Please use a separate Part 5 for each water right being changed. See instructions on page 6, to copy and paste additional Part 5s, or to add additional rows to tables within the form.

Description of Water Delivery System

System capacity: Pump setting on the South Side of Grande Ronde River for POD 2 and 3 pumps

2.80 cubic feet per second (cfs) OR

gallons per minute (gpm)

Describe the current water delivery system or the system that was in place at some time within the last five years. Include information on the pumps, canals, pipelines, and sprinklers used to divert, convey, and apply the water at the authorized place of use. There is a 100 hp General Electric motor connected to a Cornell centrifugal pump. The pump is attached to a 10" steel suction that raises the water 15 feet into a buried 10" steel main. The main extends South about 800' then reduces to an 8" steel main, buried. The main continues South for 1320 feet and reduces to a 6" buried main. The mainlines have risers that attach to 4 - 5", each 1320' long wheel lines that discribute the water. It would appear to me only diversion point 3 is authorized for both the certificates

Table 1. Location of Authorized and Proposed Point(s) of Diversion (POD) or Appropriation (POA)

(Note: If the POD/POA name is not specified on the certificate, assign it a name or number here.)

POD/POA Name or Number	Is this POD/POA Authorized on the Certificate or is it Proposed?	If POA, OWRD Well Log ID# (or Well ID Tag # L)	Twp:		Rng		Sec	1/4	1/4	Tax Lot, DLC or Gov't Lot	Measured Distances (from a recognized survey corner)
