 4002

Last Check: 4030

Void: None

A motion was made to approve the voids and checks issued on BOTC account 1140

Motion: Thayne Dutson

Second: Don Boyer

Vote: Unanimous

d BOTC Capital Reserve 1150

E-Pay: 3 First Check: 1061

Last Check: 1062

Void: None

A motion was made to approve the e-pay issued on BOTC account 1150

Motion: Don Boyer

Second: Pattie Apregan

Vote: Unanimous

#### 3 Budget Overview

Operating Budget: Income is on target. Expenses are on budget or under budget. Insurance and Payroll are good. Hydro: We received the incentive payment from the Department of Energy. We are under budget for income but will pick that up next month. Capital Budget: Income is good, expenses are on target.

RECEIVED

C Approve Ameriflex Plan Document This is an employee paid plan. Approval is required for pre-tax deductions. A motion was made to approve the plan as written.

Motion: Pattie Apregan

Second: Don Boyer

**Vote: Unanimous** 

- D Approve Deschutes River Conservancy 2016 Conserved Water Purchase Agreement, Watson McKenzie Main Canal, Phase 8-Item was tabled
- E Approve the Application for Allocation of Conserved Water for Watson McKenzie Main Canal, Phase 8

A motion was made to approve the application for allocation of conserved water, as written.

Motion: Pattie Apregan

Second: Thayne Dutson

Vote: Unanimous

F Approve 580 Water Right Transfer for Roy Runco

A motion was made to approve the water right transfer for Roy Runco.

Motion: Don Boyer

Second: Thayne Dutson

Vote: Unanimous

#### **OLD BUSINESS & MANAGERS REPORT**

- Signing of Documents: BOD signed previous meeting minutes.
- Watson Hydro: The new cooler was installed and has made a huge difference in keeping the hydro cooled. An issue was identified with ORWD water right requirements for multiple facilities. TSID would have to submit a duplicate water right for the 56 cfs that goes through the hydro. Districts, like COID, who plan to have multiple facilities would appear to hold the water rights for over 7,000 cfs. OWRC will be looking in to this discrepancy.
- Net Metering Project: FERC application has been submitted.
- Watson-McKenzie Pipeline: Phase 7 is almost completed, the crew is finishing up with backfilling and clean-up.
- Operational Technology: The transducer has been fixed, during annual maintenance. Now the numbers
  generated by our system match the gauge. DRC is going to support our new gauging station and the
  technology.
- Anadromous Reintroduction & HCP: NEPA starts in December. We are waiting on mediation for the frog issue.
- Operations & Maintenance: Meters are being installed.
- Interns: They have been busy writing the watershed plan and hydro white paper. Amanda will be
  installing ArcGIS on the admin computer so we can have updated accurate maps.
- Committee Reports: None.

#### **NEW BUSINESS:**

LETTERS TO THE BOARD: JOHN BARNETT, CPA This matter will be resolved at a meeting with Mr. Barnett next week. Mr. Barnett will also be advised to discuss this type of information with management before approaching the board.

ADJOURN: 6:05 PM - DON

Zachary Tillman Deschutes River Conservancy 700 NW Hill Street Bend, Oregon 97701

Re: Three Sisters Irrigation District Pipeline

Dear Zachary;

The Oregon Department of Environmental Quality (DEQ) is writing in support of the conserved water application for the Three Sisters Irrigation District (TSID) Main Canal Pipeline Project.

It is DEQ's understanding that the piping project will result in piping of 14,000 feet (2.65 miles) of TSID's Main Canal between Watson Reservoir and McKenzie Reservoir and eliminate 3.0 cfs of seepage losses (Phases 7, 8 & 9). The applicant and agent propose to transfer and permanently protect 3.0 cfs (100%) of the conserved water instream from the point of diversion (RM 23.5) downstream to the mouth of Whychus Creek for the benefit of fish, wildlife, and other aquatic resources. Flows would be protected from April 1 through November 1 during the normal irrigation season and retain a single priority date of 1895. DEQ further understands that adequate monitoring will be in place to ensure the conserved 3.0 cfs remains instream.

Whychus Creek is included on the state's list of impaired water bodies ("303d list") for not meeting state water quality criteria for temperature. Temperature modeling done by DEQ and Watershed Sciences, Inc indicates that reduced stream flows resulting from diversions are responsible for a large portion of the anthropogenic heating that occurs in the creek. Water quality monitoring and analysis done by the Upper Deschutes Watershed Council also supports this; the Watershed Council found a direct relationship between increased stream flow and decreased stream temperature.

DEQ understands that this project will be constructed and finalized in three phases, with the final phase reaching completion by April 1st, 2018

Thank you for the opportunity to provide comments,

Sincerely,

Bonnic Lamb

Re: Three Sisters Irrigation District Main Canal Pipeline

Dear Zachary;

The Oregon Parks and Recreation Department (OPRD) is writing in support of the conserved water application for the Three Sisters Irrigation District (TSID) Main Canal Pipeline Project.

