District I	nstream Lea	se Application (revised 7/28/2017)		Page 1	

Part 2 of 4 – District and other party Signature

Term of the Lease:	
The lease is requested to begin in: month April year 20 Public use: Check the public use(s) this lease will	
serve (as defined by ORS 537.332):	Termination provision (for multiyear leases): The parties to the lease request (choose one):
Conservation, maintenance and enhancement of	a. The option of terminating the lease prior to
aquatic, fish and wildlife, fish and wildlife habitat	expiration of the full term with written notice to the
and any other ecological values.	Department by the Lessor(s) and/or Lessee.
□ Recreation	b. The option of terminating the lease prior to expiration
Pollution abatement	of the full term, with consent by all parties to the
☐ Navigation	lease.
	C. The parties would not like to include a Termination
	Provision. (See instructions for limitations to this provision)
Additive/Replacing Relationship to other instream v	vater rights: Instream leases are generally additive to other
	stream leases and transfers and/or allocations of conserved
	r to other instream rights created through a state agency
process or conversion of minimum flows, they generall	
If you would like this lease to relate to other instream	water rights differently than described above, please check
this box. And attach an explanation of your intent.	
	proposed to be leased again or later transferred or become
lease shall not set a precedent on a future	project, a new injury review shall be required. An instream
and the same of th	transaction.
Validity of the rights to be leased:	
five years or have been leased instream; or	er the terms and conditions of the right(s) during the last
	five years according to the terms and conditions of the
	o forfeiture under ORS 540.610(2). Documentation
describing why the water right is not subject to for	
	TURES
	contained in this application is true and accurate.

OR

Frate per acre is updated to reflect changes to this cert based on CW-9 and CW-37 specifically

Notes

The amounts shown in the green Section 1.4 box breaks the water right down into each priority date.

The rate is simply the current rate per acre (see start point page) multiplied by the number of acres being leased by each priority date.

The duty is simply the duty per acre (1.8 AF) multiplied by the number of acres being leased by each priority date:

Rates and Volumes by	instream Rate (CFS) over full	Instream	ľ

Notes

The amounts shown in the lavendar box's breaks the water right down into each priority date for what is going instream.

The volume shown is simply the full duty as calculated in the green box.

However, the instream rate has been reduced. The presumption I used is that water is to be protected instream over the full Irrigation season, being

April 15 to October 15. The instream rate then is the duty divided by the number of days in the irrigation season (184). This is then divided by 1.983471 AF/day to arrive at the rate instream. 1.983471 AF = 1 CFS for one day.

(Duty in AF / # of days instream) * 1 CFS/1.983471 AF per Day

This table will calculate flow rate factors and duty for Tumalo Irrigation Distribution Instream Leases

Primary Irrigation

TID CERT 74147 (assuming can divert full rate and duty allowed by certificate for primary water use) Priority Date = October 29, 1913

Source = Tumalo Creek with any deficiencies to be made up from Crater Creek, Little Crater Creek, and

Rate (CFS) associated with the right to be leased for the Lease Application Form								
Enter Rates and Duty on Lease Form by Season	Rate/acre (CFS)	Max Rate (CFS)	Duty/acre (AF)	Max Duty (AF)				
Season 1	0.013	1.418	9.910	1,123.89				
Season 2	0.017	1.890						
Season 3	0.031	3.500						

Notes

The rate identified in the green Section box was calculated based on the number of acres being leased multiplie acre for each season. For example Season 1 rate = # acres * 1/80th CFS per acre

The duty identified is the number of acres to be leased multiplied by the 9.91 AF per acre duty limitation.

Deschutes River Conservancy Instream Leasing Program

Policy Concerning Weeds & Instream Leases Information on Farm Deferral & Lease Payment

The Deschutes River Conservancy is dedicated to restoring stream flow and improving water quality in the Deschutes Basin; land stewardship is a component of these goals.

Weed Policy

The DRC expects participants in the Leasing Program will continue to exercise agricultural best management practices on lands enrolled in the Program, particularly with respect to the control of nodous and/or nulsance weeds. Fallure to control weeds on leased acres may result in exclusion from Program compensation.

