Part 2 of 5 – Temporary Transfer Application Map Checklist

Your temporary transfer application will be returned if any of the map requirements listed below are not met.

Please be sure that the temporary transfer application map you submit includes all the required items and matches the existing water right map. Check all boxes that apply.

\boxtimes	□N/A	If more than three water rights are involved, separate maps are needed for each water right.
\boxtimes		Permanent quality printed with dark ink on good quality paper.
\boxtimes		The size of the map can be $8\frac{1}{2}$ x 11 inches, $8\frac{1}{2}$ x 14 inches, 11 x 17 inches, or up to 30 x 30 inches. For 30 x 30 inch maps, one extra copy is required.
\boxtimes		A north arrow, a legend, and scale.
\boxtimes		The scale of the map must be: $1 \text{ inch} = 400 \text{ feet}$, $1 \text{ inch} = 1,320 \text{ feet}$, the scale of the Final Proof/Claim of Beneficial Use Map (the map used when the permit was certificated), the scale of the county assessor map if the scale is not smaller than $1 \text{ inch} = 1,320 \text{ feet}$, or a scale that has been pre-approved by the Department.
\boxtimes		Township, Range, Section, ¼ ¼, DLC, Government Lot, and other recognized public land survey lines.
\boxtimes		Tax lot boundaries (property lines) are required. Tax lot numbers are recommended.
\boxtimes		Major physical features including rivers and creeks showing direction of flow, lakes and reservoirs, roads, and railroads.
\boxtimes		Major water delivery system features from the point(s) of diversion/appropriation such as main pipelines, canals, and ditches.
		Existing place of use that includes separate hachuring for each water right, priority date, and use including number of acres in each quarter-quarter section, government lot, or in each quarter-quarter section as projected within government lots, donation land claims, or other recognized public land survey subdivisions. If less than the entirety of the water right is being changed, a separate hachuring is needed for lands left unchanged.
\boxtimes	□N/A	Proposed temporary place of use that includes separate hachuring for each water right, priority date, and use including number of acres in each quarter-quarter section, government lot, or in each quarter-quarter section as projected within government lots, donation land claims, or other recognized public land survey subdivisions.
		Existing point(s) of diversion or well(s) with distance and bearing or coordinates from a recognized survey corner. This information can be found in your water right certificate or permit.
	⊠N/A	If you are proposing a change in point(s) of diversion or well(s) to convey water to the new temporary place of use, show the proposed location and label it clearly with distance and bearing or coordinates. If GPS coordinates are used, latitude-longitude coordinates may be expressed as either degrees-minutes-seconds with at least one digit after the decimal (example – 42°32'15.5") or degrees-decimal with five or more digits after the decimal (example – 42.53764°).

	FEE WORKSHEET for TEMPORARY DROUGHT TRANSFERS		
1	Base Fee (includes drought application and recording fee for up to 1 cfs)	1	\$200.00
1	Enter the cfs for the portions of the rights to be transferred (see example below*):		
	(2a)		
	Subtract 1.0 from the number in 2a above:(2b)		
	If 2b is 0, enter 0 on line 2 » » » » » » » » » » » » » » » »		
	If 2b is greater than 0, round up to the nearest whole number: (2c) and		
2	multiply 2c by \$50, then enter on line 2 » » » » » » » » »	2	NA
3	Add entries on lines 1 through 2 above » » » » » » » Transfer Fee::	3	NA

^{*}Example for Line 2a calculation to transfer 45.0 acres of Primary Certificate 12345 (total 1.25 cfs for 100 acres) and 45.0 acres of Supplemental Certificate 87654 (1/80 cfs per acre) on the same land:

^{1.} Divide total authorized cfs by total acres in the water right (for C12345, 1.25 cfs \div 100 ac); then multiply by the number of acres to be transferred to get the transfer cfs (x 45 ac = 0.56 cfs).