It is OPRD's understanding that the piping project will result in piping of 14,000 feet (2.65 miles) of TSID's Main Canal between Watson Reservoir and McKenzie Reservoir and eliminate 3.0 cfs of seepage losses (Phases 7, 8 & 9). The applicant and agent propose to transfer and permanently protect 3.0 (100%) of the conserved water instream from the point of diversion (RM 23.5) downstream to the mouth of Whychus Creek for the benefit of fish, wildlife, and other aquatic resources. Flows would be protected from April 1 through November 1 during the normal irrigation season and retain a single priority date of 1895. OPRD further understands that adequate monitoring will be in place to ensure the conserved 3.0 cfs remains instream. This instream transfer will result in improved habitat and productivity for redband trout, bull trout, summer steelhead and spring Chinook in Whychus Creek.

OPRD understands that this project will be constructed and finalized in three phases, with the final phase reaching completion by April 1<sup>st</sup>, 2018

Thank you for the opportunity to provide comments,

Sincerely, Limell

**OWRD** 

The purpose of this letter is to support continued efforts to implement conserved water projects in the Whychus Creek subbasin to meet the needs of resident and recently reintroduced anadromous fish. Conserved water projects undertaken by the Deschutes River Conservancy (DRC) and partners have resulted in water rights being transferred or leased for instream use up to the State's instream water right. To maintain adequate habitat for a successful reintroduction effort Oregon Department of Fish and Wildlife (Department) supports additional conserved water projects in excess of the established ISWRs because:

- Flow targets at the time of establishing the instream water rights were based on the needs of resident redband trout and did not account for flows necessary to support reintroduced Mid-Columbia summer steelhead trout and spring Chinook salmon (see details below);
- Transferred or leased water rights have varying priority dates and on paper add up to the State's instream water rights (ISWR). However, because of varying priority dates, water flows at the state's instream water right do not always occur:
- 3. OAR 690-077-0015 (5)(b) allows for flow above the Estimated Average Natural Flow if the basin is a Department flow restoration priority basin ((5)(c). Whychus Creek (appears in the flow restoration figures as Squaw Creek) is ranked as a 3 for high restoration need.

Whychus Creek was historically inhabited by resident redband trout, bull trout, mountain whitefish, several species of sculpin and anadromous runs of Mid-Columbia summer steelhead trout and spring Chinook salmon. Summer steelhead trout are listed as Threatened under the federal Endangered Species Act.

Anadromous stocks of salmon and steelhead trout were extirpated with the construction of the Pelton-Round Butte Hydroelectric complex (dams) at the confluence of the Deschutes, Crooked and Metolius Rivers. As a condition of their new hydroelectric license, Portland General Electric and the Confederated Tribes of the Warm Springs proposed to reintroduce steelhead trout, Chinook salmon and sockeye salmon into their historic habitat above the dams, including Whychus Creek. This effort was initiated with the release of steelhead trout fry into Whychus Creek in 2007. Anadromous fish reintroduction is a collaborative venture among multiple State and Federal agencies, non-governmental organizations and varied central Oregon stakeholders. Success depends upon implementation of comprehensive habitat and flow restoration projects.

The State of Oregon was granted instream water rights for Whychus Creek with a 1991 priority date. ISWR 70753 identifies flow from the mouth upstream to Indian Ford Creek while ISWR 70754 addresses flow from Indian Ford Creek to the South Fork. Instream water rights are junior to many consumptive water rights and until recently, significant reaches of Whychus Creek dried up during the irrigation season. DRC in concert with Three Sisters Irrigation District and private landowners has implemented a comprehensive suite of flow restoration and conserved water projects.

There is a need to implement additional conserved water projects beyond the ISWR flows. Current flow targets established in the Department's Basin Investigation Report were established based on life history requirements of redband trout. Flows required for successful migration, spawning and rearing of steelhead trout and Chinook salmon are significantly higher than the 20 to 50 cubic feet per second identified in IS-70753 and IS-70754. Establishing self-sustaining, harvestable steelhead trout and Chinook salmon runs is a statewide Department priority. The Mid-Columbia Steelhead Trout Recovery Plan identifies successful reintroduction into Whychus Creek as critical to meeting recovery goals for the Deschutes Westside subpopulation and delisting of the species.

#### Details for flow needs for life stages of anadromous species (see Table 1)

- 1) Adult upstream migration. For steelhead (September-January), and for Chinook (May-August), flows need to be higher than IWR for a) physical passage of large fish upstream over riffles and shallow bars, and b) migration cues: relatively high flows to stimulate upstream movement to spawning grounds. The Department recommends flows above the existing IWR, and up to the 50% exceedance natural flows, for September-January and for May-August.
- <u>2) Spawning.</u> Habitat Suitability Criteria (HSC) for Steelhead trout and Chinook salmon spawning indicate that these anadromous fish prefer water about 0.5 ft. deeper and 0.8 ft./sec faster than resident rainbow trout. This would equate to much higher recommended flows for anadromous vs. resident spawning. The Department would therefore recommend flows up to the natural 50% exceedance for February-May and September.
- 3) Outmigration. Outmigrating juvenile steelhead trout (March-June) and Chinook salmon (February-March) will benefit greatly from higher flows to facilitate emigration of juveniles downstream to the mainstem Deschutes. The Department recommends flows <u>up to and beyond</u> the natural 50% exceedance for February-June.

#### Summary

Adult migration and/or spawning occur during all 12 months of the year. The Department supports instream leases beyond the IWR levels, and up to the natural 50% exceedance flows, for the entire year. For the juvenile outmigration months of February-June, The Department supports flows above the natural 50% exceedance flows.

Sincerely,

Brett Hodgson District Fish Biologist

Hart Halgan