Information and Resources Attached

Farm Deferral Notice

Instream leasing is a beneficial use that protects your water right from forfeiture and allows for compensation for this instream use, but please note that it does not automatically protect against loss of farm use special assessment. Exclusive Farm Use (EFU) zoned lands may still require at least minimal use with the intent to make a profit. It is the landowner's responsibility to know their tax assessment status and qualifying uses.

Donated Leases: Leases of less than 5 acres, leases with public entities, leases

Information and Resources Attached

submitted after the due date agreed up District, and leases with verified weed rate by the DRC. John Kevin Regand	pon by the District and the DRC and posted by the complaints are <u>not paid</u> a per acre or per acre-foo

Deschutes River Conservancy Instream Leasing Program

Policy Concerning Weeds & Instream Leases Information on Farm Deferral & Lease Payment

The Deschutes River Conservancy is dedicated to restoring stream flow and improving water quality in the Deschutes Basin; land stewardship is a component of these goals.

Weed Policy

The DRC expects participants in the Leasing Program will continue to exercise agricultural best management practices on lands enrolled in the Program, particularly with respect to the control of noxious and/or nulsance weeds. Failure to control weeds on leased acres may result in exclusion from Program compensation.

Information and Resources Attached

Farm Deferral Notice

Instream leasing is a beneficial use that protects your water right from forfeiture and allows for compensation for this instream use, but please note that it does not automatically protect against loss of farm use special assessment. Exclusive Farm Use (EFU) zoned lands may still require at least minimal use with the intent to make a profit. It is the landowner's responsibility to know their tax assessment status and qualifying uses.

Information and Resources Attached

Donated Leases: Leases of less than 5 acres, leases with public entities, leases submitted after the due date agreed upon by the District and the DRC and posted by the District, and leases with verified weed complaints are <u>not paid</u> a per acre or per acre-foot rate by the DRC.

Janet H. Breyer

I. RUBY "AKA" Ruben GOLMIN understand the DRC weed policy and have

been informed about farm deferral and donations.

Farm Deferral Notice

Instream leasing is a beneficial use that protects your water right from forfeiture and allows for compensation for this instream use, but please note that it does not automatically protect against loss of farm use special assessment. Exclusive Farm Use (EFU) zoned lands may still require at least minimal use with the intent to make a profit. It is the landowner's responsibility to know their tax assessment status and qualifying uses.

Information and Resources Attached

Donated Leases: Leases of less than 3 acres, leases with public entities, leases submitted after the due date agreed upon by the District and the DRC and posted by the District, and leases with verified weed complaints are <u>not paid</u> a per acre or per acre-foot rate by the DRC.

Tumalo Irrigation District leases are paid for water measured instream. Size of lease payment may vary from year-to-year depending on reliability of the water in a given year and total number acres leased from TID patrons. If more than 450 total district acres are leased, payment per measured acre-foot increases from \$8.50 to \$10.00 per acre-foot.

Deschutes River Conservancy Instream Leasing Program

Policy Concerning Weeds & Instream Leases Information on Farm Deferral & Lease Payment

The Deschutes River Conservancy is dedicated to restoring stream flow and improving water quality in the Deschutes Basin; land stewardship is a component of these goals.

Weed Policy

The DRC expects participants in the Leasing Program will continue to exercise agricultural best management practices on lands enrolled in the Program, particularly with respect to the control of noxious and/or nuisance weeds. Failure to control weeds on leased acres may result in exclusion from Program compensation.

Information and Resources Attached

Farm Deferral Notice

Instream leasing is a beneficial use that protects your water right from forfeiture and allows for compensation for this instream use, but please note that it does not automatically protect against loss of farm use special assessment. Exclusive Farm Use (EFU) zoned lands may still require at least minimal use with the intent to make a profit. It is the landowner's responsibility to know their tax assessment status and qualifying uses.

Information and Resources Attached

Donated Leases: Leases of less than 3 acres, leases with public entities, leases submitted after the due date agreed upon by the District and the DRC and posted by the District, and leases with verified weed complaints are <u>not paid</u> a per acre or per acre-foot rate by the DRC.

