Part 2 of 4 - Instream Lease Application Map Checklist

A Map is generally required for each water right not leased in its entirety

The application map (if required) should include all the items listed below and match the existing water right(s) of record. Check all boxes that apply.

This should be a <u>simple</u> map. (See example below). A copy of a final proof survey map with the portion to be leased shaded or hachured in will also suffice.

A map is required for each water right not leased in its entirety. More than one QQ
and property may be included on each map. A map is not required, if leasing the
entire right or if the right to be leased is for municipal or quasi-municipal water use.

The map should be of sufficient quality to be reproducible. Please do not use highlighters to mark items on the map as highlighters do not always copy.

 \triangle A North arrow and map scale (no smaller than 1" = 1320').

Township, Range, Section, quarter quarter (QQ), and a clearly labeled survey corner.

For irrigation or other similar use, the number of acres to be leased in each quarterquarter clearly labeled and hatchured to differentiate between the acres being leased and any remaining. If the place of use is broken down by more than one priority date, or source stream, and/or point of diversion you must identify each with separate hachuring and clearly label.

☐ If available, identify the existing point(s) of diversion.

EXAMPLE MAP (the darker shaded portion representing the portion leased instream)

Part 3 of 4 – Water Right and Instream Use Information

Use a separate Part 3 for each water right to be leased instream

Water Right Information

Water right # <u>C48313</u>

Table 1

Water Right Information: Provide a description of the originating water right to be leased. Also include your tax lot number(s). Fill in all applicable information. For example, if your water right has multiple points of diversion (POD) but they're not numbered, you do not need to include a number. If not enough room below, you may add additional rows (see instructions) or attach spreadsheet (matching Table 1). Please clearly label any attachments.

Part 4 of 4 – Lease Provisions and Party Signatures

Term of the Lease (may be from 1 year up to 5 years):	-000						
The lease is requested to begin in: month JUNE year 202							
Note: The begin month is generally the first month of the irrigation season and the end month is the last month							
in the irrigation season. If not an irrigation right, this would be the first and last month of your authorized							
period of allowed use.							
Public use: Check the public use(s) this lease will serve	Termination provision (for multiyear leases):						
(as defined by ORS 537.332):	The parties to the lease request (choose one): a. The option of terminating the lease prior to						
Conservation, maintenance and enhancement of	expiration of the full term with written notice						
aquatic, fish and wildlife, fish and wildlife habitat and any other ecological values.	to the Department by the Lessor(s) and/or						
Recreation	Lessee.						
Pollution abatement	b. The option of terminating the lease prior to						
Navigation	expiration of the full term, with consent by all						
	parties to the lease.						
	c. The parties would not like to include a						
	Termination Provision.						
	(See instructions for limitations to this provision)						
Additive/Replacing Relationship to other instream wa	ter rights: Instream leases are generally additive to						
other existing instream water rights created as a result of	instream leases, transfers and/or allocations of						
conserved water. Since instream leases are also generally	senior to other instream rights created through a state						
agency process or conversion of minimum flows, they get	nerally replace a portion of these junior instream						
rights.							
If you would like this lease to relate to other instream wat	er rights differently, please check this box.						
	And attach an explanation of your intent.						
Validity of the Right(s) to be leased (check the appropriate box):							
The water right(s) to be leased have been used under the terms and conditions of the right(s) during the last							
five years or have been leased instream; or The water right(s) have not been used for the last five years according to the terms and conditions of the							
right(s). However, the water right(s) is not subject to forfeiture under ORS 540.610(2). Documentation							
describing why the water right(s) is not subject to for							
	14 1 1 1 1 1 1 1 1 1 1 1 1 1 1 1 1 1 1						
Precedent: If a right which has been leased is later proposed to be leased again or later transferred or							
become part of an allocation of conserved water project, a new injury review shall be required.							
An instream lease shall not set a precedent on a future transaction.							
The undersigned declare:							
1.The Lessor(s) agree during the term of this lease, to so	uspend use of water allowed under the subject water						
right(s) and under any appurtenant primary or supplemental water right(s) not involved in the lease							
application; and							
2. The Lessor(s) certify that I/we are the water right holder(s) of the right(s) described in this instream							
lease application. If not the deeded landowner, I/we have provided documentation with the lease							
application that I/we have authorization to pursue the lease application and/or have obtained consent							
from the deeded landowner; and							
3. All parties affirm that information provided in this lea	ase application is true and accurate.

 $\underline{\mathbf{A}}$

RECEIVED

FEB 2 5 2022

OWRD

RECEIVED

FEB 2 5 2022

OWRD

pplication Instructions: Part 1 of 4

Eligible Water Rights: Surface or Storage water rights subject to Instream Lease include:

RECEIVED

- 1. Certificated rights.
- 2. Adjudicated rights evidenced by a court decree.

