	WE ARE RETURNING YOUR APPLICATION FOR THE FOLLOWING REASON(S): Application fee not enclosed/insufficient Map not included or incomplete Land Use Form not enclosed or incomplete Evidence of Use Form not enclosed or Additional signature(s) required Part is incomplete Other/Explanation	incomplete
	Staff: Date:	
Double of 7/1/202	Downwood Transfer Application Form Doca 1 of 10 14021	TAC

Your transfer application will be returned if any of the map requirements listed below are not met.

		sure that the transfer application map you submit includes all the required items and ne existing water right map. Check all boxes that apply.
Y [] N/A	Certified Water Right Examiner (CWRE) Stamp and Original Signature. For a list of CWREs, see http://apps.wrd.state.or.us/apps/wr/cwre_license_view/ . CWRE stamp and signature are not required for substitutions.
V	N/A	If more than three water rights are involved, separate maps are needed for each water
		right.
V		Permanent quality printed with dark ink on good quality paper.
✓		The size of the map can be $8\% \times 11$ inches, $8\% \times 14$ inches, 11×17 inches, or up to 30×30 inches. For 30×30 inch maps, one extra copy is required.
V		A north arrow, a legend, and scale.
✓		The scale of the map must be: 1 inch = 400 feet, 1 inch = 1,320 feet, the scale of the Final Proof/Claim of Beneficial Use Map (the map used when the permit was certificated), the scale of the county assessor map if the scale is not smaller than 1 inch = 1,320 feet, or a scale that has been pre-approved by the Department.
V		Township, Range, Section, ¼ ¼, DLC, Government Lot, and other recognized public land survey lines.
V		Tax lot boundaries (property lines) are required. Tax lot numbers are recommended.
Y		Major physical features including rivers and creeks showing direction of flow, lakes and reservoirs, roads, and railroads.
✓		Major water delivery system features from the point(s) of diversion/appropriation such as main pipelines, canals, and ditches.
∀		Existing place of use that includes separate hachuring for each water right, priority date, and use including number of acres in each quarter-quarter section, government lot, or in each quarter-quarter section as projected within government lots, donation land claims, or other recognized public land survey subdivisions. If less than the entirety of the water right is being changed, a separate hachuring is needed for lands left unchanged.
✓	□ N/A	Proposed place of use that includes separate hachuring for each water right, priority date, and use including number of acres in each quarter-quarter section, government lot, or in each quarter-quarter section as projected within government lots, donation land claims, or other recognized public land survey subdivisions.
✓		Existing point(s) of diversion or well(s) with distance and bearing or coordinates from a recognized survey corner. This information can be found in your water right certificate or permit.
✓	□ N/#	If you are proposing a change in point(s) of diversion or well(s), show the proposed location and label it clearly with distance and bearing or coordinates. If GPS coordinates are used, latitude-longitude coordinates may be expressed as either degrees-minutes-seconds with at least one digit after the decimal (example – 42°32′15.5″) or degrees-decimal with five or more digits after the decimal (example – 42.53764°).

Revised 7/1/2021

P	art 3 of 5 – Fee Worksheet	RECEIVED						
	FEE WORKSHEET for PERMANENT TRANSFER (except Substitution)							
1	Base Fee (includes one type of change to one water right for up to 1 cfs)	1 \$1,360 2022						
	Types of change proposed:	CO - PLANNING						
	✓ Place of Use	- WINING						
	Number of above boxes checked = 2 (2a)							
	Subtract 1 from the number in line 2a = (2b) If only one change, this will be 0	#1000						
2	Multiply line 2b by \$1090 and enter » » » » » » » » » » » » » » » » » » »	2 \$1,090						
	Number of water rights included in transfer 3 (3a)							
	Subtract 1 from the number in 3a above: 2 (3b) If only one water right this will be 0	#1000						
3	Multiply line 3b by \$610 and enter » » » » » » » » » » » » » » » » » » »	3 # 1,220						
	Do you propose to add or change a well, or change from a surface water POD to a well?							
	No: enter 0 Yes: enter \$480 for the 1st well to be added or changed(4a)							
	Do you propose to add or change additional wells?							
	No: enter 0 Yes: multiply the number of additional wells by \$410(4b)							
4	Add line 4a to line 4b and enter » » » » » » » » » » » » » » »	4 0						
-	Do you propose to change the place of use or character of use?							
	No: enter 0 on line 5							
	X Yes: enter the cfs for the portions of the rights to be transferred (see below*): 0.875(5a)							
	Subtract 1.0 from the number in 5a above: <0 (5b)	- 18						
	If 5b is 0 or less, enter 0 on line 5 » » » » » » » » » » » » » » »							
	If 5b is greater than 0, round up to the nearest whole number:(5c) and multiply							
5	5c by \$410, then enter on line 5 » » » » » » » » » » » » » » » » » »	5 0						
6	Add entries on lines 1 through 5 above » » » » » » » » Subtotal:	6 \$3,670						
	Is this transfer:	FIVED						
	Is this transfer: necessary to complete a project funded by the Oregon Watershed Enhancement Board (OWER) under ORS 541.932?							
	(OWEB) under ORS 541.932?	27 2022						
	(OWEB) under ORS 541.932? endorsed in writing by ODFW as a change that will result in a net benefit to fish and wildlife habitat?							
	Whathe habitat:	WRD						
-	in one of more defined to one one of the original of the origi	7 0						
7		8 # 3,670						
8	Subtract line 7 from line 6 » » » » » » » » » » » » » » » Transfer Fee:	8 1 0,610						

