## Part 3 of 6 – Fee Worksheet

FEE WORKSHEET for INSTREAM TRANSFER			
1	Base Fee (includes Place of Use and Character of Use to Instream changes to one water right for up to 1 cfs)	1	\$2,090
	Number of water rights included in transfer <u>9 (2a)</u> Subtract 1 from the number in 2a above: <u>8 (2b)</u> <i>If only one water right, this will be 0</i>		
2	Multiply line 2b by \$520 and enter » » » » » » » » » » » » » » » »	2	4160
	Enter the cfs for the portions of the rights to be transferred (see example below*): <u>21.82 (3a)</u> Subtract 1.0 from the number in 3a above: <u>20.82 (3b)</u> If 3b is 0, enter 0 on line 3 » » » » » » » » » » » » » » » » If 3b is greater than 0, round up to the nearest whole number: <u>21 (3c)</u> and multiply 3c by \$350, then enter on line 3 » » » » » » » » » »		
3		3	7350
4	Add entries on lines 1 through 3 above » » » » » » » » » » Subtotal:	4	13600
5	Multiply line 4 by 0.5 and enter on line 5 » » » » » » » » » » » » » » » »	5	6800
6	Subtract line 5 from line 4 » » » » » » » » » » » » » » » » <b>Transfer Fee:</b>	6	<b>\$6800</b>

\*Example for Line 3a calculation to transfer 45.0 acres of Primary Certificate 12345 (total 1.25 cfs for 100 acres) and 45.0 acres of Supplemental Certificate 87654 (1/80 cfs per acre) on the same land:

1. For irrigation calculate cfs for each water right involved as follows:
  - a. Divide total authorized cfs by total acres in the water right (*for C12345, 1.25 cfs ÷ 100 ac*); then multiply by the number of acres to be transferred to get the transfer cfs (*x 45 ac = 0.56 cfs*).
  - b. If the water right certificate does not list total cfs, but identifies the allowable use as 1/40 or 1/80 of a cfs per acre; multiply number of acres proposed for change by either 0.025 (1/40) or 0.0125 (1/80). (*For C87654, 45.0 ac x 0.0125 cfs/ac = 0.56 cfs*)
2. Add cfs for the portions of water rights on all the land included in the transfer; however **do not count cfs for supplemental rights on acreage for which you have already calculated the cfs fee for the primary right on the same land**. The fee should be assessed only once for each “on the ground” acre included in the transfer. (*In this example, blank 3a would be only 0.56 cfs, since both rights serve the same 45.0 acres. Blank 3b would be 0 and Line 3 would then also become 0.*)

Are there any existing instream water rights on the same point or within the same requested reach(es) or lake, or on a portion thereof?

No  Yes (identify other instream water rights): Certs: 89515, 89517, 89519, 89521, 92204, KA544, KA545, KA552, KA553.

Note: New instream water rights are generally (but not always) additive to instream water rights established under ORS 537.348 (instream transfer application process) and ORS 537.470 (allocation of conserved water) and replace a portion of instream water rights established under ORS 537.341 (state agency application process) or ORS 537.346 (conversion of minimum perennial streamflows) with an earlier priority date.

Is your intent to have the proposed instream water right transfer be additive to any instream water right established under ORS 537.348 and ORS 537.470 and replace a portion of any instream water right established under ORS 537.341 and ORS 537.346 with an earlier priority date?

Yes  No. If no, please explain your intent below:

\_\_\_\_\_.

If the proposed conversion would add to the amounts of an existing instream water right(s) established under ORS 537.341 or 537.346, provide documentation demonstrating why additional instream flows are necessary. Supporting documentation should include information from the Oregon Dept. of Fish and Wildlife (ODFW) (fish life), Dept. of Environmental Quality (DEQ) (pollution abatement), and/or Parks and Recreation Dept. (recreation).

**Is the requested instream flow intended to exceed the estimated average natural flow or level occurring from the drainage system?**

- No; **OR**
- Yes (Provide supporting documentation that demonstrates why additional flows are significant for the public use requested.); **OR**
- Yes, and it is presumed that flows that exceed the estimated average natural flow or natural lake levels are significant because:
- The requested flow does not exceed the maximum amount of any instream water right application applied for under ORS 537.341 (state agency instream water right application process) for the same reach or portion thereof, and the requested public use is for the same public use as the afore mentioned instream water right application, **and**
  - For the specified time period that flows are requested to exceed the estimated average natural flow or lake level, the stream is in an ODFW flow restoration priority watershed. A copy of the priority watershed map indicating the specific watershed involved should be included with the application. Priority watershed maps may be found on the OWRD web page; **or**
  - The stream is listed as water quality limited and DEQ has provided scientific information that demonstrates that increased flows would improve water quality. The scientific information provided by DEQ should be included with the transfer application.

**For a Time Limited Instream Transfer, please answer the following:**

- The time-limited instream transfer is for a specific number of years:  
\_\_\_\_\_ Begin Year to \_\_\_\_\_ End Year
- Time-limited instream transfer is to terminate based upon other conditions:  
Conditions: \_\_\_\_\_.
