Part 1 of 5 – Minimum Requirements Checklist

This transfer application will be returned if Parts 1 through 5 and all required attachments are not completed and included.

For questions, please call (503) 986-0900, and ask for Transfer Section.

Check all items included with this application. (N/A = Not Applicable)

- ☒ Part 1 – Completed Minimum Requirements Checklist.
- ☒ Part 2 – Completed Transfer Application Map Checklist.
- ☒ Part 3 – Application Fee, payable by check to the Oregon Water Resources Department, and completed Fee Worksheet, page 3. Try the new online fee calculator at:
http://apps.wrd.state.or.us/apps/misc/wrd_fee_calculator.
- ☒ Part 4 – Completed Applicant Information and Signature.
- ☒ Part 5 – Information about Water Rights to be Transferred: **How many water rights are to be transferred? 2 List them here: 93255 & 94893**
Please include a separate Part 5 for each water right. (See instructions on page 6)
NOTE: A separate transfer application is required for each water right unless the criteria in OAR 690-380-3220 are met.

Attachments:

- ☒ Completed Transfer Application Map.
- ☒ Completed Evidence of Use Affidavit and supporting documentation.
- ☒ ☐ N/A Affidavit(s) of Consent from Landowner(s) (if the applicant does not own the land the water right is on.)
- ☒ ☐ N/A Supplemental Form D – For water rights served by or issued in the name of an irrigation district. Complete when the transfer applicant is not the irrigation district.
- ☒ ☐ N/A Oregon Water Resources Department's Land Use Information Form with approval and signature (or signed land use form receipt stub) from each local land use authority in which water is to be diverted, conveyed, and/or used. Not required if water is to be diverted, conveyed, and/or used only on federal lands or if all of the following apply: a) a change in place of use only, b) no structural changes, c) the use of water is for irrigation only, and d) the use is located within an irrigation district or an exclusive farm use zone.
- ☒ ☐ N/A Water Well Report/Well Log for changes in point(s) of appropriation (well(s)) or additional point(s) of appropriation.
- ☐ ☒ N/A Geologist Report for a change from a surface water point of diversion to a ground water point of appropriation (well), if the proposed well is more than 500' from the surface water source and more than 1000' upstream or downstream from the point of diversion. See OAR 690-380-2130 for requirements and applicability.

Part 2 of 5 – Transfer Application Map

Your transfer application will be returned if any of the map requirements listed below are not met.

Please be sure that the transfer application map you submit includes all the required items and matches the existing water right map. Check all boxes that apply.

- ☒ ☐ N/A Certified Water Right Examiner (CWRE) Stamp and Original Signature. For a list of CWREs, see http://apps.wrd.state.or.us/apps/wr/cwre_license_view/. CWRE stamp and signature are not required for substitutions.
- ☒ ☐ N/A If **more than three** water rights are involved, separate maps are needed for each water right.
 - ☒ Permanent quality printed with dark ink on good quality paper.
 - ☒ The size of the map can be 8½ x 11 inches, 8½ x 14 inches, 11 x 17 inches, or up to 30 x 30 inches. For 30 x 30 inch maps, one extra copy is required.
 - ☒ A north arrow, a legend, and scale.
 - ☒ The scale of the map must be: 1 inch = 400 feet, 1 inch = 1,320 feet, the scale of the Final Proof/Claim of Beneficial Use Map (the map used when the permit was certificated), the scale of the county assessor map if the scale is not smaller than 1 inch = 1,320 feet, or a scale that has been pre-approved by the Department.
 - ☒ Township, Range, Section, ¼ ¼, DLC, Government Lot, and other recognized public land survey lines.
 - ☒ Tax lot boundaries (property lines) are required. Tax lot numbers are recommended.
 - ☒ Major physical features including rivers and creeks showing direction of flow, lakes and reservoirs, roads, and railroads.
 - ☒ Major water delivery system features from the point(s) of diversion/appropriation such as main pipelines, canals, and ditches.
 - ☒ Existing place of use that includes separate hachuring for each water right, priority date, and use including number of acres in each quarter-quarter section, government lot, or in each quarter-quarter section as projected within government lots, donation land claims, or other recognized public land survey subdivisions. If less than the entirety of the water right is being changed, a separate hachuring is needed for lands left unchanged.
- ☒ ☐ N/A Proposed place of use that includes separate hachuring for each water right, priority date, and use including number of acres in each quarter-quarter section, government lot, or in each quarter-quarter section as projected within government lots, donation land claims, or other recognized public land survey subdivisions.
- ☒ Existing point(s) of diversion or well(s) with distance and bearing or coordinates from a recognized survey corner. This information can be found in your water right certificate or permit.
- ☒ ☐ N/A If you are proposing a change in point(s) of diversion or well(s), show the proposed location and label it clearly with distance and bearing or coordinates. If GPS coordinates are used, latitude-longitude coordinates may be expressed as either degrees-minutes-seconds with at least one digit after the decimal (example – 42°32'15.5") or degrees-decimal with five or more digits after the decimal (example – 42.53764°).

