- ☒ Part 5 – Information about Water Rights to be Transferred: **How many water rights are to be transferred? 2 List them here: C-25608 & C-25324**
Please include a separate Part 5 for each water right. (See instructions on page 6)

Attachments:

- ☒ Completed Transfer Application Map.
- ☒ Completed Evidence of Use Affidavit and supporting documentation.
- ☐ ☒ N/A Affidavit(s) of Consent from Landowner(s) (if the applicant does not own the land the water right is on.)
- ☐ ☒ N/A Supplemental Form D – For water rights served by or issued in the name of an irrigation district. Complete when the transfer applicant is not the irrigation district.
- ☒ ☐ N/A Oregon Water Resources Department's Land Use Information Form with approval and signature (or signed land use form receipt stub) from each local land use authority in which water is to be diverted, conveyed, and/or used. Not required if water is to be diverted, conveyed, and/or used only on federal lands or if all of the following apply: a) a change in place of use only, b) no structural changes, c) the use of water is for irrigation only, and d) the use is located within an irrigation district or an exclusive farm use zone.
- ☐ ☒ N/A Water Well Report/Well Log for changes in point(s) of appropriation (well(s)) or additional point(s) of appropriation.
- ☐ ☒ N/A Geologist Report for a change from a surface water point of diversion to a ground water point of appropriation (well), if the proposed well is more than 500' from the surface water source and more than 1000' upstream or downstream from the point of diversion. See OAR 690-380-2130 for requirements and applicability.

Part 2 of 5 – Transfer Application Map

MAY 03 2021

Your transfer application will be returned if any of the map requirements listed below are not met.

OWRD

Please be sure that the transfer application map you submit includes all the required items and matches the existing water right map. Check all boxes that apply.

- ☒ ☐ N/A Certified Water Right Examiner (CWRE) Stamp and Original Signature. For a list of CWREs, see http://apps.wrd.state.or.us/apps/wr/cwre_license_view/. CWRE stamp and signature are not required for substitutions.
- ☐ ☒ N/A If **more than three** water rights are involved, separate maps are needed for each water right.
- ☒ Permanent quality printed with dark ink on good quality paper.
- ☒ The size of the map can be 8½ x 11 inches, 8½ x 14 inches, 11 x 17 inches, or up to 30 x 30 inches. For 30 x 30 inch maps, one extra copy is required.
- ☒ A north arrow, a legend, and scale.
- ☒ The scale of the map must be: 1 inch = 400 feet, 1 inch = 1,320 feet, the scale of the Final Proof/Claim of Beneficial Use Map (the map used when the permit was certificated), the scale of the county assessor map if the scale is not smaller than 1 inch = 1,320 feet, or a scale that has been pre-approved by the Department.
- ☒ Township, Range, Section, ¼ ¼, DLC, Government Lot, and other recognized public land survey lines.
- ☒ Tax lot boundaries (property lines) are required. Tax lot numbers are recommended.
- ☒ Major physical features including rivers and creeks showing direction of flow, lakes and reservoirs, roads, and railroads.
- ☒ Major water delivery system features from the point(s) of diversion/appropriation such as main pipelines, canals, and ditches.
- ☒ Existing place of use that includes separate hachuring for each water right, priority date, and use including number of acres in each quarter-quarter section, government lot, or in each quarter-quarter section as projected within government lots, donation land claims, or other recognized public land survey subdivisions. If less than the entirety of the water right is being changed, a separate hachuring is needed for lands left unchanged.
- ☒ ☐ N/A Proposed place of use that includes separate hachuring for each water right, priority date, and use including number of acres in each quarter-quarter section, government lot, or in each quarter-quarter section as projected within government lots, donation land claims, or other recognized public land survey subdivisions.
- ☒ Existing point(s) of diversion or well(s) with distance and bearing or coordinates from a recognized survey corner. This information can be found in your water right certificate or permit.
- ☒ ☐ N/A If you are proposing a change in point(s) of diversion or well(s), show the proposed location and label it clearly with distance and bearing or coordinates. If GPS coordinates are used, latitude-longitude coordinates may be expressed as either degrees-minutes-seconds with at least one digit after the decimal (example – 42°32'15.5") or degrees-decimal with five or more digits after the decimal (example – 42.53764°).

