RE: Permit Amendment File T-13026  
Application File G-13238  
City of Prineville - Permit G-12541  
**Permit Amendment Application Modification**

Dear Joan,

The City of Prineville (City) submitted a permit amendment application on September 13, 2018 to add three points of appropriation to and change the place of use for Permit G-12541. The Oregon Water Resources Department (OWRD) assigned transfer # T-13026 to the City's application.

The City would like to modify the application by updating the location of the proposed industrial park well and add an additional point of appropriation, the New Ochoco Heights Well. The Industrial Park Well was recently constructed at a slightly different location than initially proposed. The tax lot of the proposed Industrial Park Well has not changed. The City also recently determined the location of the planned New Ochoco Heights Well and would like to add the well as a proposed point of appropriation to G-12541.

Additionally, page 8 of the application has been updated to include the New Ochoco Heights Well in Table 2.

Please find attached to this letter the revised pages of the application that include the requested modifications (the revised portions of the pages are highlighted in yellow). Please swap out these new pages for those in the original application. In addition, I have included updated permit amendment maps (Attachment A) with the updated location description of the Industrial Park Well and Ochoco Heights Well.

If you have any questions about the enclosed materials, please contact me at 541-257-9005.

Sincerely,

Owen McMurtrey

**Subject:** Map Scale Waiver Request - Permit Amendment Application for City of Prineville

Hi Kelly,

I’m putting together a permit amendment application for the City of Prineville’s Permit G-12541. The City is requesting to change the place of use to the City service area boundary. Will the Department grant a map scale waiver?

The points of appropriation and authorized place of use will be shown on a separate map with a 1” = 1320’ scale, which I’ve also attached.

