Part 2 of 5 – Temporary Transfer Application Map Checklist

RECEIVED

Your temporary transfer application will be returned if any of the map requirements listed below are not met.

JUN 29 2020

QWRD

Please be sure that the temporary transfer application map you submit includes all the required items and matches the existing water right map. Check all boxes that apply.

- ☐ ☒ N/A If **more than three** water rights are involved, separate maps are needed for each water right.
- ☒ Permanent quality printed with dark ink on good quality paper.
- ☒ The size of the map can be 8½ x 11 inches, 8½ x 14 inches, 11 x 17 inches, or up to 30 x 30 inches. For 30 x 30 inch maps, one extra copy is required.
- ☒ A north arrow, a legend, and scale.
- ☒ The scale of the map must be: 1 inch = 400 feet, 1 inch = 1,320 feet; the scale of the Final Proof/Claim of Beneficial Use Map (the map used when the permit was certificated); the scale of the county assessor map if the scale is not smaller than 1 inch = 1,320 feet; or a scale that has been pre-approved by the Department.
- ☒ Township, Range, Section, ¼ ¼, DLC, Government Lot, and other recognized public land survey lines.
- ☒ Tax lot boundaries (property lines) are required. Tax lot numbers are recommended.
- ☒ Major physical features including rivers and creeks showing direction of flow, lakes and reservoirs, roads, and railroads.
- ☒ Major water delivery system features from the point(s) of diversion/appropriation such as main pipelines, canals, and ditches.
- ☒ Existing place of use that includes separate hachuring for each water right, priority date, and use including number of acres in each quarter-quarter section, government lot, or in each quarter-quarter section as projected within government lots, donation land claims, or other recognized public land survey subdivisions. If less than the entirety of the water right is being changed, a separate hachuring is needed for lands left unchanged.
- ☒ ☐ N/A Proposed temporary place of use that includes separate hachuring for each water right, priority date, and use including number of acres in each quarter-quarter section, government lot, or in each quarter-quarter section as projected within government lots, donation land claims, or other recognized public land survey subdivisions.
- ☒ Existing point(s) of diversion or well(s) with distance and bearing or coordinates from a recognized survey corner. This information can be found in your water right certificate or permit.
- ☐ ☒ N/A If you are proposing a change in point(s) of diversion or well(s) to convey water to the new temporary place of use, show the proposed location and label it clearly with distance and bearing or coordinates. If GPS coordinates are used, latitude-longitude coordinates may be expressed as either degrees-minutes-seconds with at least one digit after the decimal (example – 42°32'15.5") or degrees-decimal with five or more digits after the decimal (example – 42.53764°).

Please use a separate Part 5 for each water right being changed. See instructions on page 6, to copy and paste additional Part 5s, or to add rows to tables within the form.

Water Right Certificate # 25399

Description of Water Delivery System

System capacity: 0.85 cubic feet per second (cfs) OR gallons per minute (gpm)

Describe the current water delivery system or the system that was in place at some time within the last five years. Include information on the pumps, canals, pipelines, and sprinklers used to divert, convey, and apply the water at the authorized place of use. Water conveyed by ditch from POD #1 to fields.

For Place of Use Changes

Are there other water right certificates, water use permits or ground water registrations associated with the "from" or the "to" lands? ☒ Yes ☐ No

If YES, list the certificate, water use permit, or ground water registration numbers: C-30950

Pursuant to ORS 540.525, any "layered" water use such as an irrigation right that is supplemental to a primary right proposed for temporary transfer can be included in the transfer or remain unused on the authorized place of use. If the primary water right does not revert soon enough to allow use of the supplemental right within five years, the supplemental right shall become subject to cancellation for nonuse under ORS 540.610.

If a change in point(s) of appropriation (well(s)) or additional point(s) of appropriation is necessary to convey the water to the new temporary place of use you must provide:

- ☐ Well log(s) for each authorized and proposed well(s) that are clearly labeled and associated with the corresponding well(s) in Table 1 above and on the accompanying application map. (Tip: You may search for well logs on the Department's web page at: http://apps.wrd.state.or.us/apps/gw/well_log/Default.aspx)

AND/OR

- ☐ Describe the construction of the authorized and proposed well(s) in Table 3 below for any well that does not have a well log. For a *proposed well(s) not yet constructed or built*, provide "a best estimate" for each requested information element in the table. The Department recommends you consult a licensed well driller, geologist, or certified water right examiner to assist with assembling the information necessary to complete Table 3.

Table 3. Construction of Point(s) of Appropriation

Any well(s) in this listing must be clearly tied to corresponding well(s) described in Table 1 and shown on the accompanying application map. Failure to provide the information will delay the processing of your transfer application until it is received. The information is necessary for the Department to assess whether the proposed well(s) will access the same source aquifer as the authorized point(s) of appropriation (POA). The Department is prohibited by law from approving POA changes that do not access the same source aquifer.

Subject: Temporary transfer map scale

Good morning Kelly,

I'm working on a temporary transfer involving a change in POU and APOD. To show enough detail and get it on
reasonable size sheet of paper I am requesting approval for a map scale of 1"=500'.

Thanks for your consideration,

Take care!! ☺

Re: Humphrey Temporary Water Right Transfer Application

To Whom It May Concern:

This North Fork John Day Watershed Council (NFJDWC) is writing in support of the Temporary Water Rights Transfer Application submitted by Kirk and Regena Humphrey. This temporary water rights transfer proposes transferring 12.3 acres downstream to irrigate more productive pasture ground. Water will come from an authorized POD on Fox Creek and will be delivered by a pipeline installed adjacent to an open ditch. These proposed actions and any restoration efforts (passive or active) that may result as a part of this transfer will benefit the overall ecological function in the Fox Creek watershed. Specifically, encouraging livestock off of Fox Creek addresses the following habitat limiting factors: altered sediment routing, degraded water quality, degraded riparian vegetation, and altered hydrology.

Additionally, converting the delivery system from open conveyance to pipeline will decrease the amount of water lost to evaporation and other inefficiencies. This will increase cold water deliveries to Fox Creek, critical habitat to spawning, rearing, and migrating ESA listed Middle Columbia River Steelhead and spring run Chinook salmon, as more water is made available to soils for storage and release in drier months.

The NFJDWC's mission is to plan, fund, and implement programs that protect the health of our watershed and provide long-term stability for the individuals and communities that rely on the watershed's natural resources. We are committed to working with and assisting the Humphreys as they navigate the various organizations and agencies to address their resource concerns. We look forward to continued partnership with Kirk and Regena as we work towards our common goals of a healthy watershed to sustain local working lands and native fish and wildlife populations. Please feel free to contact me if you have questions.

All the best,
