## Part 2 of 4 – Instream Lease Application Map Checklist

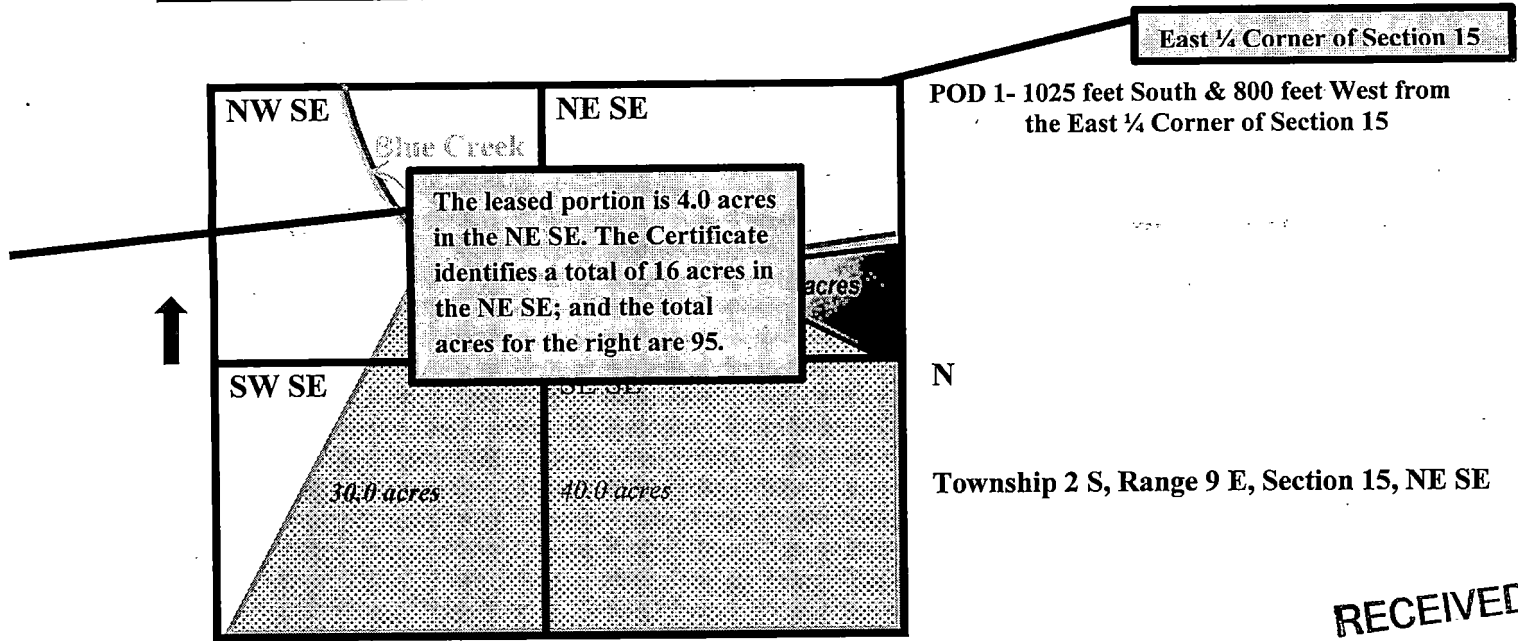

**A Map is generally required for each water right not leased in its entirety**

The application map (if required) should include all the items listed below and match the existing water right(s) of record. Check all boxes that apply.

This should be a simple map. (See example below). A copy of a final proof survey map with the portion to be leased shaded or hachured in will also suffice.

- N/A     A map is required for each water right not leased in its entirety. More than one QQ and property may be included on each map. A map is not required, if leasing the entire right or if the right to be leased is for municipal or quasi-municipal water use.
- The map should be of sufficient quality to be reproducible. Please do not use highlighters to mark items on the map as highlighters do not always copy.
- A North arrow and map scale (no smaller than 1" = 1320').
- Township, Range, Section, quarter quarter (QQ), and a clearly labeled survey corner.
- For irrigation or other similar use, the number of acres to be leased in each quarter-quarter clearly labeled and hachured to differentiate between the acres being leased and any remaining. If the place of use is broken down by more than one priority date, or source stream, and/or point of diversion you must identify each with separate hachuring and clearly label.
- If available, identify the existing point(s) of diversion.