8	Subtract line 7 from line 6 » Transfer Fee:	8 \$6,270

***Example for Line 5a calculation to transfer 45.0 acres of Primary Certificate 12345 (total 1.25 cfs for 100 acres) and 45.0 acres of Supplemental Certificate 87654 (1/80 cfs per acre) on the same land:**

1. For irrigation calculate cfs for each water right involved as follows:
 - a. Divide total authorized cfs by total acres in the water right (*for C12345, 1.25 cfs ÷ 100 ac*); then multiply by the number of acres to be transferred to get the transfer cfs (*x 45 ac = 0.56 cfs*).
 - b. If the water right certificate does not list total cfs, but identifies the allowable use as 1/40 or 1/80 of a cfs per acre; multiply number of acres proposed for change by either 0.025 (1/40) or 0.0125 (1/80). (*For C87654, 45.0 ac x 0.0125 cfs/ac = 0.56 cfs*)
2. Add cfs for the portions of water rights on all the land included in the transfer; however **do not count cfs for supplemental rights on acreage for which you have already calculated the cfs fee for the primary right on the same land**. The fee should be assessed only once for each "on the ground" acre included in the transfer. (*In this example, blank 5a would be only 0.56 cfs, since both rights serve the same 45.0 acres. Blank 5b would be 0 and Line 5 would then also become 0*).

2	Multiply line 2b by \$480 and enter » » » » » » » » » » » » » » »	2	
3	Add entries on lines 1 through 2 above » » » » » » Fee for Substitution:	3

By my signature below, I confirm that I understand:

- Prior to Department approval of the transfer application, I may be required to submit payment to the Department for publication of a notice in a newspaper with general circulation in the area where the water right is located, once per week for two consecutive weeks. If more than one qualifying newspaper is available, I suggest publishing the notice in the following newspaper: **BEND BULLETIN.**
- Amendments to the application may only be made in response to the Department's Draft Preliminary Determination (DPD). The applicant will have a period of at least 30 days to amend the application to address any issues identified by the Department in the DPD, or to withdraw the application. Note that amendments may be subject to additional fees, pursuant to ORS 536.050.
- Failure to complete an approved change in place of use and/or change in character of use, will result in loss of the water right (OAR 690-380-6010).
- Refunds may only be granted upon request and, as set forth in ORS 536.050(4)(a), if the Director determines that a refund of all or part of a fee is appropriate in the interests of fairness to the public or necessary to correct an error of the Department.

I (we) affirm that the information contained in this application is true and accurate.

Is the applicant the sole owner of the land on which the water right, or portion thereof, proposed for transfer is located? ☐ Yes ☒ No*

*If NO, include signatures of all deeded landowners (and mailing and/or e-mail addresses if different than the applicant's) or attach affidavits of consent (and mailing and/or e-mail addresses) from all landowners or individuals/entities to which the water right(s) were conveyed.

Check the following boxes that apply:

- ☒ The applicant is responsible for completion of change(s). Notices and correspondence should continue to be sent to the applicant.
- ☐ The receiving landowner will be responsible for completing the proposed change(s) after the final order is issued. Copies of notices and correspondence should be sent to this landowner.
- ☐ Both the receiving landowner and applicant will be responsible for completion of change(s). Copies of notices and correspondence should be sent to this landowner and the applicant.

