FEB 1 2 2019

Deschutes River Conservancy Instream Leasing Program

Policy Concerning Weeds & Instream Leases Information on Farm Deferral & Lease Payment

The Deschutes River Conservancy is dedicated to restoring stream flow and improving water quality in the Deschutes Basin; land stewardship is a component of these goals.

Weed Policy

The DRC expects participants in the Leasing Program will continue to exercise agricultural best management practices on lands enrolled in the Program, particularly with respect to the control of noxious and/or nuisance weeds. Failure to control weeds on leased acres may result in exclusion from Program compensation.

Information and Resources Attached

Farm Deferral Notice

Instream leasing is a beneficial use that protects your water right from forfeiture and allows for compensation for this instream use, but please note that it does not automatically protect against loss of farm use special assessment. Exclusive Farm Use (EFU) zoned lands may still require at least minimal use with the intent to make a profit. It is the landowner's responsibility to know their tax assessment status and qualifying uses.

Information and Resources Attached

Donated Leases: One year and multi-year leases of less than 10 acres, leases with public entities, leases submitted after the due date, and leases with verified weed complaints are <u>not paid</u> a per acre or per acre-foot rate by the DRC.

Deschutes River Conservancy Instream Leasing Program

Policy Concerning Weeds & Instream Leases Information on Farm Deferral & Lease Payment

The Deschutes River Conservancy is dedicated to restoring stream flow and improving water quality in the Deschutes Basin; land stewardship is a component of these goals.

Weed Policy

The DRC expects participants in the Leasing Program will continue to exercise agricultural best management practices on lands enrolled in the Program, particularly with respect to the control of noxious and/or nuisance weeds. Failure to control weeds on leased acres may result in exclusion from Program compensation.

Information and Resources Attached

Farm Deferral Notice

Instream leasing is a beneficial use that protects your water right from forfeiture and allows for compensation for this instream use, but please note that it does not automatically protect against loss of farm use special assessment. Exclusive Farm Use (EFU) zoned lands may still require at least minimal use with the intent to make a profit. It is the landowner's responsibility to know their tax assessment status and qualifying uses.

Information and Resources Attached

Donated Leases: One year and multi-year leases of less than 10 acres, leases with public entities, leases submitted after the due date, and leases with verified weed complaints are not paid a per acre or per acre-foot rate by the DRC.

Though Halward 5 understand the DRC weed policy and have

been informed about farm deferral and donations.

Foreclosure Attorney:

ROBINSON TAIT, P.S.

Salem, OR

Inspect the property, post the applicable notices and rekey according to the REO Sales Guide. Follow the REO Sales Guide for all procedures applicable to this property.

You are also requested and authorized to do the following:

- * Act as our representatives when dealing with a condominium association, Home Owners Association, a management company, municipal officials, or any persons occupying the property.
- * You have our authorization to connect or disconnect any utilities on vacant properties and have them changed into your company's name unless notified by Fannie Mae that specific utilities will be managed by a third party company.
- * Contact the servicing lender noted above and inform them that you are the assigned marketing representative for Fannie Mae.
- * Complete authorization form(s) within the "Requesting Authorization Letters" Equator message if necessary to comply with requirements from specific entities.

Fannie Mae is relying upon you to take all appropriate precautions to ensure the health and safety of yourself, your employees and anyone who, in any way, works for you. In dealing with the property,

you may come across health and safety issues that give cause for concern. These issues could include risks related to physical damage to the property, criminal activity and environmental concerns, including toxic mold and hazardous substances. You should use reasonable judgment when dealing with health and safety issues. Do not enter upon the property if you believe that doing so will pose a risk to your health or safety.

Additionally, certain low value assets will not be listed for sale and will be directed immediately to Fannic Mae's next Pool Sale Transaction. Should this property be selected, you will receive further instructions for the continued management and revised compensation structure.

If you have any questions or cannot complete this assignment, please call.

Sincerely,

JOSEPH SCOTT

Deschutes River Conservancy Instream Leasing Program

Policy Concerning Weeds & Instream Leases Information on Farm Deferral & Lease Payment

The Deschutes River Conservancy is dedicated to restoring stream flow and improving water quality in the Deschutes Basin; land stewardship is a component of these goals.

Weed Policy

The DRC expects participants in the Leasing Program will continue to exercise agricultural best management practices on lands enrolled in the Program, particularly with respect to the control of noxious and/or nuisance weeds. Failure to control weeds on leased acres may result in exclusion from Program compensation.

Information and Resources Attached

Farm Deferral Notice

Instream leasing is a beneficial use that protects your water right from forfeiture and allows for compensation for this instream use, but please note that it does not automatically protect against loss of farm use special assessment. Exclusive Farm Use (EFU) zoned lands may still require at least minimal use with the intent to make a profit. It is the landowner's responsibility to know their tax assessment status and qualifying uses.

