Application for Instream Lease

Part 1 of 4 – Minimum Requirements Checklist

Complete Part 1 through 4 and include the required attachments Fill in or check boxes as indicated. (N/A= Not Applicable)	OWRD # <u>2SL-24</u>
	Fee-

Pursuant to ORS 537.348(2) and OAR 690-077

Check all items included with this application. (N/A = Not Applicable)

Yes **Part 1 – Completed Minimum Requirements Checklist and Application Fee**

Fees	<input type="checkbox"/> \$450.00 for a lease involving four or more landowners or four or more water rights	<input checked="" type="checkbox"/> \$300.00 for all other leases
	<input type="checkbox"/> Check enclosed <u>or</u> <input checked="" type="checkbox"/> Fee Charged to customer account The Freshwater Trust (account name)	

Yes **Part 2 – Completed Instream Lease Application Map Checklist.**

Yes **Part 3 – Completed Water Right and Instream Use Information**
 Include a separate **Part 3** for **each water right**

Yes **Part 4 – Completed Instream Lease Provisions and Signatures**

Yes **How many water rights are leased? 2 List them here: 5635, 5641**
 Include a separate **Part 3** for each **water right**.

Yes N/A **Other Water Rights**, if any, appurtenant to the lands involved in the lease application and not proposed to be leased instream?
List those other water rights here: Permit: G 13517.

Yes No **Conservation Reserve Enhancement Program (CREP).** Are some or all of the lands to be leased part of CREP or another Federal program (list here: _____)?

Attachments:

Yes N/A **Map:** Instream Lease map requirements (see Part 2 of this application)

Yes N/A **Tax Lot Map:** If a portion of the water right *not included in the lease* is appurtenant to lands owned by others, a tax lot map must be included with the lease application. The tax lot map should clearly show the property involved in the lease.

Yes N/A Supporting documentation describing why a right (or portion thereof) is valid and not subject to forfeiture even though the right has not been exercised for five or more consecutive years. This information only needs to be provided if the checkbox has been checked to identify that the water right has not been used in the last five years and is not subject to forfeiture (See Part 4 of 4).

Yes N/A If the Lessor (water right holder) is not the deeded landowner - provide one of the following.

- A notarized statement from the landowner consenting to the lease and a copy of the recorded deed; or
- A water right conveyance agreement and a copy of the recorded deed for the landowner at the time the water right was conveyed; or
- Other documentation which provides authority to pursue the lease absent consent of the landowner.