^{2.} If the water right certificate does not list total cfs, but identifies the allowable use as 1/40 or 1/80 of a cfs per acre; multiply number of acres proposed for change by either 0.025 (1/40) or 0.0125 (1/80). (For C87654, 45.0 ac x 0.0125 cfs/ac = 0.56 cfs)

^{3.} Add cfs for the portions of water rights on all the land included in the transfer; however do not count cfs for supplemental rights on acreage for which you have already calculated the cfs fee for the primary right on the same land. The fee should be assessed only once for each "on the ground" acre included in the transfer. (In this example, blank 2a would be only 0.56 cfs, since both rights serve the same 45.0 acres. Blank 2b would be 0 and Line 2 would then also become CEIVED

E 1 :	hot wou r	ronose to accom	nlish with this transf	er application; and why:

Explain in your own words what you propose to accomplish with this transfer application; and why: Metro proposes to restore the area in and around a reservoir authorized by Certificate 43714, which is expected to affect irrigation rights under Certificate 43715. The temporary transfer is intended to provide replacement sources of irrigation on our property for the restoration activities and for farm fields on a leased portion of the authorized lands. The rights under Certificates 43714 and 43715 may be sold or transferred to instream use in the future, recognizing the right could be subject to forfeiture after 5 years of non-use.

The transfer involves three rights under Certificates 16900, 22091 and 43715. A separate transfer application map is provided for Certificate 43715 to make the intent of the transfer more apparent, given the primary and supplemental irrigation authorized in that water right.

If you need additional space, continue on a separate piece of paper and attach to the application as "Attachment 1".

	Check this box if this project is fully Reinvestment Act. (Federal stimulus	or partially funded by the American Red dollars)	covery and

Part 5 of 5 - Water Right Information

Please use a separate Part 5 for each water right being changed. See instructions on page 6, to copy and paste additional Part 5s, or to add additional rows to tables within the form.

Certificate 16900

Description of Water Delivery System

System capacity: <u>0.95</u> cubic feet per second (cfs) **OR** gallons per minute (gpm)

Describe the current water delivery system or the system that was in place at some time within the last five years. Include information on the pumps, canals, pipelines, and sprinklers used to divert, convey, and apply the water at the authorized place of use. Water is diverted from the River POD using a 40-hp centrifugal pump with an intake seasonally installed in the river. The water is conveyed to the places of use using up to 2,500 feet of 6-inch-diameter mainline and approximately 1,300 feet of 4½-inch-diameter hose connected to a big gun. The big gun, which does not have a booster pump, is reported to have a 1.2-inch taper bore nozzle.

The lift from the river to the pump and from the pump to the lowest place of use are each reported to be approximately 8 feet. The system operating pressure is assumed to be 100 psi.

The Department's online pump calculator for CWREs indicates the pump capacity would be 0.98 cfs (approximately 440 gpm). A Nelson table indicates a 1.2-inch 150 taper bore nozzle can deliver 425 gpm (approximately 0.95 cfs) at 100 gpm.

Table 1. Location of Authorized and Proposed Point(s) of Diversion (POD) or Appropriation (POA)

(Note: If the POD/POA name is not specified on the certificate, assign it a name or number here.)

POD/POA Name or Number	Is this POD/POA Authorized on the Certificate or is it Proposed?	If POA, OWRD Well Log ID# (or Well ID Tag # L)	Т	wp	F	lng	Sec	1/4	1/4	Tax Lot, DLC or Gov't Lot	Measured Distances (from a recognized survey corner)

System capacity: 0.95 cubic feet per second (cfs) OR

____ gallons per minute (gpm)

Describe the current water delivery system or the system that was in place at some time within the last five years. Include information on the pumps, canals, pipelines, and sprinklers used to divert, convey, and apply the water at the authorized place of use. **See the description for Certificate 16900.**

