# Memo

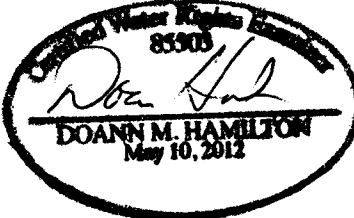

**To:** Oregon Water Resources Department / Lisa Jaramillo  
**From:** Doann Hamilton, CWRE  
**CC:**  
**Date:** April 27, 2020  
**Re:** Stauffer Farms transfer T-13247

---

On September 10, 2019 we submitted transfer T-13247 for our client Stauffer Farm. At this time the file has not been assigned a case worker. Upon reviewing our application we realized we needed to add an additional well to the application. Corrections have been made to the maps and application to reflect these changes.

Attached are the corrected maps and pages of the application to reflect these changes.

NOT

Professional Engineer Seal for Doann M. Hamilton, No. 83903, dated May 10, 2012.

June 30 2021

## Part 5a of 5e – Water Right Information

Please use a separate Part 5 for each water right being changed. See instructions on page 6, to copy and paste additional Part 5s, or to add additional rows to tables within the form.

**CERTIFICATE # 29406**

### Description of Water Delivery System

System capacity: 0.22 cubic feet per second (cfs) OR  
 \_\_\_\_\_ gallons per minute (gpm)

Describe the current water delivery system or the system that was in place at some time within the last five years. Include information on the pumps, canals, pipelines, and sprinklers used to divert, convey, and apply the water at the authorized place of use. **The authorized well is tied into the 6-inch mainline that connects all the proposed wells to supply drip lines to irrigate the place of use.**

**Table 1. Location of Authorized and Proposed Point(s) of Diversion (POD) or Appropriation (POA)**  
 (Note: If the POD/POA name is not specified on the certificate, assign it a name or number here.)

**Table 3. Construction of Point(s) of Appropriation**

Any well(s) in this listing must be clearly tied to corresponding well(s) described in Table 1 and shown on the accompanying application map. Failure to provide the information will delay the processing of your transfer application until it is received. The information is necessary for the department to assess whether the proposed well(s) will access the same source aquifer as the authorized point(s) of appropriation (POA). The Department is prohibited by law from approving POA changes that do not access the same source aquifer.

Proposed or Authorized POA Name or Number	Is well already built? ## Part 5e of 5e – Water Right Information

Please use a separate Part 5 for each water right being changed. See instructions on page 6, to copy and paste additional Part 5s, or to add additional rows to tables within the form.

**CERTIFICATE # 89385**

### Description of Water Delivery System

System capacity: 1.06 cubic feet per second (cfs) OR

\_\_\_\_\_ gallons per minute (gpm)

Describe the current water delivery system or the system that was in place at sometime within the last five years. Include information on the pumps, canals, pipelines, and sprinklers used to divert, convey, and apply the water at the authorized place of use. **Water is pumped primarily from Well 2 with Well 1 as a backup, each using a 50 Hp turbine pump. The water is conveyed through a combined 6-inch buried PVC mainline with two sand filter stations. From the northern sand filter station, the 6-inch PVC mainline runs north-south with an additional line running east-west. The east-west line has a hydrant at the west end to attach 6-inch portable aluminum mainlines. Both of these main lines are equipped with hydrants which can be connected to hard-hose travelers to cover the acres to the west and north. Additional 6-inch buried mainlines to the north have laterals to connect additional drip lines to cover the southern acres.**

**Table 1. Location of Authorized and Proposed Point(s) of Diversion (POD) or Appropriation (POA)**

(Note: If the POD/POA name is not specified on the certificate, assign it a name or number here.)