<p><b>Term of the Lease (may be from 1 year up to 5 years):</b>                  The lease is requested to begin in: <u>month June year 2021</u> and end: <u>month Sept year 2026</u>                  Note: The begin month is generally the first month of the irrigation season and the end month is the last month in the irrigation season. If not an irrigation right, this would be the first and last month of your authorized period of allowed use.</p>	
<p><b>Public use:</b> Check the public use(s) this lease will serve (as defined by ORS 537.332):</p> <p><input checked="" type="checkbox"/> Conservation, maintenance and enhancement of aquatic, fish and wildlife, fish and wildlife habitat and any other ecological values.</p> <p><input type="checkbox"/> Recreation</p> <p><input type="checkbox"/> Pollution abatement</p> <p><input type="checkbox"/> Navigation</p>	<p><b>Termination provision (for multiyear leases):</b>  <b>The parties to the lease request (choose one):</b></p> <p><input checked="" type="checkbox"/> a. The parties would not like to include a Termination Provision.</p> <p>(See instructions for limitations to this provision)</p>
<p><b>Additive/Replacing Relationship to other instream water rights:</b> Instream leases are generally additive to other existing instream water rights created as a result of instream leases, transfers and/or allocations of conserved water. Since instream leases are also generally senior to other instream rights created through a state agency process or conversion of minimum flows, they generally replace a portion of these junior instream rights.</p> <p>If you would like this lease to relate to other instream water rights differently, please check this box. <input type="checkbox"/></p> <p>And attach an explanation of your intent.</p>	
<p><b>Validity of the Right(s) to be leased (check the appropriate box):</b></p> <p><input checked="" type="checkbox"/> The water right(s) to be leased have been used under the terms and conditions of the right(s) during the last five years or have been leased instream; or</p> <p><input type="checkbox"/> The water right(s) have not been used for the last five years according to the terms and conditions of the right(s). However, the water right(s) is not subject to forfeiture under ORS 540.610(2). Documentation describing why the water right(s) is not subject to forfeiture is provided.</p>	

**Precedent:** If a right which has been leased is later proposed to be leased again or later transferred or become part of an allocation of conserved water project, a new injury review shall be required. An instream lease shall not set a precedent on a future transaction.

**The undersigned declare:**

1. The Lessor(s) agree during the term of this lease, to suspend use of water allowed under the subject water right(s) and under any appurtenant primary or supplemental water right(s) not involved in the lease application; and
2. The Lessor(s) certify that I/we are the water right holder(s) of the right(s) described in this instream lease application. If not the deeded landowner, I/we have provided documentation with the lease application that I/we have authorization to pursue the lease application and/or have obtained consent from the deeded landowner; and
3. All parties affirm that information provided in this lease application is true and accurate.

### Application Instructions: Part 1 of 4

**Eligible Water Rights:** Surface or Storage water rights subject to Instream Lease include:

1. Certificated rights.
2. Adjudicated rights evidenced by a court decree.
3. Permits or transferred rights upon which satisfactory proof has been made.
4. Conserver's portion of conserved water allocation under ORS 537.445 to 537.500.
5. Secondary water rights for the use of stored water.
6. A Determined Claim in the Upper Klamath Basin determined and established in an order of determination certified by the Water Resources Director under ORS 539.130.

Only valid rights are eligible to be leased to instream use.

- A water right that has not been used for five or more years may no longer be valid under Oregon law. Municipal water rights are the exception.
- If the Department reasonably suspects the right may no longer be valid, it may require an affidavit attesting to the use, along with supporting documentation, and/or deny the lease as incomplete.
- If a water right hasn't been used for five or more years, you may also be able to demonstrate that it's not subject to forfeiture if you qualify for one of the provisions under ORS 540.610(2).

**Deadline for submission:** All Instream Lease Applications have deadlines for submittal. A water right with a seasonal use (such as irrigation) must be submitted prior to July 1; a water right with a year round use (such as industrial use) must be received prior to October 1.

**Fee:** Include the appropriate fee by check or money order made out to the Oregon Water Resources Department. You may also designate an appropriate customer account, if you have one, from which the fee should be deducted. Generally, the Lessee may have an account already set up with the Department. Applications received without the proper fee will be returned.

**Other Water Rights:** It is important to provide an inventory of *all of the water rights appurtenant* to the same lands identified in the lease application. This includes other primary and supplemental rights, even if the rights are still in permit status, and are not included in the lease application. Water rights information can be found via the link above for Water Rights Information Query or the Additional Water Rights Research links above.

**Conservation Reserve Enhancement Program (CREP):** Indicate if some or all of the lands involved in the lease application are enrolled in the CREP program (or other similar Federal Program). The Department will send a copy of the order approving the lease to the Farm Services Administration