For Place of Use Changes	
Are there other water right certificates, water use permits or ground water registrations associate with the "from" or the "to" lands? \boxtimes Yes \square No	ed
If YES, list the certificate, water use permit, or ground water registration numbers: 43715	
Pursuant to ORS 540.525, any "layered" water use such as an irrigation right that is supplement to a primary right proposed for temporary transfer can be included in the transfer or remain unused on the authorized place of use. If the primary water right does not revert soon enough to allow use of the supplemental right within five years, the supplemental right shall become subject to cancellation for nonuse under ORS 540-610.	0
For a change in point(s) of appropriation (well(s)) or additional point(s) of appropriation is necessary to convey the water to the new temporary place of use:	
Well log(s) are attached for each authorized and proposed well(s) that are clearly labeled associated with the corresponding well(s) in Table 1 above and on the accompanying application map. (Tip : You may search for well logs on the Department's web page at: http://apps.wrd.state.or.us/apps/gw/well_log/Default.aspx)	and
AND/OR	
Describe the construction of the authorized and proposed well(s) in Table 3 for any wells that do not have a well log. For <i>proposed wells not yet constructed or built</i> , provide "a be estimate" for each requested information element in the table. The Department recomme you consult a licensed well driller, geologist, or certified water right examiner to assist wassembling the information necessary to complete Table 3.	nds
le 3. Construction of Point(s) of Appropriation well(s) in this listing must be clearly tied to corresponding well(s) described in Table 1 and show the accompanying application map. Failure to provide the information will delay the processing of transfer application until it is received. The information is necessary for the department to assess the the proposed well(s) will access the same source aquifer as the authorized point(s) of	SS

Tab Any on th your whe appropriation (POA). The Department is prohibited by law from approving POA changes that do not access the same source aquifer.

Certificate 43715

Description of Water Delivery System

System capacity: <u>0.95</u> cubic feet per second (cfs) **OR** gallons per minute (gpm)

Describe the current water delivery system or the system that was in place at some time within the last five years. Include information on the pumps, canals, pipelines, and sprinklers used to divert, convey, and apply the water at the authorized place of use. See the description for Certificate 16900, except the lift from the reservoir to the pump and from the pump to the lowest place of use are reported to each be approximately 6 feet. The difference of 2 less feet of lift would slightly increase the pump capacity to 0.99 cfs

Additional remarks: We prepared a separate map for Certificate 43715 to clarify the intent of the transfer.

Metro will permanently cancel 0.3 acres of Certificate 43715 supplemental water rights in the NW NW of Section 30, T1S, R3W, WM. The 0.3 acres are being canceled because there are only 4.0 acres of primary rights in this quarter-quarter section under Certificate 22091 while Certificate 43715 shows 4.3 acres of supplemental rights in this same quarter-quarter section. A cancellation form is being filed with this transfer application.

RECEIVED

For Place of Use Changes

Are there other water right certificates, water use permits or ground water registrations associated with the "from" or the "to" lands? $\boxtimes Yes \ \square$ No

If YES, list the certificate, water use permit, or ground water registration numbers: Certificates 16900 and 27473

Pursuant to ORS 540.525, any "layered" water use such as an irrigation right that is supplemental to a primary right proposed for temporary transfer can be included in the transfer or remain unused on the authorized place of use. If the primary water right does not revert soon enough to allow use of the supplemental right within five years, the supplemental right shall become subject to cancellation for nonuse under ORS 540-610.

For a change in point(s) of appropriation (well(s)) or additional point(s) of appropriation if necessary to convey the water to the new temporary place of use:

Well log(s) are attached for each authorized and proposed well(s) that are clearly labeled and
associated with the corresponding well(s) in Table 1 above and on the accompanying
application map. (Tip : You may search for well logs on the Department's web page at:
application into, (The resolvent) log/Default asny)
http://apps.wrd.state.or.us/apps/gw/well_log/Default.aspx)

AND/OR

Describe the construction of the authorized and proposed well(s) in Table 3 for any wells that do not have a well log. For proposed wells not yet constructed or built, provide "a best estimate" for each requested information element in the table. The Department recommends you consult a licensed well driller, geologist, or certified water right examiner to assist with assembling the information necessary to complete Table 3.

Table 3. Construction of Point(s) of Appropriation

Any well(s) in this listing must be clearly tied to corresponding well(s) described in Table 1 and shown on the accompanying application map. Failure to provide the information will delay the processing of your transfer application until it is received. The information is necessary for the department to assess whether the proposed well(s) will access the same source aquifer as the authorized point(s) of appropriation (POA). The Department is prohibited by law from approving POA changes that do not access the same source aquifer.

Proposed or Authorized POA Name or Number	Is well already built? (Yes or No)	If an existing well, OWRD Well ID Tag No. L	Total well depth	Casing Diameter	Casing Intervals (feet)	Seal depth(s) (intervals)	Perforated or screened intervals (in feet)	Static water level of complete d well (in feet)	Source aquifer (sand, gravel, basalt, etc.)	Well - specific rate (cfs or gpm).
