  - Permanent quality printed with dark ink on good quality paper.
  - The size of the map can be 8½ x 11 inches, 8½ x 14 inches, 11 x 17 inches, or up to 30 x 30 inches. For 30 x 30 inch maps, one extra copy is required.
  - A north arrow, a legend, and scale.
  - The scale of the map must be: 1 inch = 400 feet, 1 inch = 1,320 feet, the scale of the Final Proof/Claim of Beneficial Use Map (the map used when the permit was certificated), the scale of the county assessor map if the scale is not smaller than 1 inch = 1,320 feet, or a scale that has been pre-approved by the Department.

**Note:** The authorized POA on Cert. 68545 (Port Well 1; MORR 725) is constructed in a manner that obtains water from the Umatilla Member and Priest Rapids Member water-bearing units within the Columbia River Basalt Group (CRBG). Based on this information, any additional proposed POAs can obtain water from any one well, or combination of wells, tapping these two water-bearing units (up to the allowed rate and duty on Certificate 68545).

Four sites have been identified as locations to potentially install a cluster of up to two new basalt wells. The well clusters are intended to ensure that current well construction standards are met; specifically, the requirement that a well is completed in only one water-bearing zone of the CRBG. The certificate holder anticipates a potential need to complete one well in each of two different target aquifers (the Umatilla Member and Priest Rapids Member) at one or more of these proposed new POA cluster locations. Combined total production from any new additional POA clusters will not exceed the allowed rate and duty of Certificate 68545. However, if the static water levels are consistent between the Umatilla and Priest Rapids Members, and in consultation with OWRD groundwater staff during the well construction process, one well may be constructed to appropriate water from both units. Decisions regarding depths and final construction will be determined during the drilling process, with approval from OWRD groundwater staff.

**For Place of Use or Character of Use Changes**

Are there other water right certificates, water use permits or ground water registrations associated with the "from" or the "to" lands?  Yes  No

If YES, list the certificate, water use permit, or ground water registration numbers:

Permits S-55338, G-17575, G-17516. Certificates 86692, 94437, 90019 (T-13552), 95387, 95389, 90849, 95197, 95383.

Pursuant to ORS 540.510, any "layered" water use such as an irrigation right that is supplemental to a primary right proposed for transfer must be included in the transfer or be cancelled. Any change to a ground water registration must be filed separately in a ground water registration modification application.

Identify the primary certificate to be cancelled. Certificate # N/A

**For a change in point(s) of appropriation (well(s)) or additional point(s) of appropriation:**

- Well log(s) are attached for each authorized and proposed well(s) that are clearly labeled and associated with the corresponding well(s) in Table 1 above and on the accompanying application map.

**Tip:** You may search for well logs on the Department's web page at: **(Attachment E)**

- Describe the construction of the authorized and proposed well(s) in Table 3 for any wells that do not have a well log. For *proposed wells not yet constructed or built*, provide "a best estimate" for each requested information element in the table. The Department recommends you consult a licensed well driller, geologist, or certified water right examiner to assist with assembling the information necessary to complete Table 3.

\*The water year is named for the calendar year in which it ends. Example: the 2014 water year begins Oct. 1, 2013 and ends Sep. 30, 2014.

**Method(s) of Measurement:**

FMT Flowmeter (recording monthly readings and then reporting the difference between one month's reading and the next)

- Monthly amounts indicate:
  - For diverted rights, the total amount diverted during the month;
  - For storage rights, the amount generally stored in the reservoir/pond during the month, as represented by the volume of water impounded on approximately the same day each month.
- Water Use amounts have all been converted to "acre-feet" (AF), regardless of the original measurement unit reported. One AF is the volume of water that will cover an acre of ground one foot deep = 325,850 gallons.
- Zeroes indicate that a report was received, stating that no water was used during those months; if a year is not listed, no report of water use was received for that year.

## NOTE TO LOCAL GOVERNMENTS

The person presenting the attached Land Use Information Form is applying for or modifying a water right. The Water Resources Department (WRD) requires its applicants to obtain land-use information to be sure the water rights do not result in land uses that are incompatible with your comprehensive plan. Please complete the form or detach the receipt stub and return it to the applicant for inclusion in their water right application. You will receive notice once the applicant formally submits his or her request to the WRD. The notice will give more information about WRD's water rights process and provide additional comment opportunities. You will have 30 days from the date of the notice to complete the land-use form and return it to the WRD. If no land-use information is received from you within that 30-day period, the WRD may presume the land use associated with the proposed water right is compatible with your comprehensive plan. Application for Permanent Water Rights Transfer- Port of Morrow

February 22, 2022

Kelly Starnes  
Oregon Water Resources Department  
725 Summer Street NE, Suite A  
Salem, OR 97301

Re: Transfer Application for Certificate 68545

Dear Mr. Starnes:

GSI Water Solutions, Inc. (GSI), is submitting the enclosed transfer application on behalf of the Port of Morrow (Port). The Port is proposing to add eight additional points of appropriation to Certificate 68545. Combined total production from any new additional points of appropriation will not exceed the allowed rate and duty of Certificate 68545. Additionally, the Port is proposing to change the place of use for Certificate 68545 to be listed as "within the Port service area authorized for industrial use".

The Port requests that the C-date for this transfer application be made October 1, 2031, which will allow the Port sufficient time to finalize the future well locations, develop the funding through their master planning process, and then drill the well(s).

The Port would like to use Transfer Reimbursement Authority (RA) program for processing Transfer T-13552 and an RA Estimate Application form is enclosed. A payment of the non-refundable RA estimate fee of \$125 and the transfer application fee of \$6,620.00 is enclosed. If you have any questions regarding this application, please contact me at 971-200-8545.

Sincerely,

A handwritten signature in blue ink, appearing to read "Trevor Grandy", is written over a light blue circular stamp.