At this time, are the lands in this transfer application in the process of being sold? ☐ Yes ☒ No

If YES, and you know who the new landowner will be, please complete the receiving landowner information table below. If you do not know who the new landowner will be, then a request for assignment will have to be filed for at a later date.

If a property sells, the certificated water right(s) located on the land belong to the new owner, unless a sale agreement or other document states otherwise. For more information see:

For Place of Use or Character of Use Changes

Are there other water right certificates, water use permits or ground water registrations associated with the "from" or the "to" lands? ☒ Yes ☐ No

If YES, list the certificate, water use permit, or ground water registration numbers: **C-94956 IR & C-76714 IS.**

Pursuant to ORS 540.510, any "layered" water use such as an irrigation right that is supplemental to a primary right proposed for transfer must be included in the transfer or be cancelled. Any change to a ground water registration must be filed separately in a ground water registration modification application.

For Substitution (ground water supplemental irrigation will be substituted for surface water primary irrigation)

Ground water supplemental Permit or Certificate # _____;

Surface water primary Certificate # _____.

For a change from Supplemental Irrigation Use to Primary Irrigation Use

Identify the primary certificate to be cancelled. Certificate # _____

For a change in point(s) of appropriation (well(s)) or additional point(s) of appropriation:

- ☒ Well log(s) are attached for each authorized and proposed well(s) that are clearly labeled and associated with the corresponding well(s) in Table 1 above and on the accompanying application map.

Tip: You may search for well logs on the Department's web page at:

http://apps.wrd.state.or.us/apps/gw/well_log/Default.aspx

AND/OR

- ☐ Describe the construction of the authorized and proposed well(s) in Table 3 for any wells that do not have a well log. For *proposed wells not yet constructed or built*, provide "a best estimate" for each requested information element in the table. The Department recommends you consult a licensed well driller, geologist, or certified water right examiner to assist with assembling the information necessary to complete Table 3.

Table 3. Construction of Point(s) of Appropriation

Any well(s) in this listing must be clearly tied to corresponding well(s) described in Table 1 and shown on the accompanying application map. Failure to provide the information will delay the processing of your transfer application until it is received. The information is necessary for the department to assess whether the proposed well(s) will access the same source aquifer as the authorized point(s) of appropriation (POA). The Department is prohibited by law from approving POA changes that do not access the same source aquifer.

Description of Water Delivery System

System capacity: 1.42 cubic feet per second (cfs) OR

_____ gallons per minute (gpm)

Describe the current water delivery system or the system that was in place at some time within the last five years. Include information on the pumps, canals, pipelines, and sprinklers used to divert, convey, and apply the water at the authorized place of use. Water is pumped from Well 2 into Upper Bulge. Water is pumped from Well 4 into Lower Bulge (which has booster pump). Upper Bulge gravity feeds extensive drip line system along the driveway. Both bulges feed, by gravity, the two traveling BIG GUNS.

CERTIFICATE OF WATER RIGHT

THIS CERTIFICATE ISSUED TO

FREUND SPENCER INVESTMENT GROUP LLC
63026 NE LOWER MEADOW DR SUITE 200
BEND OR 97701

confirms the right to the use of water perfected under the terms of Permit G-18016. The amount of water used to which this right is entitled is limited to the amount used beneficially, and shall not exceed the amount specified, or its equivalent in the case of rotation, measured at the point of diversion from the source. The specific limits and conditions of the use are listed below.

