Part 2 of 5 – Transfer Application Map Checklist

Your transfer application will be returned if any of the map requirements listed below are not met.

Please be sure that the transfer application map you submit includes all the required items and matches the existing water right map. Check all boxes that apply.

- N/A If **more than three** water rights are involved, separate maps are needed for each water right.
- Permanent quality printed with dark ink on good quality paper.
- The size of the map can be 8½ x 11 inches, 8½ x 14 inches, 11 x 17 inches, or up to 30 x 30 inches. For 30 x 30 inch maps, one extra copy is required.
- A north arrow, a legend, and scale.
- The scale of the map must be: 1 inch = 400 feet, 1 inch = 1,320 feet, the scale of the Final Proof/Claim of Beneficial Use Map (the map used when the permit was certificated), the scale of the county assessor map if the scale is not smaller than 1 inch = 1,320 feet, or a scale that has been pre-approved by the Department.

- Major water delivery system features from the point(s) of diversion/appropriation such as main pipelines, canals, and ditches.
- Existing place of use that includes separate hachuring for each water right, priority date, and use including number of acres in each quarter-quarter section, government lot, or in each quarter-quarter section as projected within government lots, donation land claims, or other recognized public land survey subdivisions. If less than the entirety of the water right is being changed, a separate hachuring is needed for lands left unchanged.
- N/A Proposed place of use that includes separate hachuring for each water right, priority date, and use including number of acres in each quarter-quarter section, government lot, or in each quarter-quarter section as projected within government lots, donation land claims, or other recognized public land survey subdivisions.

***Example for Line 5a calculation** to transfer 45.0 acres of Primary Certificate 12345 (total 1.25 cfs for 100 acres) and 45.0 acres of Supplemental Certificate 87654 (1/80 cfs per acre) on the same land:

- For irrigation calculate cfs for each water right involved as follows:
 - Divide total authorized cfs by total acres in the water right (for C12345, $1.25 \text{ cfs} \div 100 \text{ ac}$); then multiply by the number of acres to be transferred to get the transfer cfs ($\times 45 \text{ ac} = 0.56 \text{ cfs}$).
 - If the water right certificate does not list total cfs, but identifies the allowable use as 1/40 or 1/80 of a cfs per acre; multiply number of acres proposed for change by either 0.025 (1/40) or 0.0125 (1/80). (For C87654, $45.0 \text{ ac} \times 0.0125 \text{ cfs/ac} = 0.56 \text{ cfs}$)
- Add cfs for the portions of water rights on all the land included in the transfer; however **do not count cfs for supplemental rights on acreage for which you have already calculated the cfs fee for the primary right on the same land**. The fee should be assessed only once for each "on the ground" acre included in the transfer. (In this example, blank 5a would be only 0.56 cfs, since both rights serve the same 45.0 acres. Blank 5b would be 0 and Line 5 would then also become 0).

Explain in your own words what you propose to accomplish with this transfer application, and why:
All new pumps in Well 2 (CLAC 8666) have been damaged by sand. We were recommended not to use the well for irrigation because the casing was old and could fail at the irrigation volumes we operate at. Also the well was not constructed properly to prevent entry of sand.

If you need additional space, continue on a separate piece of paper and attach to the application as "Attachment 1".

For a change in point(s) of appropriation (well(s)) or additional point(s) of appropriation:

Well log(s) are attached for each authorized and proposed well(s) that are clearly labeled and associated with the corresponding well(s) in Table 1 above and on the accompanying application map.

Tip: You may search for well logs on the Department’s web page at:

http://apps.wrd.state.or.us/apps/gw/well_log/Default.aspx

AND/OR

Describe the construction of the authorized and proposed well(s) in Table 3 for any wells that do not have a well log. For *proposed wells not yet constructed or built*, provide “a best estimate” for each requested information element in the table. The Department recommends you consult a licensed well driller, geologist, or certified water right examiner to assist with assembling the information necessary to complete Table 3.

Table 3. Construction of Point(s) of Appropriation

Any well(s) in this listing must be clearly tied to corresponding well(s) described in Table 1 and shown on the accompanying application map. Failure to provide the information will delay the processing of your transfer application until it is received. The information is necessary for the department to assess whether the proposed well(s) will access the same source aquifer as the authorized point(s) of appropriation (POA). The Department is prohibited by law from approving POA changes that do not access the same source aquifer.

In the Matter of Transfer Application) ORDER REVERTING POINT OF
T-12073, Clackamas County, Oregon) APPROPRIATION

Authority

Oregon Administrative Rule (OAR) 690-380-6010(6) provides that a point of diversion or appropriation shall revert to the last authorized point of diversion or appropriation if the changes authorized under a transfer are not completed.

Applicant

MAYFIELD FARM LLC
9955 SW POTANO ST
TUALATIN OR 97062

Findings of Fact

1. On June 5, 2015, MAYFIELD FARM LLC filed an application to change the point of appropriation under Certificate 43439. The Department assigned the application number T-12073.
2. On March 23, 2015, the Water Resources Department issued an order approving the proposed change in point of appropriation T-12073. The order was recorded in the Special Order Volume 98, Page 447.
3. On September 15, 2016, Chris Eggert for Mayfield Farms LLC and Doann Hamilton, agent for Mayfield Farms LLC, notified the Department that the change authorized under T-12073 will not be completed and requested that the authorized point of appropriation revert back to the original point of appropriation.

Conclusion of Law

The reversion of the point of appropriation approved by Transfer Application T-12073 to the point of appropriation authorized under the water right prior to Transfer Application T-12073, is consistent with the requirements of OAR 690-380-6010(6). A superseding certificate for the right affected by the transfer shall be issued.

This is a final order in other than contested case. This order is subject to judicial review under ORS 183.484. Any petition for judicial review must be filed within the 60 day time period specified by ORS 183.484(2). Pursuant to ORS 536.075 and OAR 137-004-0080 you may either petition for judicial review or petition the Director for reconsideration of this order. A petition for reconsideration may be granted or denied by the Director, and if no action is taken within 60 days following the date the petition was filed, the petition shall be deemed denied.

Now, therefore, it is ORDERED:

1. The point of appropriation authorized under Transfer Application T-12073 for the right described by Certificate 43439 is reverted to the point of appropriation authorized under the water right prior to the transfer.
2. A superseding certificate shall be issued to describe the water right reverted.