*Example for Line 5a calculation to transfer 45.0 acres of Primary Certificate 12345 (total 1.25 cfs for 100 acres) and 45.0 acres of Supplemental Certificate 87654 (1/80 cfs per acre) on the same land:

- For irrigation calculate cfs for each water right involved as follows:
 - Divide total authorized cfs by total acres in the water right (*for C12345, 1.25 cfs ÷ 100 ac*); then multiply by the number of acres to be transferred to get the transfer cfs (*x 45 ac = 0.56 cfs*).
 - If the water right certificate does not list total cfs, but identifies the allowable use as 1/40 or 1/80 of a cfs per acre; multiply number of acres proposed for change by either 0.025 (1/40) or 0.0125 (1/80). (*For C87654, 45.0 ac x 0.0125 cfs/ac = 0.56 cfs*)
- Add cfs for the portions of water rights on all the land included in the transfer; however do not count cfs for supplemental rights on acreage for which you have already calculated the cfs fee for the primary right on the same land. The fee should be assessed only once for each "on the ground" acre included in the transfer. (*In this example, blank 5a would be only 0.56 cfs, since both rights serve the same 45.0 acres. Blank 5b would be 0 and Line 5 would then also become 0*).

Is the applicant the sole owner of the land on which the water right, or portion thereof, proposed for transfer is located? ☒ Yes ☐ No If NO, include signatures of all deeded landowners (and mailing and/or e-mail addresses if different than the applicant's) or attach affidavits of consent (and mailing and/or e-mail addresses) from all landowners or individuals/entities to which the water right(s) were conveyed.

Check the following boxes that apply:

- ☒ The applicant is responsible for completion of change(s). Notices and correspondence should continue to be sent to the applicant.
- ☐ The receiving landowner will be responsible for completing the proposed change(s) after the final order is issued. Copies of notices and correspondence should be sent to this landowner.
- ☐ Both the receiving landowner and applicant will be responsible for completion of change(s). Copies of notices and correspondence should be sent to this landowner and the applicant.

At this time, are the lands in this transfer application in the process of being sold? ☐ Yes ☒ No

If YES, and you know who the new landowner will be, please complete the receiving landowner information table below. If you do not know who the new landowner will be, then a request for assignment will have to be filed for at a later date.

If a property sells, the certificated water right(s) located on the land belong to the new owner, unless a sale agreement or other document states otherwise. For more information see: https://www.oregon.gov/owrd/WRDFormsPDF/Transfer_Property_Transactions.pdf

For Place of Use or Character of Use Changes

Are there other water right certificates, water use permits or ground water registrations associated with the "from" or the "to" lands? ☐ Yes ☒ No

If YES, list the certificate, water use permit, or ground water registration numbers: N/A.

Pursuant to ORS 540.510, any "layered" water use such as an irrigation right that is supplemental to a primary right proposed for transfer must be included in the transfer or be cancelled. Any change to a ground water registration must be filed separately in a ground water registration modification application.

AND/OR

N/A Describe the construction of the authorized and proposed well(s) in Table 3 for any wells that do not have a well log. For *proposed wells not yet constructed or built*, provide "a best estimate" for each requested information element in the table. The Department recommends you consult a licensed well driller, geologist, or certified water right examiner to assist with assembling the information necessary to complete Table 3.

Table 3. Construction of Point(s) of Appropriation

Any well(s) in this listing must be clearly tied to corresponding well(s) described in Table 1 and shown on the accompanying application map. Failure to provide the information will delay the processing of your transfer application until it is received. The information is necessary for the department to assess whether the proposed well(s) will access the same source aquifer as the authorized point(s) of appropriation (POA). The Department is prohibited by law from approving POA changes that do not access the same source aquifer.

Any well(s) in this listing must be clearly tied to corresponding well(s) described in Table 1 and shown on the accompanying application map. Failure to provide the information will delay the processing of your transfer application until it is received. The information is necessary for the department to assess whether the proposed well(s) will access the same source aquifer as the authorized point(s) of appropriation (POA). The Department is prohibited by law from approving POA changes that do not access the same source aquifer.

NOTE TO APPLICANTS

OWRD

In order for your application to be processed by the Water Resources Department (WRD), this Land Use Information Form must be completed by a local government planning official in the jurisdiction(s) where your water right will be used and developed. The planning official may choose to complete the form while you wait, or return the receipt stub to you. Applications received by WRD without the Land Use Form or the receipt stub will be returned to you. Please be aware that your application will not be approved without land use approval.

This form is NOT required if:

- 1) Water is to be diverted, conveyed, and/or used only on federal lands; **OR**
- 2) The application is for a water right transfer, allocation of conserved water, exchange, permit amendment, or ground water registration modification, and all of the following apply:
 - a) The existing and proposed water use is located entirely within lands zoned for exclusive farm-use or within an irrigation district;
 - b) The application involves a change in place of use only;
 - c) The change does not involve the placement or modification of structures, including but not limited to water diversion, impoundment, distribution facilities, water wells and well houses; and
 - d) The application involves irrigation water uses only.