SALEM, OR

Part 2 of 4 – Instream Lease Application Map Checklist

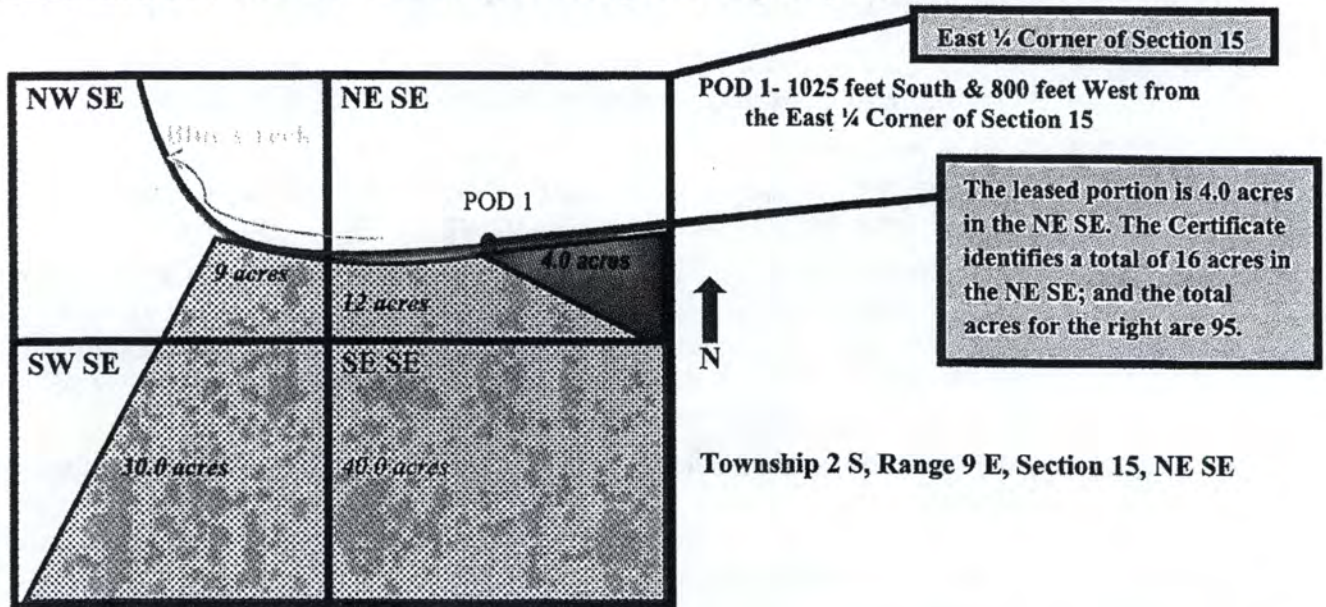

A Map is generally required for each water right not leased in its entirety

The application map (if required) should include all the items listed below and match the existing water right(s) of record. Check all boxes that apply.

This should be a simple map. (See example below). A copy of a final proof survey map with the portion to be leased shaded or hachured in will also suffice.

- N/A A map is required for each water right not leased in its entirety. More than one QQ and property may be included on each map. A map is not required, if leasing the entire right or if the right to be leased is for municipal or quasi-municipal water use.
- The map should be of sufficient quality to be reproducible. Please do not use highlighters to mark items on the map as highlighters do not always copy.
- A North arrow and map scale (no smaller than 1" = 1320').
- Township, Range, Section, quarter quarter (QQ), and a clearly labeled survey corner.
- For irrigation or other similar use, the number of acres to be leased in each quarter-quarter clearly labeled and hachured to differentiate between the acres being leased and any remaining. If the place of use is broken down by more than one priority date, or source stream, and/or point of diversion you must identify each with separate hachuring and clearly label.
- If available, identify the existing point(s) of diversion.

EXAMPLE MAP (the darker shaded portion representing the portion leased instream)

SALEM, OR

Part 4 of 4 – Lease Provisions and Party Signatures

Term of the Lease (may be from 1 year up to 5 years):

The lease is requested to begin in: **month July 15 year 2014** and end: **month Sep 30 year 2014**

Note: The begin month is generally the first month of the irrigation season and the end month is the last month in the irrigation season. If not an irrigation right, this would be the first and last month of your authorized period of allowed use.

Public use: Check the public use(s) this lease will serve (as defined by ORS 537.332):

- Conservation, maintenance and enhancement of aquatic, fish and wildlife, fish and wildlife habitat and any other ecological values.
- Recreation
- Pollution abatement
- Navigation

Termination provision (for multiyear leases):

The parties to the lease request (choose one):

- a. The option of terminating the lease prior to expiration of the full term with written notice to the Department by the Lessor(s) and/or Lessee.
- b. The option of terminating the lease prior to expiration of the full term, with consent by all parties to the lease.
- c. The parties would not like to include a Termination Provision.

(See instructions for limitations to this provision)

Additive/Replacing Relationship to other instream water rights: Instream leases are generally additive to other existing instream water rights created as a result of instream leases, transfers and/or allocations of conserved water. Since instream leases are also generally senior to other instream rights created through a state agency process or conversion of minimum flows, they generally replace a portion of these junior instream rights.

If you would like this lease to relate to other instream water rights differently, please check this box.
And attach an explanation of your intent.

Validity of the Right(s) to be leased (check the appropriate box):

- The water right(s) to be leased have been used under the terms and conditions of the right(s) during the last five years or have been leased instream; or
- The water right(s) have not been used for the last five years according to the terms and conditions of the right(s). However, the water right(s) is not subject to forfeiture under ORS 540.610(2). Documentation describing why the water right(s) is not subject to forfeiture is provided.

Precedent: If a right which has been leased is later proposed to be leased again or later transferred or become part of an allocation of conserved water project, a new injury review shall be required. An instream lease shall not set a precedent on a future transaction.

The undersigned declare:

1. The Lessor(s) agree during the term of this lease, to suspend use of water allowed under the subject water right(s) and under any appurtenant primary or supplemental water right(s) not involved in the lease application; and
2. The Lessor(s) certify that I/we are the water right holder(s) of the right(s) described in this instream lease application. If not the deeded landowner, I/we have provided documentation with the lease application that I/we have authorization to pursue the lease application and/or have obtained consent from the deeded landowner; and
3. All parties affirm that information provided in this lease application is true and accurate.