FEB 2 5 2022

- 3. Permits or transferred rights upon which satisfactory proof has been made.
- 4. Conserver's portion of conserved water allocation under ORS 537.445 to 537.500.

OWRD

- 5. Secondary water rights for the use of stored water.
- 6. A Determined Claim in the Upper Klamath Basin determined and established in an order of determination certified by the Water Resources Director under ORS 539.130.

Only valid rights are eligible to be leased to instream use.

- A water right that has not been used for five or more years may no longer be valid under Oregon law. Municipal water rights are the exception.
- If the Department reasonably suspects the right may no longer be valid, it may require an affidavit attesting to the use, along with supporting documentation, and/or deny the lease as incomplete.
- ➤ If a water right hasn't been used for five or more years, you may also be able to demonstrate that it's not subject to forfeiture if you qualify for one of the provisions under ORS 540.610(2).

Deadline for submission: All Instream Lease Applications have deadlines for submittal. A water right with a seasonal use (such as irrigation) must be submitted prior to July 1; a water right with a year round use (such as industrial use) must be received prior to October 1.

Fee: Include the appropriate fee by check or money order made out to the Oregon Water Resources Department. You may also designate an appropriate customer account, if you have one, from which the fee should be deducted. Generally, the Lessee may have an account already set up with the Department. Applications received without the proper fee will be returned.

Other Water Rights: It is important to provide an inventory of *all of the water rights appurtenant* to the same lands identified in the lease application. This includes other primary and supplemental rights, even if the rights are still in permit status, and are not included in the lease application. Water rights information can be found via the link above for Water Rights Information Query or the Additional Water Rights Research links above.

Conservation Reserve Enhancement Program (CREP): Indicate if some or all of the lands involved in the lease application are enrolled in the CREP program (or other similar Federal Program). The Department will send a copy of the order approving the lease to the Farm Services Administration and other associated parties. If lands involved in the lease are enrolled in another Federal Program, please provide the name of that program in the space provided in Part 1 of 4.

Application Instructions: Part 2 of 4

Please provide a detailed application map as described in Part 2 of 4. If you're leasing an entire right or if the use of water is for municipal or quasi-municipal water use, a map is not required.

Application Instructions: Part 3 of 4

Water Rights Information (Table 1):

Provide a complete description for each water right, or portion thereof, proposed to be leased instream. Please indicate in Table 1 whether the entire right is involved in the lease or only a portion of the right. Then fill out the rest of the Water Right Information as described in Section 3 of 4.

The priority date, type of use, and other information describing the right will be found on your certificate, which can be viewed online (see the link above for Water Rights Information Query).

For example, the priority date is usually located within the first paragraph or two on your Certificate. In the space provided in the lease application to identify the priority date, please include the day, month, if applicable, and year.

(Note: Descriptions of supplemental rights are required only when these rights are also proposed to RECEIVED be leased.)

Application Calculations: It can sometimes be difficult to determine the rate and volume associated with the right to be leased instream, particularly when only leasing a portion of the right. FEB 2 5 2022 Please do not hesitate to contact the Department or your local Watermaster if you need assistance.

OWRD

Things to Note (for Table 2):

- * Acre-feet of storage: This is the quantity of water released from a reservoir to deliver water to the place of use associated with your water right. If a reservoir is not involved, indicate N/A.
- ❖ Maximum total rate: The maximum rate is associated with the right to be leased and should be identified as the total rate of use. For example, for an irrigation right, if 40 acres are being leased instream and the rate per acre limit is described as 1/80 cfs/acre, then the rate would be 0.5 cfs (40 acres * 1/80 cfs/acre). Or if you have an irrigation right where a rate limit per acre is
- not specified on your certificate, the maximum total rate may be proportioned. For example, an irrigation right for 40 acres that allows the maximum diversion of 1.0 cfs, and you are proposing to lease 10.0 acres. The proportional rate would be 0.25 cfs ((1.0 cfs / 40 ac)*10 ac = 0.25 cfs).
- Maximum total volume: The maximum volume is generally associated with duty of the right to be leased and should be identified as the total volume that may be used over the irrigation season or period of allowed use. For example, if 40 acres are being leased instream and there is a 4.0 acre-feet per acre duty, the maximum duty would be 160 ac-ft (40 acres * 4.0 ac-ft/ac). If no duty is listed on the certificate or in the decree, then "N/A" should be indicated in the Total Volume column in Table 2.

Basic Calculator (Table 2) (will only work when filling out the application online): If you're still not certain how to fill out Table 2, we have also provided a basic calculator that may be used to calculate certain information associated with your water right. This calculator only works if you're filling out the application online. If you've downloaded the form to your computer, the calculator will not work. Also, this calculator may not work for every water right.