NOTE TO LOCAL GOVERNMENTS

The person presenting the attached Land Use Information Form is applying for or modifying a water right. The Water Resources Department (WRD) requires its applicants to obtain land-use information to be sure the water rights do not result in land uses that are incompatible with your comprehensive plan. Please complete the form or detach the receipt stub and return it to the applicant for inclusion in their water right application. You will receive notice once the applicant formally submits his or her request to the WRD. The notice will give more information about WRD's water rights process and provide additional comment opportunities. You will have 30 days from the date of the notice to complete the land-use form and return it to the WRD. If no land-use information is received from you within that 30-day period, the WRD may presume the land use associated with the proposed water right is compatible with your comprehensive plan. Your attention to this request for information is greatly appreciated by the Water Resources Department. If you have any questions concerning this form, please contact the WRD's Customer Service Group at 503-986-0801.

In the Matter of Instream Lease Application	)	CORRECTING AND SUPERSEDING
IL-1676, Grant County	)	FINAL ORDER ON INSTREAM
	)	LEASE

Authority

Oregon Revised Statute (ORS) 537.348 establishes the process in which a water right holder may submit a request to lease an existing water right for instream purposes. Oregon Administrative Rule (OAR) Chapter 690, Division 077 implements the statutes and provides the Department's procedures and criteria for evaluating instream lease applications.

Findings of Fact

1. On April 16, 2018, the MGN, LLC/Garner Anthony and TFT filed an application involving the entirety of Certificates 25324 and 25608. The Department assigned the application number IL-1676.
2. On June 25, 2018, the Department issued an order approving Instream Lease IL-1676, as evidenced by Special Order Volume 108, Page 709. Following issuance of the order, a scrivener's error was identified in the order. This order is being issued to correctly describe the instream reaches and the conditions within the order.
3. The first right to be leased is as follows:

Certificate:	25324 in the name of San Anselmo (perfected under the John Day Decree of Record at Salem in the Order Record of the Water Resources Director, in Volume 15, Page 461.)
Use:	Irrigation of 42.2 acres
Season of Use:	April 1 through September 30
Priority Date:	1883

This is a final order in other than contested case. This order is subject to judicial review under ORS 183.484. Any petition for judicial review must be filed within the 60 day time period specified by ORS 183.484(2). Pursuant to ORS 536.075 and OAR 137-004-0080 you may either petition for judicial review or petition the Director for reconsideration of this order. A petition for reconsideration may be granted or denied by the Director, and if no action is taken within 60 days following the date the petition was filed, the petition shall be deemed denied.

4. Certificate 25324 does not specify the location of the point of diversion. However, based upon review of the application, it appears that, for the purposes of this instream lease, the point of diversion is located as follows:

Twp	Rng	Mer	Sec	Q-Q	Coordinates
11 S	30 E	WM	08	SE NE	Latitude 44.6274 Longitude -119.1233

5. The second right to be leased is as follows:

Certificate: 25608 in the name of C.W. Mulligan (perfected under the John Day Decree of Record at Salem in the Order Record of the Water Resources Director, in Volume 15, Page 461.)

Use: Irrigation of 15.0 acres, being 6.3 acres from POD 1, and 8.7 acres from POD 2

Season of Use: April 1 through September 30

Priority Date: 1884

Quantity: **Rate:** 0.57 Cubic Foot per Second (CFS), being 0.24 from POD 1 and 0.33 from POD 2
Volume: 60.0 Acre-Feet (AF), being 25.2 AF from POD 2 and 34.8 AF from POD 2

Limit1: 1/40 CFS per acre irrigated prior to June 1 and 1/80 CFS per acre thereafter; further limited to one acre-foot per calendar month prior to June 1, but not to exceed four acre-feet per acre during season April to September 30, measured at the point of diversion.

Total Acres					8.7	

6. Certificate 25608 does not specify the locations of the points of diversion. However, based upon review of the application, it appears that, for the purposes of this instream lease, the point of diversion is located as follows:

Source	Twp	Rng	Mer	Sec	Q-Q	Coordinates	POD
Murphy Creek	11 S	30 E	WM	09	SE SW	Latitude 44.6214 Longitude -119.1149	1
Fox Creek	11 S	30 E	WM	09	SE NW	Latitude 44.627 Longitude -119.116194	2