Application Instructions: Part 1 of 4

Eligible Water Rights: Surface or Storage water rights subject to Instream Lease include:

1. Certificated rights.
2. Adjudicated rights evidenced by a court decree.
3. Permits or transferred rights upon which satisfactory proof has been made.
4. Conserver's portion of conserved water allocation under ORS 537.445 to 537.500.
5. Secondary water rights for the use of stored water.

Only valid rights are eligible to be leased to instream use.

- A water right that has not been used for five or more years may no longer be valid under Oregon law. Municipal water rights are the exception.
- If the Department reasonably suspects the right may no longer be valid, it may require an affidavit attesting to the use, along with supporting documentation, and/or deny the lease as incomplete.
- If a water right hasn't been used for five or more years, you may also be able to demonstrate that it's not subject to forfeiture if you qualify for one of the provisions under ORS 540.610(2).

Deadline for submission: All Instream Lease Applications have deadlines for submittal. A water right with a seasonal use (such as irrigation) must be submitted prior to July 1; a water right with a year round use (such as industrial use) must be received prior to October 1.

Fee: Include the appropriate fee by check or money order made out to the Oregon Water Resources Department. You may also designate an appropriate customer account, if you have one, from which the fee should be deducted. Generally, the Lessee may have an account already set up with the Department. Applications received without the proper fee will be returned.

Other Water Rights: It is important to provide an inventory of *all of the water rights appurtenant* to the same lands identified in the lease application. This includes other primary and supplemental rights, even if the rights are still in permit status, and are not included in the lease application. Water rights information can be found via the link above for Water Rights Information Query or the Additional Water Rights Research links above.

Conservation Reserve Enhancement Program (CREP): Indicate if some or all of the lands involved in the lease application are enrolled in the CREP program (or other similar Federal Program). The Department will send a copy of the order approving the lease to the Farm Services Administration and other associated parties. If lands involved in the lease are enrolled in another Federal Program, please provide the name of that program in the space provided in Part 1 of 4.

Application for Split Season Instream Lease

SL-24

A summary of review criteria and procedures that are generally applicable to these applications is available at www.wrd.state.or.us/OWRD/PUBS/forms.shtml.

- Attachment 4 (Standard Leasing Form).
- Attachment 5-D (Pooled Leasing Form).

The standard instream water right form or for pooled leases, the appropriate pooled lease forms, pursuant to ORS 537.348(2) and OAR 690-077 must also be filled out before a Split Season Use Instream Lease Application can be processed.

Note: Split season use lease applications must be submitted to the Department two weeks prior to water being used either for the existing purpose or for the proposed instream purpose. (OAR 690-077-0079)

1. Existing and Instream Use Periods

For the water right being leased instream, as described in Section 1.5, include monthly or partial season rate or duty limitations, if appropriate.
 This section replaces the "Total volume, Rate in cfs, and Allowed period of use" portions of Section 2.2 on the standard or pooled instream leasing forms.

The water right will be used for its existing purpose from April 21, 2014
 to July 14, 2014 (Cert 5635).
 The water right will be used for instream use period is from July 15, 2014
 to September 30, 2014.

	Rate (cfs)		Conversion Factor 1 cfs = 1.983471 ac-ft/day		Number of days		Duty (ac-ft)
Existing Use	0.13	*	1.983471	*	85.00	=	21.91
use if needed		*	1.983471	*		=	0.00
use if needed		*	1.983471	*		=	0.00
Instream Use	0.14	*	1.983471	*	76	=	21.10
use if needed		*	1.983471	*		=	0.00
use if needed		*	1.983471	*		=	0.00
Total	n/a		n/a		n/a		44.03

2. Measurement and Reporting

The water right lessor or lessee shall contact the watermaster to determine the necessary measurement and reporting requirements associated with leasing a water right.
 The holders of the water rights shall measure and report the use of the existing water right and instream water right to the satisfaction of the Director, or provide for third party measurement and reporting to the satisfaction of the Director. Pursuant to ORS 537.332(3), the Department holds instream water rights in trust for the benefit of the people of the State of Oregon.

- (a) Location(s) and type(s) of measuring device(s): 4-inch totalizing flow meter at POD
- (b) Frequency of measurement: Lessee will report beginning and ending meter readings for the irrigation period as well as report readings at least once a month during the irrigation period

RECEIVED BY OWRD
 MAR 31 2014

(c) Parties responsible for the respective measurements: Lessee is responsible for collecting and reporting meter readings. Watermaster will also read Lessee's meter monthly to verify
