Additional remarks: Certificate 20351 allows for the use of live flow from an unnamed stream. The POD identified in the certificate is the location on the stream where water was diverted to the reservoir. The apparent intent was to allow diversion of live flow from the stream into the reservoir during the irrigation season, with subsequent re-diversion from the reservoir, thus using the reservoir as a bulge in the system. However, the certificate does not specify a location for the point of re-diversion from the reservoir. This application, among other things,

Additional remarks: Certificate 47384 allows for the use of live flow from an unnamed stream, along with the use of water stored in the reservoir constructed under Permit R-2020. The POD identified in the certificate is the location on the stream where water was diverted to the reservoir. In addition to allowing the use of stored water, the apparent intent was to allow diversion of live flow from the stream into the reservoir during the irrigation season, with subsequent re-diversion from the reservoir, thus using the reservoir as a bulge in the system. However, the
