

TUMALO IRRIGATION DISTRICT

November 21, 2018

Oregon Water Resources Department
Field Services Division
725 Summer Street NE, Suite A
Salem, OR 97301-1266

RE: CW-37 and Tumalo Feed Canal Phase V A&B (2018)

Tumalo Irrigation District is requesting that OWRD issue a partial finalization order placing 1.42 cfs of conserved water into Tumalo Creek and 383.1 acre-ft in Crescent Lake. This conserved water is pursuant to the final order dated December 9, 2005 and recorded in Special Order Vol. 67 commencing at page 509.

This conserved water comes from the completion of Phase V (2018) of the Tumalo Feed Canal Piping Project. Construction of the two phases of pipeline was completed in the spring of 2018 and was successfully operated in the 2018 irrigation season.

The District delivers the water to landowners pursuant to water right Certificates nos. 74146 and 74148 issued by the State of Oregon (the "water rights"). The District has approved piping the un-piped section of the Tumalo Feed Canal for approximately six miles (32,617 feet) to the terminus point at Tumalo Reservoir (the "Project"). The Project will be constructed in multiple phases.

Phase V A&B of the Project consists of piping the Tumalo Feed Canal from the end of Phase IV, and then a distance of approximately 4890 feet. It is anticipated that subsequent phases of the Project will be piped in the 2018 through 2020 storage season as funding has been secured.

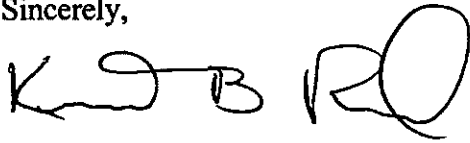

The conserved water application that TID has submitted estimates the amount of water lost throughout the entire (nearly 6 mile) Tumalo Feed Canal Project. Due to funding constraints, TID is approaching the project in Phases. In order to secure funding, TID is requesting to finalize conserved water for each Phase.

- Phase I conserved 2.00 cfs in Tumalo Creek and 89.25 acre-ft in Crescent Lake (refer to OWRD CW-37 Special Order Volume 75, pages 202-206),
- Phase II conserved 0.82 CFS in Tumalo Creek and 222.41 acre-ft in Crescent Lake (refer to OWRD CW-37 Special Order Volume 87 Page 99-104) and
- Phase III conserved 1.23 cfs of conserved water into Tumalo Creek and 331.52 acre-ft in Crescent Lake. (refer to OWRD CW-37 Special Order Volume 91 Page 535)
- Phase IV conserved 1.03 cfs in Tumalo Creek and 276.9 acre-ft in Crescent Lake (refer to OWRD CW-37 Special Order Volume 103, page 15 and certificates 91922 and 91923),

TID funded over 11% of Phase V and is currently looking for additional project funding source(s) to reimburse this portion of the project. As a result, 89% of the pro-rated water conserved by Phase IV will be protected in-stream at this time. It is the intent of TID to protect the remaining conserved water from Phase IV as additional public funding becomes available.

At this time, Tumalo would like to finalize Phase V (2018) of CW-37 and conserve 1.42 cfs of conserved water into Tumalo Creek and 383.10 acre-ft in Crescent Lake.

Sincerely,

Handwritten signature of Kenneth B Rieck, consisting of the letters 'K', 'B', and 'R' in a stylized, cursive script.

Hi Teri,

This is what I received from Tumalo ID. I had assumed that you received this as they indicated a hard copy was being sent. My apologies if this caused any delays.

Thank you,

Becky

Subject: Partial Finalization

Hi Becky,

Attached is a copy of our request for a partial finalization order. I will mail the original today.

Let me know if you have any questions.

Thank you,

April
