

STATE OF OREGON
COUNTY OF CROOK
PERMIT TO APPROPRIATE THE PUBLIC WATERS

THIS PERMIT IS HEREBY ISSUED TO

STEVEN PETE SCHELL
7401 SE PATRIOT LANE
PRINEVILLE, OR 97754

This permit is issued to describe a Split a Permit, approved by Special Order Volume _____, Page _____, entered on _____; and to describe an extension of time for complete application of water approved on September 5, 2014, and an assignment of Permit G-13426 approved December 14, 2017. This permit, together with Permit G-xxxxx and Permit G-xxxxx, supersedes Permit G-13426.

The specific limits and conditions of the use are listed below.

APPLICATION FILE NUMBER: G-14594

SOURCE OF WATER: ONE WELL IN DRY CREEK BASIN

PURPOSE OR USE: IRRIGATION OF 4.7 ACRES

MAXIMUM RATE: 0.059 CUBIC FOOT PER SECOND, provided the total quantity diverted in combination with any other right perfected for Well 1 under Permit G-13426 shall not exceed 0.223 cfs

PERIOD OF USE: MARCH 1 THROUGH OCTOBER 31

DATE OF PRIORITY: AUGUST 11, 1997

POINT OF DIVERSION LOCATION

Twp	Rng	Mer	Sec	Q-Q	Measured Distances
16 S	16 E	WM	12	SW SE	WELL 1 - 600 FEET NORTH AND 2160 FEET WEST FROM THE SE CORNER OF SECTION 12
16 S	16 E	WM	12	SW SE	WELL 2 - 110 FEET NORTH AND 1760 FEET WEST FROM THE SE CORNER OF SECTION 12

The amount of water used for irrigation under this right, together with the amount secured under any other right existing for the same lands, is limited to a diversion of ONE-EIGHTIETH of one cubic foot per second (or its equivalent) and 3.0 acre-feet for each acre irrigated during the irrigation season of each year.

THE PLACE OF USE IS LOCATED AS FOLLOWS:

Twp	Rng	Mer	Sec	Q-Q	Acres
16 S	16 E	WM	12	SW SE	4.7

Measurement, recording and reporting conditions:

- A. Before water use may begin under this permit, the permittee shall install a meter or other suitable measuring device as approved by the Director. The permittee shall maintain the meter or measuring device in good working order.
- B. The permittee shall allow the watermaster access to the meter or measuring device; provided however, where the meter or measuring device is located within a private structure, the watermaster shall request access upon reasonable notice.
- C. The Director may require the permittee to keep and maintain a record of the amount (volume) of water used and may require the permittee to report water use on a periodic schedule as established by the Director. In addition, the Director may require the permittee to report general water use information, the periods of water use and the place and nature of use of water under the permit. The Director may provide an opportunity for the permittee to submit alternative reporting procedures for review and approval.

If substantial interference with a senior water right occurs due to withdrawal of water from any well listed on this permit, then use of water from the well(s) shall be discontinued or reduced and/or the schedule of withdrawal shall be regulated until or unless the Department approves or implements an alternative administrative action to mitigate the interference. The Department encourages junior and senior appropriators to jointly develop plans to mitigate interferences.

Use of water under authority of this permit may be regulated if analysis of data available after the permit is issued discloses that the appropriation will measurably reduce the surface water flows necessary to maintain the free-flowing character of a scenic waterway in quantities necessary for recreation, fish and wildlife in effect as of the priority date of the right or as those quantities may be subsequently reduced.

STANDARD CONDITIONS

The wells shall be constructed in accordance with the General Standards for the Construction and Maintenance of Water Wells in Oregon. The works shall be equipped with a usable access port,

and may also include an air line and pressure gauge adequate to determine water level elevation in the well at all times.

The use shall conform to such reasonable rotation system as may be ordered by the proper state officer.

Prior to receiving a certificate of water right, the permit holder shall submit the results of a pump test meeting the department's standards, to the Water Resources Department. The Director may require water level or pump test results every ten years thereafter.

Failure to comply with any of the provisions of this permit may result in action including, but not limited to, restrictions on the use, civil penalties, or cancellation of the permit.

This permit is for the beneficial use of water without waste. The water user is advised that new regulations may require the use of best practical technologies or conservation practices to achieve this end.

By law, the land use associated with this water use must be in compliance with statewide land-use goals and any local acknowledged land-use plan.

The use of water shall be limited when it interferes with any prior surface or ground water rights.

The Director finds that the proposed use(s) of water described by this permit, as conditioned, will not impair or be detrimental to the public interest.

Actual construction of the well was to begin by April 30, 1999. Complete application of the water to the use was to be made on or before October 1, 2002. By Extension of Time Final Order dated September 5, 2014, the deadline for applying water to full beneficial use within the terms and conditions of the permit was extended to October 1, 2018. Within one year after complete application of water to the proposed use, the permittee shall submit a claim of beneficial use, which includes a map and report, prepared by a Certified Water Rights Examiner (CWRE).
