*Example for Line 5a calculation to transfer 45.0 acres of Primary Certificate 12345 (total 1.25 cfs for 100 acres) and 45.0 acres of Supplemental Certificate 87654 (1/80 cfs per acre) on the same land:

1. For irrigation calculate cfs for each water right involved as follows:
 - a. Divide total authorized cfs by total acres in the water right (*for C12345, 1.25 cfs ÷ 100 ac*); then multiply by the number of acres to be transferred to get the transfer cfs (*x 45 ac = 0.56 cfs*).
 - b. If the water right certificate does not list total cfs, but identifies the allowable use as 1/40 or 1/80 of a cfs per acre; multiply number of acres proposed for change by either 0.025 (1/40) or 0.0125 (1/80). (*For C87654, 45.0 ac x 0.0125 cfs/ac = 0.56 cfs*)
2. Add cfs for the portions of water rights on all the land included in the transfer; however **do not count cfs for supplemental rights on acreage for which you have already calculated the cfs fee for the primary right on the same land**. The fee should be assessed only once for each "on the ground" acre included in the transfer. (*In this example, blank 5a would be only 0.56 cfs, since both rights serve the same 45.0 acres. Blank 5b would be 0 and Line 5 would then also become 0.*)

For Place of Use or Character of Use Changes

Are there other water right certificates, water use permits or ground water registrations associated with the "from" or the "to" lands? ☐ Yes ☒ No

If YES, list the certificate, water use permit, or ground water registration numbers: _____.

➡ Pursuant to ORS 540.510, any "layered" water use such as an irrigation right that is supplemental to a primary right proposed for transfer must be included in the transfer or be cancelled. Any change to a ground water registration must be filed separately in a ground water registration modification application.

For Substitution (ground water supplemental irrigation will be substituted for surface water primary irrigation)

Ground water supplemental Permit or Certificate # _____;

Surface water primary Certificate # _____.

For a change from Supplemental Irrigation Use to Primary Irrigation Use

Identify the primary certificate to be cancelled. Certificate # _____

For a change in point(s) of appropriation (well(s)) or additional point(s) of appropriation:

- ☐ Well log(s) are attached for each authorized and proposed well(s) that are clearly labeled and associated with the corresponding well(s) in Table 1 above and on the accompanying application map.

Tip: You may search for well logs on the Department's web page at:

http://apps.wrd.state.or.us/apps/gw/well_log/Default.aspx

AND/OR

- ☐ Describe the construction of the authorized and proposed well(s) in Table 3 for any wells that do not have a well log. For *proposed wells not yet constructed or built*, provide "a best estimate" for each requested information element in the table. The Department recommends you consult a licensed well driller, geologist, or certified water right examiner to assist with assembling the information necessary to complete Table 3.

Table 3. Construction of Point(s) of Appropriation

Any well(s) in this listing must be clearly tied to corresponding well(s) described in Table 1 and shown on the accompanying application map. Failure to provide the information will delay the processing of your transfer application until it is received. The information is necessary for the department to assess whether the proposed well(s) will access the same source aquifer as the authorized point(s) of appropriation (POA). The Department is prohibited by law from approving POA changes that do not access the same source aquifer.

Subject: RE: WLID Permanent Transfer Application: Net Benefit Finding

Hi Rebecca,

ODFW has assessed the information provided in the Permanent Transfer application for Storage Certificate 2949 which seeks to change the character of use of 4,500 AF to "multipurpose." Our assessment indicates that the proposed changes will result in a net benefit to fish and wildlife habitat and thus qualify for a fee reduction offered through the Oregon Water Resources Department.

The change in character of use application is consistent with section 9(c) of the June 22, 2020 Memorandum of Agreement (MOA) signed by the Wallowa Lake Irrigation District, Nez Perce Tribe, Confederated Tribes of the Umatilla Indian Reservation and ODFW. The MOA recognizes the signatories' mutual interest in the protection, restoration and enhancement of anadromous fish resources, wildlife and the economic and cultural resources affected by the Wallowa Lake Dam and in seeking solutions to water management challenges in the Wallowa and Grande Ronde River basins. To benefit fish and wildlife resources, the MOA seeks changes to the operation of Wallowa Lake Dam including the release of 4,500 AF from the Dam to be protected instream with a secondary water right. Such releases will provide benefit to instream resources from Wallowa Lake Dam to the confluence with the Columbia River. Approval of this application will help facilitate implementation of this provision.

Based on this information, ODFW has determined that the proposed transfer provides a change that will result in a net benefit to fish and wildlife habitat and qualifies for OWRD's fee reduction. ODFW reserves the right to alter this recommendation for future applications pending other applicable information available at that time.

Please let me know if you need any additional information or have any further questions.

Thank you!
