SUBJECT: Water Right Transfer Application T-13557

Please find enclosed the Preliminary Determination indicating that, based on the information available, the Department intends to approve application T-13557. This document is an intermediate step in the approval process; water may not be used legally as proposed in the transfer application until a Final Order has been issued by the Department. Please read this entire letter carefully to determine your responsibility for additional action.

A public notice is being published in the Department's weekly publication simultaneously with issuance of the Preliminary Determination. The notice initiates a period in which any person may file either a protest opposing the decision proposed by the Department in the Preliminary Determination or a standing statement supporting the Department's decision. The protest period will end 30 days after the Department's notice.

If no protest is filed, the Department will issue a Final Order consistent with the Preliminary Determination. You should receive a copy of the Final Order about 30 days after the close of the protest period.

If a protest is filed, the application may be referred to a contested case proceeding. A contested case provides an opportunity for the proponents and opponents of the decision proposed in the Preliminary Determination to present information and arguments supporting their position in a quasi-judicial proceeding.

IMPORTANT: Due to COVID-19, the Department's office is closed to walk-in services. The Department encourages the submission of protests by U.S. Mail. Please consider mailing early to ensure the Department receives the protest by the deadline specified above.

Please contact me at scott.a.grew@oregon.gov or 503-986-0890 if I may be of assistance.

Sincerely,

Scott Grew

Review Criteria for Groundwater Registration Modification Applications [OAR 690-382-0700(2)]

6. The proposed modification would not result in enlargement of the groundwater registration.
7. The proposed modification would not result in a state Scenic Waterway not receiving previously available water during periods in which streamflows are less than the quantities determined by the Department to be necessary to meet the requirements of ORS 390.835.
8. The proposed modification would not result in injury to other water rights.

Determination and Proposed Action

The modification in point of appropriation proposed in Groundwater Registration Modification T-13557 appears to be consistent with the requirements of ORS 537.610, 537.705, 540.505 to 540.580 and OAR 690-382-1000. If protests are not filed pursuant to OAR 690-382-0900, the modification will be approved.

If Groundwater Registration Modification T-13557 is approved, the final order will include the following:

1. *The modification to Registration Application GR-2992 (Certificate of Registration GR-2801) proposed in Groundwater Registration Modification Application T-13557 is recognized. Recognition of the modification shall not be construed as a final determination of the right to appropriate groundwater under the certificate of registration or modification. Such a determination will occur in an adjudication proceeding under ORS 537.670 to 537.695.*
2. *The use of the water is restricted to beneficial use at the place of use described, and is subject to all other conditions and limitations contained in Registration Application GR-2992 (Certificate of Registration GR-2801) and any related decree.*
3. *Water shall be acquired from the same aquifer (water source) as the original point of appropriation.*
4. *Water shall no longer be appropriated from the original point of appropriation (Pump Well) as part of this groundwater certificate of registration.*
5. *The quantity of water diverted at the new points of appropriation, (Well 1, Well 2 Well 3 and Well 4) shall not exceed the quantity of water lawfully available at the original point of appropriation (Pump Well).*

6. *Water use measurement conditions:*

- a. *Before water use may begin under this order, the water user shall install a totalizing flow meter, or, with prior approval of the Director, another suitable measuring device, at each point of appropriation.*
- b. *The water user shall maintain the meters or measuring devices in good working order.*
- c. *The water user shall allow the Watermaster access to the meters or measuring devices; provided however, where the meters or measuring devices are located within a private structure, the Watermaster shall request access upon reasonable notice.*