APPLICATION FILE NUMBER: G-14494

SOURCE OF WATER: TWO WELLS IN THE CROOKED RIVER BASIN

PURPOSE OR USE: IRRIGATION OF 113.8 ACRES

MAXIMUM RATE: 1.42 CUBIC FEET PER SECOND (CFS), FURTHER LIMITED TO 0.83 CFS FROM WELL 2 AND 0.66 CFS FROM WELL 4, NOT TO EXCEED 1.42 CFS, IN ANY COMBINATION

PERIOD OF USE: MAY 1 THROUGH OCTOBER 15

DATE OF PRIORITY: APRIL 7, 1997

WELL LOCATIONS:

Twp	Rng	Mer	Sec	Q-Q	Measured Distances
15 S	15 E	WM	32	NE SW	WELL 2 - 1750 FEET NORTH AND 2050 FEET EAST FROM SW CORNER, SECTION 32.
15 S	15 E	WM	32	SW NE	WELL 4 - 3690 FEET NORTH AND 2870 FEET EAST FROM SW CORNER, SECTION 32.

The amount of water used for irrigation under this right, together with the amount secured under any other right existing for the same lands, is limited to a diversion of ONE-EIGHTIETH of one cubic foot per second (or its equivalent) and 3.0 acre-feet for each acre irrigated during the irrigation season of each year.

NOTICE OF RIGHT TO PETITION FOR RECONSIDERATION OR JUDICIAL REVIEW

This is an order in other than a contested case. This order is subject to judicial review under ORS 183.484 and ORS 536.075. Any petition for judicial review must be filed within the 60-day time period specified by ORS 183.484(2). Pursuant to ORS 183.484, ORS 536.075 and OAR 137-004-0080, you may petition for judicial review and petition the Director for reconsideration of this order. A petition for reconsideration may be granted or denied by the Director, and if no action is taken within 60 days following the date the petition was filed, the petition shall be deemed denied. In addition, under ORS 537.260 any person with an application, permit or water right certificate subsequent in priority may jointly or severally contest the issuance of the certificate within three months after issuance of the certificate.

THE PLACE OF USE IS LOCATED AS FOLLOWS:

Twp	Rng	Mer	Sec	Q-Q	Acres
15 S	15 E	WM	29	SE SW	1.5
15 S	15 E	WM	32	NW NE	12.3
15 S	15 E	WM	32	SW NE	30.8
15 S	15 E	WM	32	NE NW	30.4
15 S	15 E	WM	32	SE NW	29.8
15 S	15 E	WM	32	NE SW	9.0

The combined quantity of water diverted at the new points of appropriation, together with that diverted at the old point of appropriation, shall not exceed the quantity of water lawfully available at the original point of appropriation, located as follows:

Twp	Rng	Mer	Sec	Q-Q	Measured Distances
15 S	15 E	WM	32	NE SW	WELL 1 (ORIGINAL) - 2435 FEET NORTH AND 2385 FEET EAST FROM SW CORNER, SECTION 32

Water use measurement conditions:

- A. The water user shall maintain the totalizing flow meter or other suitable measuring device as approved by the Director in good working order at each point of appropriation (new and existing).
- B. The water user shall allow the watermaster access to the meters or measuring devices; provided however, where the meters or measuring devices are located within a private structure, the watermaster shall request access upon reasonable notice.
- C. The Director may require the water user to keep and maintain a record of the amount (volume) of water used and may require the water user to report water use on a periodic schedule as established by the Director. In addition, the Director may require the water user to report general water use information, the periods of water use and the place and nature of use of water under the right. The Director may provide an opportunity for the water user to submit alternative reporting procedures for review and approval.

Use of water under authority of this right may be regulated if analysis of data available after the right is issued discloses that the appropriation will measurably reduce the surface water flows necessary to maintain the free-flowing character of a scenic waterway in quantities necessary for recreation, fish and wildlife in effect as of the priority date of the right or as those quantities may be subsequently reduced.

If substantial interference with a senior water right occurs due to withdrawal of water from any well listed on this right, then use of water from the well(s) shall be discontinued or reduced and/or the schedule of withdrawal shall be regulated until or unless the Department approves or implements an alternative administrative action to mitigate the interference. The Department encourages junior and senior appropriators to jointly develop plans to mitigate interferences.

STANDARD CONDITIONS

The wells shall be maintained in accordance with the General Standards for the Construction and Maintenance of Water Wells in Oregon. The works shall be equipped with a usable access port, and may also include an air line and pressure gauge adequate to determine the water level elevation in the well at all times. The Director may require water level or pump test results every ten years.