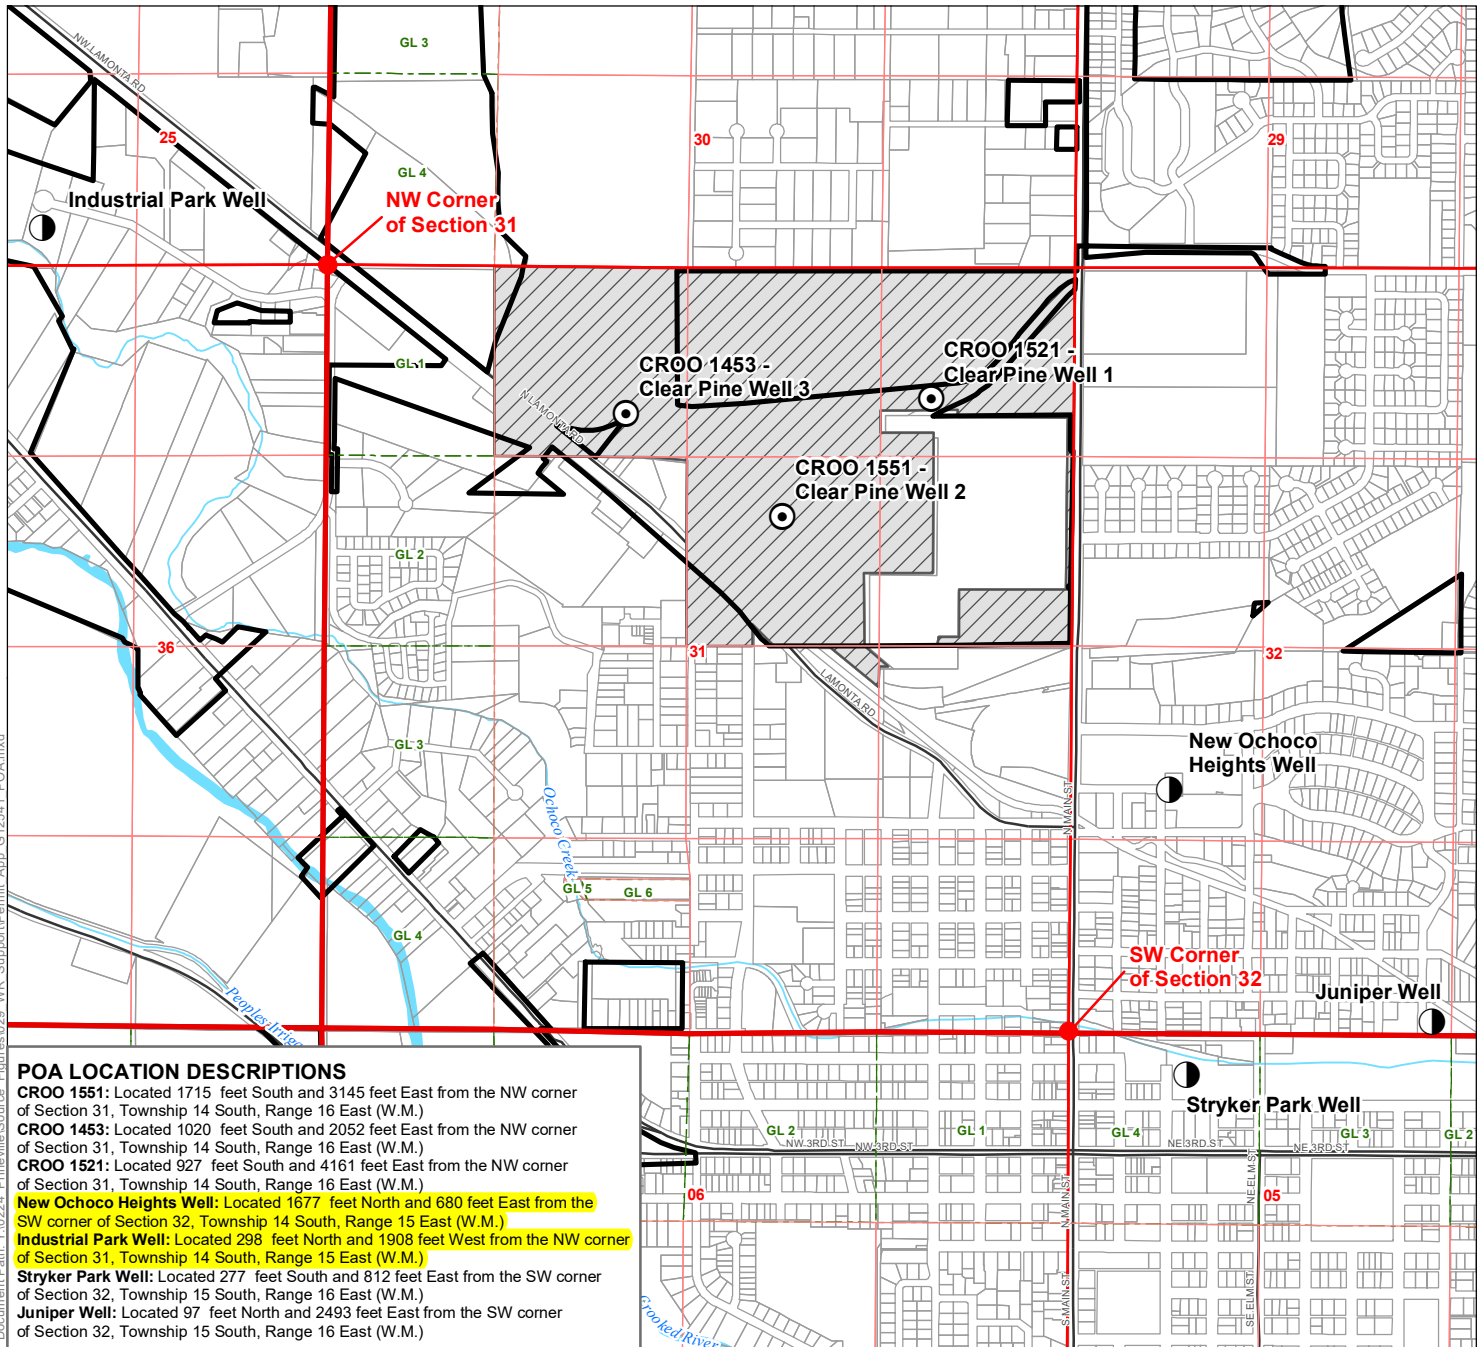

Thanks,

**Owen McMurtrey**
