- 1. For irrigation calculate cfs for each water right involved as follows:
 - a. Divide total authorized cfs by total acres in the water right (for C12345, 1.25 cfs \div 100 ac); then multiply by the number of acres to be transferred to get the transfer cfs (x 45 ac = 0.56 cfs).
 - b. If the water right certificate does not list total cfs, but identifies the allowable use as 1/40 or 1/80 of a cfs per acre; multiply number of acres proposed for change by either 0.025 (1/40) or 0.0125 (1/80). (For C87654, 45.0 ac x 0.0125 cfs/ac = 0.56 cfs)
- 2. Add cfs for the portions of water rights on all the land included in the transfer; however do not count cfs for supplemental rights on acreage for which you have already calculated the cfs fee for the primary right on the same land. The fee should be assessed only once for each "on the ground" acre included in the transfer. (In this example, blank 5a would be only 0.56 cfs, since both rights serve the same 45.0 acres. Blank 5b would be 0 and Line 5 would then also become 0).

Additional remarks: Several proposed wells are listed, and shown on the map, in the event that a proposed well does not provide enough water to meet the rate allowed by Water Right Certificate #30011. The goal for this transfer is to either use one well from which the allowable rate can be drawn and used for irrigation; however, if water is not sufficiently available at the firstattempted well, other possible locations for POAs have been listed and shown on the attached map.

TACS

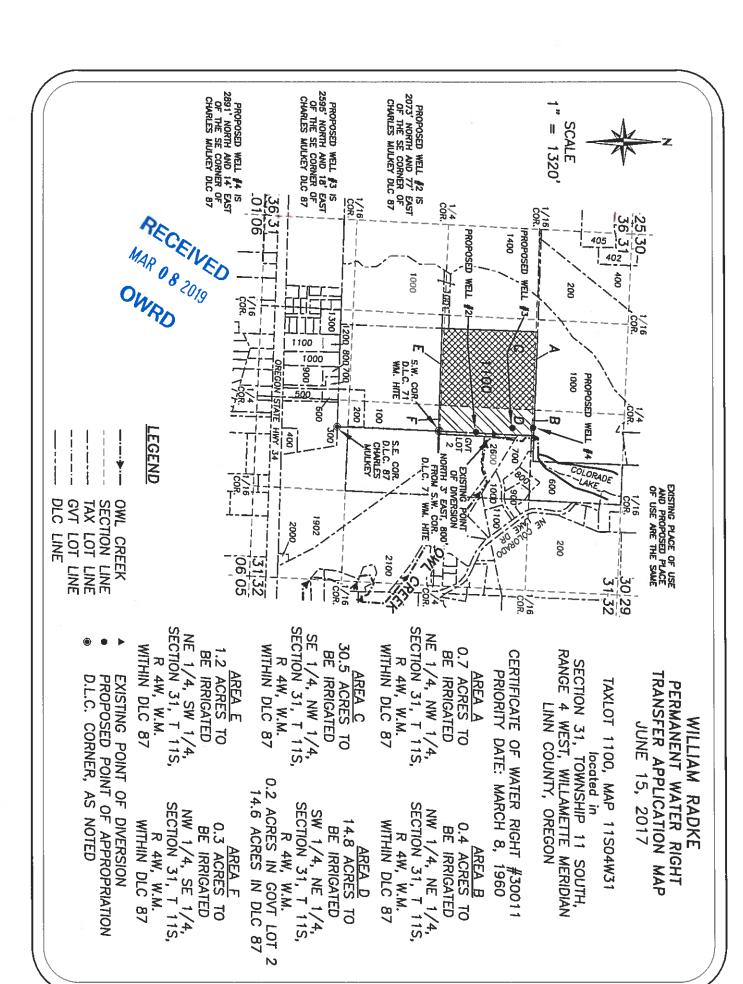

For Place of Use or Character of Use Changes

	Are there other water right certificates, water use permits or ground water registrations associated with the "from" or the "to" lands? Yes No									
	If YES, list the certificate, water use permit, or ground water registration numbers:									
)	Pursuant to ORS 540.510, any "layered" water use such as an irrigation right that is supplemental to a primary right proposed for transfer must be included in the transfer or be cancelled. Any change to a ground water registration must be filed separately in a ground water registration modification application.									
Fo	or Substitution (ground water supplemental irrigation will be substituted for surface water primary irrigation)									
	Ground water supplemental Permit or Certificate #; Surface water primary Certificate #; or a change from Supplemental Irrigation Use to Primary Irrigation Use Identify the primary certificate to be cancelled. Certificate # OVERD OVERD									
Fo	or a change from Supplemental Irrigation Use to Primary Irrigation Use

Fo	or a change in point(s) of appropriation (well(s)) or additional point(s) of appropriation:									
[Well log(s) are attached for each authorized and proposed well(s) that are clearly labeled and associated with the corresponding well(s) in Table 1 above and on the accompanying application map. Tip: You may search for well logs on the Department's web page at: http://apps.wrd.state.or.us/apps/gw/well-log/Default.aspx									
1	AND/OR									
[Describe the construction of the authorized and proposed well(s) in Table 3 for any wells that do not have a well log. For proposed wells not yet constructed or built, provide "a best estimate" for each requested information element in the table. The Department recommends you consult a licensed well driller, geologist, or certified water right examiner to assist with assembling the information necessary to complete Table 3.									

Table 3. Construction of Point(s) of Appropriation

Any well(s) in this listing must be clearly tied to corresponding well(s) described in Table 1 and shown on the accompanying application map. Failure to provide the information will delay the processing of your transfer application until it is received. The information is necessary for the department to assess whether the proposed well(s) will access the same source aquifer as the authorized point(s) of appropriation (POA). The Department is prohibited by law from approving POA changes that do not access the same source aquifer.
