Additional remarks: In the process of creating the map for this transfer application, it has become apparent that the location of the authorized well as referenced in the certificate is incorrect. Therefore, among other things, this application proposes to re-describe the location of the Authorized well, identified as Well 3 (LINN 10536).

Additionally, the place of use for this water right, Certificate 60433, was apparently established at time of proof under the presumption that the supplemental acres were underlain by groundwater registrations GR-2992, GR-2993, and GR-2994, with no existing rights beneath the primary acres. However, another groundwater registration, GR-2995, exists beneath the primary portion of this right. We believe that the University originally intended for GR-2992, GR-2993, GR-2994, and GR-2995 to completely interlock and cover all, or most of, the place of use now authorized under Certificate 60433. GR-2995 was inexplicably not recognized as an underlying primary right, but it nevertheless exists. GR-2995 is being modified concurrently with this transfer to completely conform with GR-2992, GR-2993, GR-2994, and Certificate 60433. Therefore, it will be necessary to diminish the primary portion of Certificate 60433 to supplemental use in order to eliminate the conflict with the primary use registered under the modified GR-2995. Accordingly, an Affidavit for the Voluntary Partial Diminution of a Water Right Certificate is being submitted concurrently with this transfer application.

For *proposed wells not yet constructed or built*, provide "a best estimate" for each requested information element in the table. The Department recommends you consult a licensed well driller, geologist, or certified water right examiner to assist with assembling the information necessary to complete Table 3.