To start, your right should be an irrigation or other similar acreage based right and include a rate per acre and duty per acre limitation. If you have that basic information on your certificate, the below calculator may work for you.

Fill in the numbers in the green shaded boxes with information from your Certificate, specifically the rate per acre (this will be identified as something similar to 1/80th cubic foot per second per acre), and the duty per acre (this will be identified as something similar to 2.5 acre-feet per acre). The formulated boxes will auto-fill the max CFS and total acre feet needed for the rate and volume pieces of Table 2. If your water right is broken down by more than one priority date or point of diversion, for example, you will need to use this table to calculate the maximum rate and volume associated with the acreage for each point of diversion and/or priority date.

You can then take the information provided in the calculator below and use it to fill in Table 2 in Section 3 of 4 of this application.

Instream Use Information (Table 4): This section is best completed in close consultation with the local Watermaster, who will be responsible for making a number of recommendations relating to the reach, amount, timing and duration of the instream use.

A water right used at its maximum rate for the entire season will frequently exceed the total allowable volume (based on the duty). For the instream use, it's allowable to reduce the instream rate and/or reduce the number of days that water may be protected instream within the irrigation season to prevent enlargement or injury to other water rights. Consultation with the Department's local Watermaster (see link above to locate your local Watermaster) can help you determine the appropriate instream rate, volume, timing and location of a proposed instream use.

Also, the Department, as part of its evaluation process, will determine whether any changes are needed to the proposed instream use to prevent injury and/or enlargement or to maximize the instream benefits.

Application Instructions: Part 4 of 4

Parties to the Lease: OWRD

Lessor:

This is generally the landowner(s) and is referred to as the water right holder. All water right holders must sign the lease application. The lessor may also be someone that holds interest in the water right or another party that has been granted authorization by the landowner to leases the water right. If the Lessor is not the deeded landowner, additional information must be provided as specified in the application checklist (Minimum Requirements Checklist Part 1 of 4).

Lessee:

Individuals or organizations, which may provide compensation to the Lessor for the leasing of the subject water right instream. The Lessee has the same standing as the Lessor for all purposes regarding management and enforcement of the instream water right.

Co-Lessors:

Irrigation districts or other water purveyors must be a party to the lease to which the subject Lands are attached or fall within the boundaries of an Irrigation District, as defined in ORS Chapters 545, 547, 552, 553, or 554, and should be listed as Co-Lessor. If the source of water for the subject lands is stored water, then the owner/operator of the reservoir must also be party to the lease as Co-lessor.

Please note: If the water right is in the name of an irrigation district (or other similar organization) or if water is conveyed to the subject lands by an irrigation district, this lease application form may not be used. The District Lease Application Form must be used.

Trustee:

The Trustee is the Oregon Water Resources Department. If a person leases a right to the State without third party involvement, the Department will also be considered the Lessee.

Valid Signatures: All parties must sign the application. For example, if a husband and wife both appear on a deed, both must sign. If there is insufficient space for all parties to sign the lease

June 17, 2015

Instream Lease Application Information and Instructions

application, please follow instructions below to unlock the form and add additional signature space for the lessor, co-lessor, and/or lessee as needed. Or you may also attach an additional signature page.

Term of the lease: The term of the instream lease can be no less than one calendar year and no more than five calendar years. However, there is no limit on the number of times that you may renew your lease if the terms have not changed. (See link to Instream Lease Renewal Form above, which also contains additional information on whether a lease may be renewed)

Generally, the first day of the term of the instream lease is the first day the water can be legally used through the last day the water can be legally used (e.g. the irrigation season). For water rights with year-around season of use the term of the lease would run from January 1 through December 31 and through the last year of term of the instream lease.

Termination provision: For multiyear leases, this provision gives the Lessor(s) and any Lessee an opportunity to request or prohibit an Instream Lease to terminate prior to the scheduled termination date. Unless otherwise specified, the Lessee, if there is one, has the same standing as the Lessor for management of the instream lease.

For instream leases submitted as Mitigation Projects in the Deschutes Groundwater Study Area, termination will be required by all parties to the lease and must be submitted to both the Salem and Bend OWRD offices.

Requests to terminate a lease, may be submitted by e-mail from the appropriate parties identified in the Final Order approving the lease application.

Public Use to be served by the lease: Each lease must provide a public benefit. Please check one or more boxes to identify the public use(s) to be served by the new instream use.