Information and Resources Attached

Donated Leases: One year and multi-year leases of less than 10 acres, leases with public entities, leases submitted after the due date, and leases with verified weed complaints are not paid a per acre or per acre-foot rate by the DRC.

Walter D. Sheridan

April 15, 1936 - April 3, 2017

Walter D. Sheridan passed away on the 3rd of April at home. Walt was born in Hastings, Nebraska, and moved as a toddler with his family to the central valley of California. Of note, he was on the city championship basketball team as a senior at Hughson High in 1954. After graduation, he served in the Air Force as an aircraft mechanic, stationed at Edwards Air Force Base. After leaving the military, he enrolled at Eastern Washington University, go Eagles! While pursuing his education at EWU, he met the love of his life, Sally, standing in line to register for spring term classes. Walt and Sally skipped class the very next day to have their first date. It was a ski date at Mt. Spokane that led to a whirlwind courtship and marriage that September. Walt graduated a year later, in 1965, with a degree in math and physical education. Their son, Scott, was born in early 1968. Walt then went on to obtain his master's degree in physical education in 1970.

Walt and Sally settled in North Bend where he enjoyed many years of outdoor activities and teaching at North Bend Junior High. Stacy joined the family in 1973. In 1994, he retired from teaching and moved to Bend. There he continued to pursue his favorite pastime of skiing the slopes of Mt. Bachelor, where he had been a member of the National Volunteer Ski Patrol for over 45 years. In the off season, Walt was able to travel near and far, including the high peaks of Mt. Everest, where he and Sally climbed to an elevation of over 18,000 feet. He also saw the magnificent sights of Botswana, hiked the El Camino in Spain, went east to Cambodia and China, and experienced the warm shores of Greece and Turkey.

Received by OWRD

FEB 1 2 2019

The family would like to thank Dr. Tilley and the nephrology department at BMC, the Fresenius staff for their kindness and care, and Partners in Care Hospice for their compassionate support of Walt and family. We also would like to extend a warm thank you to all those who came to visit as Walt was living his final weeks.

Walt is survived by his loving wife, Sally; and his children, Scott and Stacy; as well as his six grandchildren, Tori, Abby, Jake, Brad, Brendan, and Colin. There will be a celebration of life at the family home at 3pm on what would have been his 81st birthday, April 15th. The family asks that in lieu of flowers, donations be made to the Central Oregon Humane Society or Partners in Care Hospice of Bend.

EXHIBIT C

Deschutes River Conservancy Instream Leasing Program

Policy Concerning Weeds & Instream Leases Information on Farm Deferral & Lease Payment

The Deschutes River Conservancy is dedicated to restoring stream flow and improving water quality in the Deschutes Basin; land stewardship is a component of these goals.

Weed Policy

The DRC expects participants in the Leasing Program will continue to exercise agricultural best management practices on lands enrolled in the Program, particularly with respect to the control of noxious and/or nuisance weeds. Failure to control weeds on leased acres may result in exclusion from Program compensation.

Information and Resources Attached

Farm Deferral Notice

Instream leasing is a beneficial use that protects your water right from forfeiture and allows for compensation for this instream use, but please note that it does not automatically protect against loss of farm use special assessment. Exclusive Farm Use (EFU) zoned lands may still require at least minimal use with the intent to make a profit. It is the landowner's responsibility to know their tax assessment status and qualifying uses.

Information and Resources Attached

Donated Leases: One year and multi-year leases of less than 10 acres, leases with public entities, leases submitted after the due date, and leases with verified weed complaints are <u>not paid</u> a per acre or per acre-foot rate by the DRC.

I, RICHARD WYMAH understand the DRC weed policy and have Print Name been informed about farm deferral and donations.

Revised: 11/29/2017

This calculator is primarily designed to facilitate the calculation of how much water may be protected instream though instream leases and transfers. However, the calculator can also be used to determine the rate and duty associated with other transfers and cancellations. For questions regarding its use, please contact WRD DL instream@oregon.gov.

Enter Total Number of (CO Canal) Enter Total Number of (North Canal, also kno	Acres Involved from	J20.00		Catculate	Bortnik1 Bortnik2 Brown	0.96

POD #11		December 2, 1907	Combined		. 11	0.45
Season 1 Rate (CFS)	0.000				Sheridan	0.75

The transmission loss associated with this right is not transferable or protectable instream. The following tables show the amount of water that is protectable for Instream Leases and Instream Transfers, under the October 31, 1900 priority date. (Please contact the Department if you prefer to protect water instream under the combined October 31, 1900 and December 2, 1907 priority dates.) To prevent enlargement and injury, the instream use has been modified from the authorized season of April 1 through October 31, to April 1 through October 26.