Tumalo Irrigation District leases are paid for water measured instream. Size of lease payment may vary from year-to-year depending on reliability of the water in a given year and total number acres leased from TID patrons. If more than 450 total district acres are leased, payment *per measured acre-foot* increases from \$8.50 to \$10.00 per acre-foot.

Mark A. Murzin

View larger image

Received by OWRD

MAR-1 9 2019

Salem, OR

March 30, 1954 - December 31, 2018

Tirk "Murry" Murzin, 64, passed away peacefully at Hospice House in Bend on the final day of the tax year, with his loving wife, Kris, at his side.

Mark was a "mensch" in the truest sense of the word — helpful, considerate, generous (to people and causes), kind, and giving. He touched so many lives in a positive way as a trusted advisor to his clients and friends. He always tried to do the best possible job for everyone. Even in his waning days, he made such an effort to give comfort to all those who cared about him.

Mark was a superlative example of how to live and die with grace and dignity. His 27 month struggle with pancreatic cancer and its treatment is described in his CaringBridge website in a candid and inspirational way: https://www.caringbridge.org/public/markmurzin.

Mark was born in Shirley, MA and lived most of his life in Connecticut. He spent his ormative years in Trumbull, CT and was proud to have had lifelong friendships with

other members of the "Plumtree Lane Gang".He (http://Gang".He) moved to Bend in 99, where he enjoyed all the outdoor recreation in the area. He loved running, camping, hiking, biking, skiing, snowshoeing, kayaking, whitewater rafting, and playing golf.

Mark graduated from the University of Connecticut in 1976 and became a CPA, working at mid-sized accounting firms in Connecticut and Colorado until he formed his own firm Murzin Paquette and Company with his close friend, David Paquette, in 1993. Mark earned a Masters in Taxation from the University of Denver in 1984 and was a top-notch tax, estate and retirement consultant during his 40 year career. He formed his own company, Mark A. Murzin, CPA when he moved to Bend almost 20 years ago.

Mark loved to travel. He spent 6 months in 1979 on the roads of North America, camping with Kris in their Chevy van. Some of his favorite foreign destinations were: Raja Ampat, Indonesia; French Polynesia; the Galapagos Islands and Amazonian jungle of Ecuador; pe Breton, Nova Scotia; and Scotland. Highlights of his more recent U.S. travels were rafting through the Grand Canyon and exploring Alaska's Inside Passage on an expedition cruise.

Mark was also the ultimate sports fan, especially of his beloved New York Yankees.

Mark is survived by his devoted wife of 41 years, Krista Knoernschild; his brother, Howie Murzin; cousin Allan Miller; in-laws: Mark Knoernschild and wife, Jane Bartosik; and Kurt Knoernschild and wife, Sally Nogg.

While all who meant so much to Mark are too many to name, special appreciation goes out to: David Menegus, Kevin Kupec, David Paquette, Jack Lutz, Alison Smith, Steve Axelrod, Eliot Gersten, Rick Loomis, Gail and Dick Grauer, Betty and David Faller, Penny Fristrom, and Patty Giffin.

pecial thanks from the family to the caregivers at St. Charles Cancer Center and Received by OWRD

Partners In Care of Bend. Memorial donations to honor Mark may be made to Seacology www.seacology.org, (http://www.seacology.org)) Partners In Care (www.partnersbend.org) (http://www.partnersbend.org)) or CaringBridge (as a tribute on Mark's website).

Memorial services will be held in Bend, OR on March 2, 2019 and in Newtown, CT on March 30, 2019. Details will be forthcoming on CaringBridge.

Deschutes River Conservancy Instream Leasing Program

Policy Concerning Weeds & Instream Leases Information on Farm Deferral & Lease Payment

The Deschutes River Conservancy is dedicated to restoring stream flow and improving water quality in the Deschutes Basin; land stewardship is a component of these goals.

Weed Policy

The DRC expects participants in the Leasing Program will continue to exercise agricultural best management practices on lands enrolled in the Program, particularly with respect to the control of noxious and/or nuisance weeds. Failure to control weeds on leased acres may result in exclusion from Program compensation.