Additive/Replacing Nature of Instream Water Rights:

- Water rights that are leased instream generally have senior priority dates. Instream rights created by an instream lease are then additive to other instream rights with senior priority dates created as a result of instream lease, transfer and/or allocation of conserved water.
- If there is an existing junior instream right created as a result of a state agency application process or conversation of minimum flows, the instream right created as a result of a lease will generally replace a portion of that existing right with an earlier (senior) priority date.
- However, applicants may request a different relationship to other instream rights than described above. For example, under certain conditions, if the priority date of the instream right to be created by the lease is junior to an existing instream right (created as a result of a state agency application process or minimum flow conversion), the new instream use could be additive to those existing instream rights. In this example, the applicant may need to submit additional information (such as a letter from ODFW, DEQ, or OPRD) describing the instream benefits of making the rights additive.

Validity of the Rights: The lease applicant must identify whether the right(s) involved in the lease application have been used beneficially in the last five years or are not subject to forfeiture under ORS 540.610(2).

Other General Information:

Instream Lease Application Information and Instructions

Watermaster: ORS 540.045(1) – The role of the Watermaster is to regulate the distribution of water among water users from any natural surface or groundwater supply in accordance with the users' existing water rights of record. For an instream lease, the role of the Watermaster generally includes:

- The Watermaster may make a number of recommendations relating to the reach, amount, timing, and duration of the instream use.

 RECEIVED
- Review factors such as losses, return flow, and consumptive use in determining whether the proposed location of the new use will be allowed.
- Recommend to the Director if and how far the Department can protect the new instream use past the original point of diversion. (In some instances, the new use may need to be broken into reaches OWRD of decreasing amounts. The reach below the original point of diversion would be managed like the shepherding of stored water.)
- Identify any conditions to be placed on the new use, which are necessary to prevent or mitigate injury to existing rights.

Abbreviated Process Steps- OARS 690-077-0077

- 1. Upon receipt of the application: Department staff will assign a number to identify the lease application.
- 2. The Application will be noticed in the Department's Weekly Notice; initiating a 21-day comment period. Public comments may be submitted within the 21-day comment period addressing any injury or enlargement concerns.
- 3. Field staff (generally the Watermaster) is requested to produce a written assessment of whether the application meets the requirements to suspend the original use and avoid injury or enlargement.
- 4. A caseworker is assigned the application for review.
- 5. If the Watermaster review indicates that the lease will not result in injury and/or enlargement and no comments are received, the Director may presume that the lease may be approved. However, if the Watermaster review, public comments, or other information indicate that the lease will result in injury and/or enlargement, the Department may modify the lease to prevent the injury and/or enlargement or deny the lease.
- 6. A final order is completed, signed, and a copy sent to the Lessor and co-lessor and Lessee, if applicable.

Farm Deferral Tax Status

Counties make the determination of whether a property qualifies for the farm use assessment without consideration of whether the lands have an associated water right which is leased instream. If you have questions regarding the farm use assessment you should contact your local county assessor. You should contact your County for any weed ordinance and management requirements.

Editing the Application Form

To add additional lines to tables within the forms or to copy and paste additional Part 3 pages, please save the application form to your computer. Unlock the document by using one of the following instructions for your Microsoft Word software version:

Microsoft Word 2003

Once the application has been unlocked, you may:

- add additional rows to tables using the Table tools, and
- select and copy the pages of

Unlock the document by one of the following:

Using the **Tools** menu => click **Unprotect Document**; OR

RECEIVED

Using the Forms toolbar => click on the Protect/Unprotect icon.

FFB 2 5 2022

To relock the document to enable the checkboxes to work, you will need to:

Using the **Tools** menu => click **Protect Document**;

OR

Using the Forms toolbar => click on the Protect/Unprotect icon.

OWRD

Microsoft Word 2007

- Unlock the document by clicking the Review tab, then click Protect Document, then click **Stop Protect**
- To relock the document, click Editing Restrictions, then click Allow Only This Type of Editing, select Filling In Forms from the drop-down menu, then check Yes, Start Enforcing Protection.

Microsoft Word 2010

- Unlock the document by clicking the Review tab, toggle the Restrict Editing icon at the upper right, then click Stop Protect at the bottom right. Then uncheck the "Allow only this type of editing in the document: Filling in forms" in the "Editing restrictions" section on the right-hand list of options.
- To relock the document, check the Editing Restrictions/Allow Only This Type of Editing/Filling In Forms box from the drop-down menu, then check Yes, Start Enforcing Protection. You do not need to assign a password for the editing restrictions.

Other Alternatives:

- Photocopy pages or tables in Part 3 and attach photocopied pages to document in the appropriate location, and manually amend page numbers as necessary (e.g. Page 5 6 of 9 10).
- You may refer to additional attachments that you may include, such as separately produced tables or spreadsheets to convey large numbers of rows of place of use listings, owner/property parcels, etc. If attaching separately produced tables, make sure the table(s) match the ones in the application form and are clearly labeled with the table number and water right number. You may contact the Department at 503-986-0900 and ask for Staff if you have question.
