<b>Additive/Replacing Relationship to other instream water rights:</b> Instream leases are generally additive to other existing instream water rights created as a result of instream leases and transfers and/or allocations of conserved water. ## EXHIBIT C

### Deschutes River Conservancy 2014 Instream Leasing Program

#### Policy Concerning Weeds & Instream Leases Information on Farm Deferral & Lease Payment

The Deschutes River Conservancy is dedicated to restoring stream flow and improving water quality in the Deschutes Basin; land stewardship is a component of these goals.

#### **Weed Policy**

The DRC expects participants in the Leasing Program will continue to exercise agricultural best management practices on lands enrolled in the Program, particularly with respect to the control of noxious and/or nuisance weeds. Failure to control weeds on leased acres may result in exclusion from Program compensation.

*Information and Resources Attached*

#### **Farm Deferral Notice**

Instream leasing is a beneficial use that protects your water right from forfeiture and allows for compensation for this instream use, but please note that it does not automatically protect against loss of farm use special assessment. Exclusive Farm Use (EFU) zoned lands may still require at least minimal use with the intent to make a profit. It is the landowner's responsibility to know their tax assessment status and qualifying uses.

*Information and Resources Attached*

**Donated Leases:** One year and multi-year leases of less than 10 acres, leases with public entities, leases submitted after the due date, and leases with verified weed complaints are not paid a per acre or per acre-foot rate by the DRC.

I, GARY L. Echelberger understand the DRC weed policy and have  
*Print Name*  
been informed about farm deferral and donations.