7. The lease application includes the information required under OAR 690-077-0076(3). The Department provided notice of the lease application pursuant to OAR 690-077-0077(1). No comments were received.
8. Approximately 1% per mile streamflow losses due to evaporation and seepage occur immediately below the PODs on Fox Creek and into Cottonwood Creek. The quantities that may be protected may be adjusted to prevent injury to downstream water users and enlargement of the right.
9. A portion of the water diverted at the Fox Creek PODs returns to the source. To prevent injury and enlargement, the quantity of water that may be protected instream requires modification to account for surface return flows. The watermaster requests that only the consumptive portion of the water be protected to prevent injury of downstream junior appropriators and to prevent enlargement. Consumptive use in the CUENCA Dayville/Canyon City Zone (placement determined by lat-long coordinates of the PODs is 2.44 ac-ft/irrigation season plus a 10% increase to account for higher elevations and wind, for a total of 2.7 ac-ft/irrigation season. The volumes protected instream are calculated at 2.7 ac-ft per acre.
10. The Applicants requested water be protected instream from each POD as described in Findings of Facts Nos. 4 and 6 into Cottonwood Creek to its confluence with the North Fork John Day River, which is an approximate 36 mile reach. An instream reach is generally from the point of diversion to the mouth of the source streams, Fox and Murphy Creeks, but may be protected further if the quantity of the water to be protected instream is a measureable portion of the flow in the receiving stream. (OAR 690-007-0015(8)). The quantity of water to be protected instream from Murphy and Fox Creeks is not a measureable portion of Cottonwood Creek and, therefore, cannot be protected in Cottonwood Creek.
11. The proposed protected instream reaches are modified to be from the PODs described in Findings of Fact Nos. 4 and 6, above, only to the mouth of Fox Creek due to the reason stated in Finding of Fact No. 10, above.

MAY 03 2021

12. A portion of the water diverted at the Fox Creek PODs returns to the source. To prevent injury and enlargement, the quantity of water that may be protected instream requires modification to account for surface return flows.
13. The instream use has been modified from the original lease application to prevent injury and enlargement as is as follows:

14. Other conditions to prevent injury and enlargement are:

Within the specified stream reach, the amount of water to which this right is entitled shall not exceed the quantity of water legally available at the original point of diversion. Stream channel losses and gains calculated based on available data and the use of water by senior appropriators will determine the amount of water to which this right is entitled downstream from the original points of diversion within the specified stream reach.

15. The amount and timing of the proposed instream flow is allowable within the limits and use of the original water rights.

16. The protection of flows at the authorized point of diversions is appropriate, considering:

- The instream water use begins at the recorded point of diversion;
- The location of confluences with other streams downstream of the point of diversion.
- There are known losses to stream flow due to evaporation and seepage as identified in Finding of Fact No. 8. The instream rights will be conditioned as identified in Finding of Fact No. 13.
- Return flows resulting from the exercise of the existing water right would re-enter the river within the reach of the instream water right below the PODs as identified in Finding of Fact No. 9. The instream rights will be conditioned as identified in Finding of Fact No. 13.

17. The total monthly quantities of water to be protected under the existing and proposed instream rights in the reach will provide for a beneficial purpose.

18. The total monthly quantities of water to be protected instream under existing and proposed instream rights in the reach do not exceed the estimated average natural flow. The instream right established by this instream lease shall replace a portion of instream rights established pursuant to ORS 537.341 or 537.346 and shall be in addition to instream water rights established pursuant to ORS 537.348 or 537.470.

MAY 03 2021

19. If approved, this instream lease is not reasonably expected to significantly affect land use as prescribed by ORS 197.180, OAR Chapter 660, Divisions 30 and 31, and OAR Chapter 690, **OWRD** Division 5.
20. Based upon review of the application, information provided by the Department's Watermaster, and other available information, as conditioned, the Department finds that the lease will not result in injury or enlargement. The order approving this instream lease may be modified or revoked under OAR 690-077-0077 if the Department later finds that the lease is causing injury to any existing water right or enlargement of the original right.
21. If a right which has been leased is later proposed to be leased again, transferred and/or reviewed under an allocation of conserved water, a new injury review shall be required. For example, instream transfers will be subject to a full and complete review to determine consistency with the requirements of OAR Chapter 690, Division 380 and Division 077. Approval of this lease does not establish a precedent for approval of any future transactions.
22. The Lessor and Lessee have requested that the lease terminate on September 30, 2018. The lease has been submitted prior to the first day of the irrigation season. The lease may commence on the date this final order is signed.

Conclusions of Law

The Department concludes that the lease will not result in injury or enlargement, OAR 690-077-0077. The lease conforms to the applicable provisions of OAR 690-077-0015.

Now, therefore it is ORDERED:

1. The Lease as described herein is APPROVED.
2. This correcting order supersedes Special Order Volume 108 Pages 709-714.
3. During the term of the lease, the former place of use will no longer receive water as part of these rights, any supplemental rights, or any other layered irrigation water rights, including ground water registrations and permits.
4. The term of the lease will commence upon approval of the instream lease and terminate on September 30, 2018.
