Salem, OR

Part 2 of 4 – Instream Lease Application Map Checklist

A Map is generally required for each water right not leased in its entirety

The application map (if required) should include all the items listed below and match the existing water right(s) of record. Check all boxes that apply.

This should be a <u>simple</u> map. (See example below). A copy of a final proof survey map with the portion to be leased shaded or hachured in will also suffice.

A map is required <u>for each</u> water right not leased in its entirety. More than one QQ and property may be included on each map. A map is not required, if leasing the entire right or if the right to be leased is for municipal or quasi-municipal water use.

The map should be of sufficient quality to be reproducible. Please do not use highlighters to mark items on the map as highlighters do not always copy.

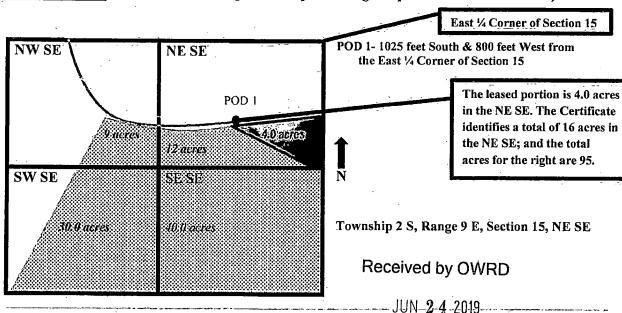

A North arrow and map scale (no smaller than 1'' = 1320').

Township, Range, Section, quarter quarter (QQ), and a clearly labeled survey corner.

For irrigation or other similar use, the number of acres to be leased in each quarterquarter clearly labeled and hatchured to differentiate between the acres being leased and any remaining. If the place of use is broken down by more than one priority date, or source stream, and/or point of diversion you must identify each with separate hachuring and clearly label.

If available, identify the existing point(s) of diversion.

EXAMPLE MAP (the darker shaded portion representing the portion leased instream)

Part 3 of 4 cont. - Water Right and Instream Use Information

Salem, OR Instream Use Information

Table 4

Instream Use Created by the Leas	se
River/ Stream Name: Mill Creek, tributary to Ochoco	River Basin: Crooked
Reservoir/Ochoco Creek	River/Deschutes Basin
<u> </u>	

Instream Portion: Use Table 4 to illustrate the instream rate, volume and instream period by priority date, POD (if more than one), Use (if more than one), and acreage as appropriate considering the right to be leased.

If not enough room below, you may add additional rows (see instructions) or attach a spreadsheet (matching the below portion of Table 4). Please clearly label any attachments.

	Priority date	POD#	Use	Acres	Proposed Instream Period	Total instream rate (cfs)	Total instream volume (af)
α	93665 // 1868	Stnt	IR	0.5	6/1 through 11/9	.00625	2.0
,	93667 // 1868	Stnt	, IR	16.6	6/1 through 11/9	0.2075	66.3
þ	93667 // 1868	Stnt &1	IR.	37.5	6/1 through 11/9	0.4688	149.7
ان	93668 // 1868	Stnt	IR	4.8	6/1 through 11/9	0.0600	19.2

Note: If not certain of the instream rate, volume and/or instream period, see the instructions and/or contact Department Staff for assistance. The instream rate and volume may be up to the maximum rate and duty/volume allowed by the right, as described in Table 2 or on your Certificate if leasing the entire right. The proposed instream period may be no longer than the irrigation season or the authorized period of allowed use.

OR Please check this box if you are not sure of the proposed rate, volume and instream period. As part of its review process, the Department will identify the appropriate instream rate, volume and period considering the water right(s) being leased and instream benefits.

Instream Reach

Instream Lease Application (revised 7-27-2017)

Proposed Instream Reach: ☐ A reach typically begins at the point of diversion (POD) and ends at the mouth of the source stream: From the POD to mouth of Mill Creek	Or Proposed Instream Point: Instream use protected at the POD						
OR Please check this box if you are not sure of the proposed reach and want water to be protected within a reach below the POD, if possible. (If no reach is identified or the above box is not checked, and there is only one POD listed on the certificate, the lease may be processed to be protected at the POD.)							
Additional Instream Information							
Note: The Department may identify additional conditions to prevent injury and/or enlargement.							
Any additional information about the proposed instream use:
