OWRD

Include information on the pumps, canals, pipelines, and sprinklers used to divert, convey, and apply the water at the authorized place of use. **There are four pumps at the point of diversion: two 200 HP pumps on the barge, and two 200 HP pumps on the bank. The pumps have 15 inch suctions and 10 inch discharges. The water is conveyed from the pump station to the paper mill water pond via 6,000 feet of 30-inch concrete underground pipe. Water from the pond is diverted to various locations on the mill site.
