Additional remarks: "From" lands are calculated using the place of use from the COBU for T-12522

For Place of Use Changes

Are there other water right certificates, water use permits or ground water registrations associated with the “from” or the “to” lands? Yes No (Canceled) Now Cert# 95155

If YES, list the certificate, water use permit, or ground water registration numbers: (1) 89511 is included in T-12522, which is currently in process. The COBU has been submitted and the “From” lands are derived from that COBU. (2) Certificate 89305 covers the rest of the field in 4N 26 E sec. 19, as well as adjacent fields, but will not be layered with this proposed transfer. (3) Certificate 90153 is owned by another party and used in the same quarter-quarter sections as proposed in this transfer but are used on separate fields and will not overlap. (4) Permits S-55601, S-55190, S-55192 & S-54633 identify the “To” lands in 2N 28E as supplemental. These permits WILL NOT be used on the lands described in this application, though it is possible that they will be exercised in the same or adjacent quarter-quarter sections.

Pursuant to ORS 540.525, any “layered” water use such as an irrigation right that is supplemental to a primary right proposed for temporary transfer can be included in the transfer or remain unused on the authorized place of use. If the primary water right does not revert soon enough to allow use of the supplemental right within five years, the supplemental right shall become subject to cancellation for nonuse under ORS 540.610.

If a change in point(s) of appropriation (well(s)) or additional point(s) of appropriation is necessary to convey the water to the new temporary place of use you must provide:

- Well log(s) for each authorized and proposed well(s) that are clearly labeled and associated with the corresponding well(s) in Table 1 above and on the accompanying application map. (Tip: You may search for well logs on the Department’s web page at: http://apps.wrd.state.or.us/apps/gw/well_log/Default.aspx)

AND/OR

- Describe the construction of the authorized and proposed well(s) in Table 3 below for any well that does not have a well log. For a *proposed well(s) not yet constructed or built*, provide “a best estimate” for each requested information element in the table. The Department recommends you consult a licensed well driller, geologist, or certified water right examiner to assist with assembling the information necessary to complete Table 3.

Table 3. Construction of Point(s) of Appropriation

Any well(s) in this listing must be clearly tied to corresponding well(s) described in Table 1 and shown on the accompanying application map. Failure to provide the information will delay the processing of your transfer application until it is received. The information is necessary for the Department to assess whether the proposed well(s) will access the same source aquifer as the authorized point(s) of appropriation (POA). The Department is prohibited by law from approving POA changes that do not access the same source aquifer.

Proposed or Authorized POA Name or Number	Is well already built?
