## **Watermaster Review Form:** Water Right Transfer

Transfer Application: T-12955	Review Due Date	»:			
Applicant Name: <u>City of Chiloquin</u>					
Proposed Changes: POU POD	⊠ POA ☐ USE	☐ OTHER			
Reviewer(s): <u>Dani Watson</u>	Date of Review:	6/25/2018			
1. Do you have <u>evidence</u> that the right has not be presumption of forfeiture would not likely be revidence (e.g. dated aerial photo showing pave	rebuttable? 🗌 Yes 🛮 🖾 N	Io If "yes", attach			
Is there a history of regulation on the source that serves this (or these) right(s) that has involved the transferred right(s) and downstream water rights? $\boxtimes$ Yes $\square$ No Generally characterize the frequency of any regulation or explain why regulation has not occurred: 2018, the existing POA was regulated based on a call from a Senior water right holder.					
3. Have headgate notices been issued for the sour ☐ Yes ☒ No ☐ Records not available.	rce that serves the transferr	red right(s)?			
In your estimation, after the proposed change would distribution of water for the right(s) result in regulation of other water rights that would not have occurred if use under the original right(s) was/were maximized?  Yes No If "Yes", explain:					
5. In your estimation, if the proposed change is a would be affected? Yes No If "Yes and list the rights most affected:					
Check here $\square$ if it appears that downstream water rights benefit from return flows resulting from the current use of the transferred right(s)? If you check the box, generally characterize the locations where the return flows likely occur and list the water rights that benefit most: $\_\_$ . $\square N/A$					
7. For POD changes and instream transfers, chec the old and new PODs or within the proposed describe and, if possible, estimate the losses:	· · · · · · · · · · · · · · · · · · ·				
8. <u>For instream transfers</u> that propose protection stream: N/A Would the quantity be measu with OAR 690-077-0015(8)? Yes No	areable into the receiving s				
9. <u>For POU changes</u> : N/A Is it likely the original water from the same source? Yes No	ginal place of use would co If "Yes", explain:	ontinue to receive			

10.	For POU or USE changes: N/A In your best judgment, would use of the existing right at "full face value," result in the diversion of more water than can be used beneficially and without waste? Yes No If "Yes", explain:
11.	Are there other issues not identified through the above questions that should be considered in determining whether the change "can be effected without injury to other rights"?  Yes No If "Yes", explain:
12.	What alternatives may be available for addressing any issues identified above:
13.	Do conditions need to be included in the transfer order to avoid enlargement of the right or injury to other rights?   No   Yes, as checked below:
	☐ A Headgate should be required prior to diverting water.
	Measurement Devices for POD or POA: (if this condition is selected, also fill in the top sections of page 3)
	a. <b>Before water use may begin</b> under this order, the water user shall install a totalizing flow meter*, or, with prior approval of the Director, another suitable measuring device, at each point of diversion/appropriation (new and existing) or at each new point of diversion/appropriation.
	b. The water user shall maintain the meters or measuring devices in good working order.
	c. The water user shall allow the Watermaster access to the meters or measuring devices; provided however, where the meters or measuring devices are located within a private structure, the Watermaster shall request access upon reasonable notice.
	Reservoir water use measurement: (if this condition is selected, also fill in the top sections of page 3)
	<ul> <li>a. Before water use may begin under this order, the water user shall install staff gages*, or, with prior approval of the Director, other suitable measuring devices, that measure the entire range and stage between empty and full in each reservoir. Staff gages shall be United States Geological Survey style.</li> <li>b. Before water use may begin under this order, if the reservoir is located in channel, weirs or other suitable measuring devices must be installed upstream and downstream of the reservoir, and, an adjustable outlet valve must be installed. The water user shall maintain such devices in good working order. A written waiver may be obtained, if in the judgment of the Director, the installation of weirs or other suitable measuring devices, or the adjustable outlet valve, will provide no public benefit.</li> </ul>
	* The following alternative device(s) should be substituted for the bold, underlined
	device in the above selected condition:
	☐ Weir ☐ Submerged Orifice
	☐ Parshall Flume ☐ Flow Restrictor
	Other:
