CLAIM OF BENEFICIAL USE MAP

The Claim of Beneficial Use Map must be submitted with this claim. Claims submitted without the Claim of Beneficial Use map will be returned. The map shall be submitted on polyester film at a scale of 1" = 1320 feet, 1" = 400 feet, or the original full-size scale of the county assessor map for the location.

The changes that were authorized under the transfer final order must be mapped based on the developed locations; new or additional points of appropriation and place of use.

In cases where the order involved additional points of appropriation, the additional points should be mapped based on their developed locations. The original points of appropriation should be mapped based on the original right of record at the time the transfer final order was issued.

In cases where the order involved changing the place of use for a portion of a water right, the portion of the place of use being changed should be mapped based on the developed location. If the transfer also included portions of the place of use that were not being modified, but were receiving a new or additional point of appropriation, the place of use for those lands should be mapped based on the original right of record at the time the transfer final order was issued.

Provide a general description of the survey method used to prepare the map. Examples of possible methods include, but are not limited to, a traverse survey, GPS, or the use of aerial photos. If the basis of the survey is an aerial photo, provide the source, date, series and the aerial photo identification number.

The wells, conveyance & sprinklers, & place of use were tied to approximate boundaries using survey grade GPS receivers in RTK autonomous mode. Point data was imported to CAD & overlaid with aerial imagery to verify accuracy.

Transfer Review Criteria (OAR 690-380-4010)

19. Water has been used within the last five years according to the terms and conditions of the rights. There is no information in the record that would demonstrate that the rights are subject to forfeiture under ORS 540.610.
20. A pump, pipeline, and sprinkler system sufficient to use the full amount of water allowed under the existing rights were present within the five-year period prior to submittal of Transfer Application T-12172.
21. The proposed changes would not result in enlargement of the rights.

22. The proposed changes would not result in injury to other water rights.

23. All other application requirements are met.

Conclusions of Law

The change in points of appropriation, change in place of use, and diminution of a right proposed in Transfer Application T-12172 appear to be consistent with the requirements of ORS 537.705 and 540.505 to 540.580 and OAR 690-380-5000.

Now, therefore, it is ORDERED:

1. The change in points of appropriation, change in place of use, and diminution of a right proposed in Transfer Application T-12172 are approved.
2. The right to the use of the water is restricted to beneficial use at the place of use described, and is subject to all other conditions and limitations contained in Certificates 21216, 26078, 35332, and 46262 and any related decree.
3. Water right Certificate 26078 is cancelled.
4. Water right Certificates 21216, 35332, and 46262 are cancelled. New certificates will be issued describing those portions of the rights not affected by this transfer.
5. The quantity of water diverted at the new points of appropriation, shall not exceed the quantity of water lawfully available at the original points of appropriation.
6. Water use measurement conditions:
 - a. Before water use may begin under this order, the water user shall install totalizing flow meters, or, with prior approval of the Director, other suitable measuring devices at each point of appropriation (new and existing).
 - b. The water user shall maintain the meters or measuring devices in good working order.
 - c. The water user shall allow the Watermaster access to the meters or measuring devices; provided however, where the meters or measuring devices are located within a private structure, the Watermaster shall request access upon reasonable notice.
7. Water shall be acquired from the same aquifer (water source) as the original points of appropriation.
8. The former place of use of the transferred right shall no longer receive water under the right.
9. Full beneficial use of the water shall be made, consistent with the terms of this order, on or before **October 1, 2022**. A Claim of Beneficial Use prepared by a Certified Water Right Examiner shall be submitted by the applicant to the Department within one year after the deadline for completion of the changes and full beneficial use of the water.

10. After satisfactory proof of beneficial use is received, new certificates confirming the rights transferred will be issued.

Dated at Salem, Oregon this 14 day of March, 2017.

REFERENCE: Transfer Application T-12172

Enclosed is a copy of the final order approving your water right transfer application.

The time allowed to complete the transfer is specified in the final order. **YOU SHOULD GIVE PARTICULAR ATTENTION TO THE TIME LIMIT.** The water right for any portion of the authorized change in character of use or change in place of use NOT carried out within the time allowed will be lost.

An extension of the time limit can be allowed only upon a showing that diligent effort has been made to complete the actual change(s) within the time allowed.

You are required to hire a Certified Water Rights Examiner (CWRE) to complete a Claim of Beneficial Use report and map which must be submitted to this Department within one year of the date you complete the change(s) or within one year of the completion date authorized in the transfer final order, whichever occurs first.

If you have any questions related to the approval of this transfer, you may contact your caseworker, Kelly Starnes, by telephone at (503) 986-0886 or by e-mail at Patrick.K.Starnes@oregon.gov.

Transfer Review Criteria (OAR 690-380-4010)

19. Water has been used within the last five years according to the terms and conditions of the rights. There is no information in the record that would demonstrate that the rights are subject to forfeiture under ORS 540.610.
20. A pump, pipeline, and sprinkler system sufficient to use the full amount of water allowed under the existing rights were present within the five-year period prior to submittal of Transfer Application T-12172.
21. The proposed changes would not result in enlargement of the rights.

22. The proposed changes would not result in injury to other water rights.
23. All other application requirements are met.

Conclusions of Law

The change in points of appropriation, change in place of use, and diminution of a right proposed in Transfer Application T-12172 appear to be consistent with the requirements of ORS 537.705 and 540.505 to 540.580 and OAR 690-380-5000.

Now, therefore, it is ORDERED:

1. The change in points of appropriation, change in place of use, and diminution of a right proposed in Transfer Application T-12172 are approved.
2. The right to the use of the water is restricted to beneficial use at the place of use described, and is subject to all other conditions and limitations contained in Certificates 21216, 26078, 35332, and 46262 and any related decree.
3. Water right Certificate 26078 is cancelled.
4. Water right Certificates 21216, 35332, and 46262 are cancelled. New certificates will be issued describing those portions of the rights not affected by this transfer.
5. The quantity of water diverted at the new points of appropriation, shall not exceed the quantity of water lawfully available at the original points of appropriation.
6. Water use measurement conditions:
 - a. Before water use may begin under this order, the water user shall install totalizing flow meters, or, with prior approval of the Director, other suitable measuring devices at each point of appropriation (new and existing).
 - b. The water user shall maintain the meters or measuring devices in good working order.
 - c. The water user shall allow the Watermaster access to the meters or measuring devices; provided however, where the meters or measuring devices are located within a private structure, the Watermaster shall request access upon reasonable notice.
7. Water shall be acquired from the same aquifer (water source) as the original points of appropriation.
8. The former place of use of the transferred right shall no longer receive water under the right.
9. Full beneficial use of the water shall be made, consistent with the terms of this order, on or before **October 1, 2022**. A Claim of Beneficial Use prepared by a Certified Water Right Examiner shall be submitted by the applicant to the Department within one year after the deadline for completion of the changes and full beneficial use of the water.

10. After satisfactory proof of beneficial use is received, new certificates confirming the rights transferred will be issued.

SUBJECT: Water Right Transfer Application T-12172

Please find enclosed the Preliminary Determination indicating that, based on the information available, the Department intends to approve application T-12172. This document is an intermediate step in the approval process; water may not be used legally as proposed in the transfer application until a Final Order has been issued by the Department. Please read this entire letter carefully to determine your responsibility for additional action.

A public notice is being published in the Department's weekly publication and in the Burns Times Herald newspaper, simultaneously with issuance of the Preliminary Determination. The notice initiates a period in which any person may file either a protest opposing the decision proposed by the Department in the Preliminary Determination or a standing statement supporting the Department's decision. The protest period will end 30 days after the last date of newspaper publication.

If no protest is filed, the Department will issue a Final Order consistent with the Preliminary Determination. You should receive a copy of the Final Order about 30 days after the close of the protest period.

If a protest is filed, the application may be referred to a contested case proceeding. A contested case provides an opportunity for the proponents and opponents of the decision proposed in the Preliminary Determination to present information and arguments supporting their position in a quasi-judicial proceeding.

Please do not hesitate to contact me at 503-986-0886 or Patrick.K.Starnes@wrdd.state.or.us if I may be of assistance.

Sincerely,

Kelly Starnes

19. Water has been used within the last five years according to the terms and conditions of the rights. There is no information in the record that would demonstrate that the rights are subject to forfeiture under ORS 540.610.
20. A pump, pipeline, and sprinkler system sufficient to use the full amount of water allowed under the existing rights were present within the five-year period prior to submittal of Transfer Application T-12172.
21. The proposed changes would not result in enlargement of the rights.
22. The proposed changes would not result in injury to other water rights.
23. All other application requirements are met.

Determination and Proposed Action

The change in points of appropriation, change in place of use, and diminution of a right proposed in Transfer Application T-12172 appear to be consistent with the requirements of ORS 537.705 and 540.505 to 540.580 and OAR 690-380-5000. 1. *The change in points of appropriation, change in place of use, and diminution of a right proposed in Transfer Application T-12172 are approved.*
2. *The right to the use of the water is restricted to beneficial use at the place of use described, and is subject to all other conditions and limitations contained in Certificates 21216, 26078, 35332, and 46262 and any related decree.*
3. *Water right Certificate 26078 is cancelled.*
4. *Water right Certificates 21216, 35332, and 46262 are cancelled. New certificates will be issued describing those portions of the rights not affected by this transfer.*
5. *Temporary Transfer T-11386 will be terminated upon approval of T-12172 and T-12164 and/or the initial termination date in the original order, whichever comes first.*

7. *Water use measurement conditions:*
- a. Before water use may begin under this order, the water user shall install totalizing flow meters, or, with prior approval of the Director, other suitable measuring devices at each point of appropriation (new and existing).*
 - b. The water user shall maintain the meters or measuring devices in good working order.*
 - c. The water user shall allow the Watermaster access to the meters or measuring devices; provided however, where the meters or measuring devices are located within a private structure, the Watermaster shall request access upon reasonable notice.*
8. *Water shall be acquired from the same aquifer (water source) as the original points of appropriation.*
9. *The former place of use of the transferred right shall no longer receive water under the right.*
10. *Full beneficial use of the water shall be made, consistent with the terms of this order, on or before **October 1, 2022**. A Claim of Beneficial Use prepared by a Certified Water Right Examiner shall be submitted by the applicant to the Department within one year after the deadline for completion of the changes and full beneficial use of the water.*

Ground Water Review Form:

- ☒ **Water Right Transfer**
- ☐ **Permit Amendment**
- ☐ **GR Modification**
- ☐ **Other**

Application: T-12172

Applicant Name: Andy Root

Proposed Changes: ☒ POA ☒ APOA ☐ SW→GW ☐ RA
☐ USE ☒ POU ☐ OTHER

Reviewer(s): Gerald H. Grondin (Darrick E. Boschmann)

Date of Review: 2/4/2016

The information provided in the application is insufficient to evaluate whether the proposed transfer may be approved because:

- ☐ The water well reports provided with the application do not correspond to the water rights affected by the transfer.
 - ☐ The application does not include water well reports or a description of the well construction details sufficient to establish the ground water body developed or proposed to be developed.
 - ☐ Other _____
-

1. Basic description of the changes proposed in this transfer: _____

Transfer application T-12172 is related to four certificates: certificate **21216**, certificate **26078**, certificate **35332**, and certificate **46262**.

***Certificate 21216** allows diversion of surface water from 1 POD (POD 1 – POISON CR SL > NINEMILE SL) for primary irrigation of 147.8 acres.

This transfer seeks the following changes to certificate 21216:

1). Transfer 10.4 acres of the authorized POU from an unused “corner” of the authorized POU to nearby areas not currently authorized under this certificate (see application map).

Certificate 26078 allows groundwater pumping from 3 wells (POD 1 = HARN 600; POD 2 = HARN 601; POD 3 = HARN 607) for primary irrigation of 2.6 acres and supplemental irrigation of 317.4 acres. Three additional wells are authorized for this certificate under transfer T-

This transfer seeks the following changes to this certificate:

1). Transfer 36.3 acres of the authorized POU (supplemental) from unused “corners” to a center pivot irrigated POU in the same section to the south.

2). Add four (4) APOAs (HARN 51822; HARN 615; HARN 52198; HARN 52233).

Certificate 35332 allows groundwater pumping from 4 wells (POD 1 = HARN 590; POD 2 = HARN 600; POD 3 = HARN 601; POD 4 = HARN 607) for supplemental irrigation of 189.0 acres.

This transfer seeks the following changes to this certificate:

1). Transfer 17.6 acres of the authorized POU (supplemental) from unused “corners” to a center pivot irrigated POU in the same section to the south.

2). Add four (4) APOAs (HARN 51822; HARN 615; HARN 52198; HARN 52233).

Certificate 46262 allows groundwater pumping from 1 well (POD 1 = HARN 1332) for primary irrigation of 150.0 acres.

This transfer seeks the following changes to this certificate:

1). Transfer 21.9 acres of the authorized POU from unused “corners” to a center pivot irrigated POU in 23S/32E-33.

2). Add four (4) APOAs (HARN 51822; HARN 615; HARN 52198; HARN 52233).

2. Will the proposed POA develop the same aquifer (source) as the existing authorized POA?

☒ Yes ☒ No Comments: The answer is yes and no: same system, different units.

Available data indicates a predominantly volcanic/volcaniclastic unit occurs beneath a predominantly basin fill sediment unit. Reports for the Malheur Lake Basin indicate groundwater occurs in both the basin fill and underlying rocks. The groundwater is likely hydraulically connected, making a single groundwater system occurring in different geologic units. Leonard (1970) found that near the edges of the valley there is likely good interconnection between individual water-bearing beds in the valley fill and those in the adjacent and underlying tertiary rocks.

Excluding HARN 1332, all authorized and proposed POAs produce groundwater from the predominantly basin fill sediment unit. There is no original log for HARN 1332, but based on geologic mapping by Brown and others (1980) it likely produces groundwater from the predominantly volcanic/volcaniclastic unit.

3. a) Is there more than one source developed under the right (e.g., basalt and alluvium)?

☐ Yes ☒ No See comment above.

b) If yes, estimate the portion of the right supplied by each of the sources and describe any limitations that will need to be placed on the proposed change (rate, duty, etc.): _____

4. a) Will this proposed change, at its maximum allowed rate of use, likely result in an increase in interference with **another ground water right**?

☒ Yes ☐ No Comments: The authorized POD's for certificates 21216, 26078, and 35332 are in relatively close proximity to each other, and to the proposed APOA's. The authorized POD for certificate 46262 is located approximately 18 miles southwest of the proposed "to" lands and proposed APOA's under this transfer for that certificate. Transfer of groundwater withdrawals to the proposed location will result in an increase in local interference with existing groundwater rights at the proposed location.

b) If yes, would this proposed change, at its maximum allowed rate of use, likely result in another groundwater right not receiving the water to which it is legally entitled?

☒ Yes ☐ No If yes, explain: The proposed transfer is within the greater Harney Valley area where observed groundwater level declines are occurring in most areas. Groundwater development for the acres proposed under this transfer will further increase the groundwater level decline rate at the proposed location. Junior groundwater rights near the proposed location have decline conditions, which will be triggered earlier if this transfer is approved.

5. a) Will this proposed change, at its maximum allowed rate of use, likely result in an increase in interference with **another surface water source**?

☒ Yes ☐ No Comments: The proposed transfer will result in an incremental increase in interference with Embree Slough.

b) If yes, at its maximum allowed rate of use, what is the expected change in degree of interference with any **surface water sources** resulting from the proposed change?

Stream: Embree Slough

☒ Minimal ☐ Significant

Stream: _____

☐ Minimal ☐ Significant

Provide context for minimal/significant impact: Previous calculations in this area using the Theis equation indicate the increase in interference will be minimal (see review of application T-12164).

6. What conditions or other changes in the application are necessary to address any potential issues identified above: _____

If the transfer is approved, the following conditions are recommended: _____

Condition 7B (interference condition) _____

Condition 7F (well location condition) _____

Condition 7P (well tag) for all POA wells _____

Condition 7T (measuring tube) for all POA wells _____

Flow meter condition: Use the water rights "large" permit condition requiring a totalizing flow meter and reporting for all "from" and "to" wells to ensure no enlargement occurs. _____

7. Any additional comments: _____

***Note:** Certificate 21216 authorizes a surface water source. _____

Hi Marcy,

I've looked over the draft PD and found a couple things to review.

On page 5, you have a space missing between "3" and "within" after "SOURCE:"

On page 5, the location for Well 1 should be "NW NW 28" instead of "SW SW 22", Well 2 should be "SW NW 28" instead of "NW NW 28", Well 3 should be "SE NE 29" instead of "SW NW 28".

But the rest looks fine.

Thanks

Good afternoon Scott;

Here's the DPD for one of the transfers I have for Andy Root. There are a few items I need in order to proceed, which are listed below and are outlined in the cover letter of the attached packet:

- 1) Please review the Draft Final order and get back to me on any changes that need to be made and/or if it meets your intent and you want to proceed with the processing of the transfer.
- 2) Please contact a title company to provide you with an ownership report. Most title companies in this region call them "listing packets". They are usually free and can be generated quickly. They can e-mail the report directly to me.

- 3) I also want to mention that you can extend the completion date free of charge now. This is the time to do it, otherwise there is another process to go through if things don't work out as planned. We can move it out up to 5 years if you would like. If you finish sooner, that's great. Let me know. You can respond via e-mail if you prefer.
- 4) Please confirm the Burns Times Herald as the newspaper you wish to use for the publication notice of your transfer.
- 5) Lastly, the Watermaster, JR Johnson, has required measuring devices on the new and existing points of appropriation. I have included her contact information so that you may discuss with him the type of measuring device that needs to be installed.

You will be getting another one of these for T-12164 for Molts' in the next day or so.

Feel free to contact me if I can be of further assistance.

Thanks...

Reference: Application T- 12172

On October 2, 2015, we received your water right Transfer application. The application was accompanied by \$4100.00. Our receipt numbers 117390, 117590 are enclosed.

By copy of this letter, we are asking the Watermaster for a report regarding the potential for injury to existing water rights which may be caused by the requested change. A review form will also be sent to our groundwater staff to determine whether the proposed well accesses the same source of water as the original well.

Your application will be examined to determine whether additional information is needed. We will notify you if further information or corrections to the application or map are required.

This application may require publication of a notice for two consecutive weeks in a newspaper with general circulation in the area where the water right is located. If it is determined that newspaper notice will be required, the Department will prepare the notice and notify you of the cost. You will be responsible for submitting payment to the Department prior to publication of the notice.

Except as provided under ORS 540.510(3) for municipalities, you may not use water in the new place of use or from the new point of appropriation until a final order approving the transfer application has been issued by the Department.

In order to avoid any possible forfeiture of the water right, you should continue to use the water as described by your existing water right.

If the land is sold before the application is approved, the buyer's consent to the application will be required unless a recorded deed or other legal document clearly established that the water right was not conveyed in the sale.

Refer to the following page for a chart showing the steps and expected timelines for the processing of your application.

If you have any questions, please contact the Transfer Section at (503) 986-0807.