Failure to comply with any of the provisions of this right may result in action including, but not limited to, restrictions on the use, civil penalties, or cancellation of the right.

RECEIVED

This right is for the beneficial use of water without waste. The water user is advised that new regulations may require the use of best practical technologies or conservation practices to achieve this end.

By law, the land use associated with this water use must be in compliance with statewide land-use goals and any local acknowledged land-use plan.

The use of water shall be limited when it interferes with any prior surface or ground water rights.

The right to the use of the water for the above purpose is restricted to beneficial use on the place of use described.

RE: Supplement Form D for Water Right Transfer Application involving C-93255 and C-94893

To Whom It May Concern:

John Short and Water Rights Services, LLC prepared a draft water right transfer application on behalf of Philip H. Knight and Penelope P. Knight involving C-93255 and C-94893. Because the "ON" lands for the proposed transfer are located within the boundary of Central Oregon Irrigation District (COID) and already receive water delivered by COID pursuant to COID's water rights, Mr. Short notified COID of the proposed transfer and requested that COID consent to the proposed transfer and complete Supplemental Form D.

COID is conditionally consenting to the proposed transfer, and has completed the Supplemental Form D accordingly. The consent is conditioned as set forth below. We would request that this letter be included as part of the record for the proposed transfer, and be taken into consideration by the Department in determining whether to ultimately approve or deny the transfer application.

COID holds two certificates, C-94956, a 1900 primary irrigation right to use Deschutes live flow, and C-76714, a 1913 supplemental irrigation right to use storage from Crane Prairie Reservoir. Both of these certificates are appurtenant to the "ON" lands that are the subject of the transfer application, and the proposed transfer application map places water onto lands fully irrigated by the appurtenant COID water rights.

We have the following comments and concerns:

As an initial matter, the proposed transfer application proposes to change the authorized use under C-93255 and C-94893 from irrigation to nursery use, with the nursery use to be layered with COID's primary irrigation and supplemental irrigation rights "for use when a shortage in district supplied water occurs."

After speaking with the current farm operator for the "ON" lands, Eric Hagerty, we understand that the intention here is to only use the C-93255 and C-94893 water in a truly supplemental manner, in that the operator is only wanting the transferred water in early April or at the end of the irrigation season, and only when COID water is not available and COID is not otherwise delivering water. With that said, COID is not aware of any intention to convert the current farming operation to nursery stock, and absent such conversion, COID is concerned that the transfer cannot be proven up. At a more general level, COID is concerned that transfer applications seeking to change the authorized use of water from irrigation to nursery use—when there will be no bona fide nursery use—amounts to an end-run around the standard approach taken to layering primary and supplemental irrigation rights within irrigation districts.

Related to the above, COID is concerned that if the water under C-93255 and C-94893 is conveyed through the same irrigation system and used at the same time that COID water is also being conveyed and used, then the water will become co-mingled. If so, there will be no way to accurately document use under any transfer order for the required claim of beneficial use report. Similarly, there will be no way to document beneficial use following confirmation and certification of the transfer as well. And along these same lines, if water under C-93255 and C-94893 and water under COID's rights is being used at the same time, it will be impossible to know if and when the water user is exceeding COID's maximum delivery rate.

In sum, COID is consenting to the transfer on condition that if approved, the transfer order will prohibit co-mingling with COID water rights. To accomplish this, the use under the new nursery right should be limited to those times in which COID water is actually unavailable and COID is not otherwise delivering water, or to the months of November through March, when COID water would not be available to support nursery uses. We would note that these are the same conditions that COID requested to be placed on the approval of transfer application T-13793 in the event the Department decides to approve T-13793. This other application involves "ON" lands that are adjacent to the "ON" lands at issue under the immediate proposed transfer application. Finally, our consent is conditioned on the requirements that the nursery rights are limited to actual nursery use and the installation and use of totalizing flow meters to accurately track COID water use separate and apart from any use authorized under the transfer application.

Please let us know if you have any questions or would like to discuss further.

Sincerely,

A handwritten signature in black ink, appearing to read "CH", written over a horizontal line.