Information and Resources Attached

Farm Deferral Notice

Instream leasing is a beneficial use that protects your water right from forfeiture and allows for compensation for this instream use, but please note that it does not automatically protect against loss of farm use special assessment. Exclusive Farm Use (EFU) zoned lands may still require at least minimal use with the intent to make a profit. It is the landowner's responsibility to know their tax assessment status and qualifying uses.

Information and Resources Attached

Donated Leases: Leases of less than 3 acres, leases with public entities, leases submitted after the due date agreed upon by the District and the DRC and posted by the District, and leases with verified weed complaints are <u>not paid</u> a per acre or per acre-foot rate by the DRC.

Tumalo Irrigation District leases are paid for water measured instream. Size of lease payment may vary from year-to-year depending on reliability of the water in a given year and total number acres leased from TID patrons. If more than 450 total district acres are leased, payment per measured acre-foot increases from \$8.50 to \$10.00 per acre-foot.

It is the landowner's responsibility to know their tax assessment status and qualifying uses.

Information and Resources Attached

Donated Leases: Leases of less than 3 acres, leases with public entities, leases submitted after the due date agreed upon by the District and the DRC and posted by the District, and leases with verified weed complaints are <u>not paid</u> a per acre or per acre-foot rate by the DRC.

Tumalo Irrigation District leases are paid for water measured instream. Size of lease payment may vary from year-to-year depending on reliability of the water in a given year and total number acres leased from TID patrons. If more than 450 total district acres are leased, payment per measured acre-foot increases from \$8.50 to \$10.00 per acre-foot.

I

Part 3 of 4 - Place of Use - Lessor Information and Signatures

Complete Table 1 Identify water right(s) proposed to be leased instream Provide a separate Part 3 for each Lessor (water right interest holder/landowner)

Table 1

Irrigation District or other Water Purveyor Name: TUMALO IRRIGATION DISTRICT

Specify Water Right, Priority Date, point of diversion(s) (POD), place of use, tax lot, gov't lot/DLC, acres to be leased, original use type, certificate page number, and any previous lease.

If not enough room below, you may add rows (see instructions) or create a spreadsheet/table (matching Table 1) and attach.

Any attached table should include reference to the Lessor.

Water Right #	Priority Date	POD#	Tw	р	Rn	g	Sec	Q	-Q	Tax Lot	Gov't Lot/DLC#	Acres	Use	Page #	Previous Lease #
74146	09-01-1900	1P	16	S	11	E	26	SW	NW	00117	N/A	9.0	IR	7	N/A
	-														

Any additional information about the right: Remaining 4.0 acres

Farm Deferral Tax Status: Counties make the determination of whether a property qualifies for the farm use assessment without consideration of whether the lands have an associated water right which is leased instream. If you have questions regarding the farm use assessment you should contact your local county assessor. You should contact your County for any weed ordinance and management requirements.

The undersigned declare:

- 1. I/We agree during the term of this lease to suspend use of water allowed under the water right(s) involved in the lease as well as and any other appurtenant primary or supplemental water right(s); and
- 2. I/We certify are the lessor(s) (water right interest holder) of the water right(s) in Table 1. If not the deeded land owner, I/we have obtained consent from the deeded land owner and/or have provided documentation of authorization to pursue the instream lease; and
- 3. I/We affirm that the information in this application is true and accurate.

Deschutes River Conservancy Instream Leasing Program

MAR 1 9 2019

Policy Concerning Weeds & Instream Leases Information on Farm Deferral & Lease Payment

Salem, OR

The Deschutes River Conservancy is dedicated to restoring stream flow and improving water quality in the Deschutes Basin; land stewardship is a component of these goals.

Weed Policy

The DRC expects participants in the Leasing Program will continue to exercise agricultural best management practices on lands enrolled in the Program, particularly with respect to the control of noxious and/or nuisance weeds. Failure to control weeds on leased acres may result in exclusion from Program compensation.

Information and Resources Attached

Farm Deferral Notice

Instream leasing is a beneficial use that protects your water right from forfeiture and allows for compensation for this instream use, but please note that it does not automatically protect against loss of farm use special assessment. Exclusive Farm Use (EFU) zoned lands may still require at least minimal use with the intent to make a profit. It is the landowner's responsibility to know their tax assessment status and qualifying uses.
