SUBJECT: Water Right Transfer Application T-12526

Please find enclosed the Preliminary Determination indicating that, based on the information available, the Department intends to approve application T-12526. This document is an intermediate step in the approval process; water may not be used legally as proposed in the transfer application until a Final Order has been issued by the Department. Please read this entire letter carefully to determine your responsibility for additional action.

A public notice is being published in the Department's weekly publication,, simultaneously with issuance of the Preliminary Determination. The notice initiates a period in which any person may file either a protest opposing the decision proposed by the Department in the Preliminary Determination or a standing statement supporting the Department's decision. The protest period will end 30 days after the Department's notice.

If no protest is filed, the Department will issue a Final Order consistent with the Preliminary Determination. You should receive a copy of the Final Order about 30 days after the close of the protest period.

If a protest is filed, the application may be referred to a contested case proceeding. A contested case provides an opportunity for the proponents and opponents of the decision proposed in the Preliminary Determination to present information and arguments supporting their position in a quasi-judicial proceeding.

Please do not hesitate to contact me at if I may be of assistance.

Sincerely,

Arla L Heard

Transfer Review Criteria (OAR 690-380-4010)

6. Water has been used within the last five years according to the terms and conditions of the right. There is no information in the record that would demonstrate that the right is subject to forfeiture under ORS 540.610.
7. A pump, pipeline, and sprinkler system sufficient to use the full amount of water allowed under the existing right was present within the five-year period prior to submittal of Transfer Application T-12526.
8. The proposed change would not result in enlargement of the right.
9. The proposed change would not result in injury to other water rights.
10. All other application requirements are met.

Determination and Proposed Action

The change in place of use proposed in Transfer Application T-12526 appears to be consistent with the requirements of ORS 537.705 and 540.505 to 540.580 and OAR 690-380-5000. If protests are not filed pursuant to OAR 690-380-4030, the application will be approved.

If Transfer Application T-12526 is approved, the final order will include the following:

11. *The change in place of use proposed in Transfer Application T-12526 is approved.*
12. *The right to the use of the water is restricted to beneficial use at the place of use described, and is subject to all other conditions and limitations contained in Certificate 44735 and any related decree.*
13. *Water right Certificate 44735 is cancelled. A new certificate will be issued describing that portion of the right not affected by this transfer.*
14. *Water use measurement conditions:*
 - a. *Before water use may begin under this order, the water user shall install a totalizing flow meter, or, with prior approval of the Director, another suitable measuring device at each point of appropriation (new and existing).*
 - b. *The water user shall maintain the meter or measuring device in good working order.*
 - c. *The water user shall allow the Watermaster access to the meter or measuring device; provided however, where the meter or measuring device is located within a private structure, the Watermaster shall request access upon reasonable notice.*
15. *The former place of use of the transferred right shall no longer receive water under the right.*
16. *Full beneficial use of the water shall be made, consistent with the terms of this order, on or before October 1, 2018. A Claim of Beneficial Use prepared by a Certified Water Right Examiner shall be submitted by the applicant to the Department within one year after the deadline for completion of the change and full beneficial use of the water.*

17. After satisfactory proof of beneficial use is received, a new certificate confirming the right transferred will be issued.

Dated at Salem, Oregon this 20 day of July 2017.