*Example for Line 5a calculation to transfer 45.0 acres of Primary Certificate 12345 (total 1.25 cfs for 100 acres) and 45.0 acres of Supplemental Certificate 87654 (1/80 cfs per acre) on the same land:

- 1. For irrigation calculate cfs for each water right involved as follows:
 - a. Divide total authorized cfs by total acres in the water right (for C12345, 1.25 cfs ÷100 ac); then multiply by the number of acres to be transferred to get the transfer cfs (x 45 ac= 0.56 cfs).
 - b. If the water right certificate does not list total cfs, but identifies the allowable use as 1/40 or 1/80 of a cfs per acre; multiply number of acres proposed for change by either 0.025 (1/40) or 0.0125 (1/80). (For C87654, 45.0 ac x 0.0125 cfs/ac = 0.56 cfs
- 2. Add cfs for the portions of water rights on all the land included in the transfer; however do not count cfs for supplemental rights on acreage for which you have already calculated the cfs fee for the primary right on the same land. The fee should be assessed only once for each "on the ground" acre included in the transfer. (In this example, blank 5a would be only 0.56 cfs, since both rights serve the same 45.0 acres. Blank 5b would be 0 and Line 5 would then also become 0).

	FEE WORKSHEET for SUBSTITUTION		
1	Base Fee (includes change to one well)	1	\$990.00
	Number of wells included in substitution(2a)		
	Subtract 1 from the number in 2a above:(2b) If only one well this will be 0		
2	Multiply line 2b by \$480 and enter » » » » » » » » » » » » » »	2	N/A
3	Add entries on lines 1 through 2 above » » » » Fee for Substitution:	3	N/A

I affirm the applicant is an entity with the authority to condemn property and is acquiring by condemnation the	
municipality or a predecessor; OR	_
I affirm the applicant is a municipality as defined in ORS 540.510(3)(b) and that the right is in the name of the	
authorized to pursue the transfer as identified in OAR 690-380-4010(5); OR	_
Department approval of the transfer, I will be required to provide landownership information and evidence that I am	
By signing this application, I understand that, upon receipt of the draft preliminary determination and prior to	A

property to which the water right proposed for transfer is appurtenant and have supporting documentation.

14021 TACS

By my signature below, I confirm that I understand:

- Amendments to the application may only be made in response to the Department's Draft Preliminary
 Determination (DPD). The applicant will have a period of at least 30 days to amend the application to address any
 issues identified by the Department in the DPD, or to withdraw the application. Note that amendments may be
 subject to additional fees, pursuant to ORS 536.050.
- Failure to complete an approved change in place of use and/or change in character of use, will result in loss of the water right (OAR 690-380-6010).
- Refunds may only be granted upon request and, as set forth in ORS 536.050(4)(a), if the Director determines that a
 refund of all or part of a fee is appropriate in the interests of fairness to the public or necessary to correct an error
 of the Department.

of the Department. I (we) affirm that the information contained in this application is true and accurate. Applicant signature Print Name (and Title if applicable) Date Applicant signature Is the applicant the sole owner of the land on which the water right, or portion thereof, proposed for transfer is located? Yes No If NO, include signatures of all deeded landowners (and mailing and/or e-mail addresses if different than the applicant's) or attach affidavits of consent (and mailing and/or e-mail addresses) from all landowners or individuals/entities to which the water right(s) were conveyed. Check the following boxes that apply: The applicant is responsible for completion of change(s). Notices and correspondence should continue to be sent to the applicant. The receiving landowner will be responsible for completing the proposed change(s) after the final order is issued. Copies of notices and correspondence should be sent to this landowner. Both the receiving landowner and applicant will be responsible for completion of change(s). Copies of notices and correspondence should be sent to this landowner and the applicant. At this time, are the lands in this transfer application in the process of being sold? Yes X No If YES, and you know who the new landowner will be, please complete the receiving landowner information table below. If you do not know who the new landowner will be, then a request for assignment will have to be filed for at a later date. If a property sells, the certificated water right(s) located on the land belong to the new owner, unless a sale agreement or other document states otherwise. Are there other water right certificates, water use permits or ground water
with the "from" or the "to" lands? Ves No

	Are there other water right certificates, water use permits or ground water registrations a with the "from" or the "to" lands? ▼ Yes □ No	
	If YES, list the certificate, water use permit, or ground water registration numbers:	5 37666 9 29011
\Rightarrow	Pursuant to ORS 540.510, any "layered" water use such as an irrigation right that is supply a primary right proposed for transfer must be included in the transfer or be cancelled. At to a ground water registration must be filed separately in a ground water registration mo	lemental to ny change
1	For Substitution (ground water supplemental irrigation will be substituted for surface wate	er primary irrigation)
	Ground water supplemental Permit or Certificate # <u>N/A</u> ; Surface water primary Certificate # <u>N/A</u> .	RECEIVED
	For a change from Supplemental Irrigation Use to Primary Irrigation Use	MAY 27 2022
	Identify the primary certificate to be cancelled. Certificate #	OWRD
	For a change in point(s) of appropriation (well(s)) or additional point(s) of appropriation:	
I A	Well log(s) are attached for each authorized and proposed well(s) that are clearly la with the corresponding well(s) in Table 1 above and on the accompanying application. Tip: You may search for well logs on the Department's web page at: http://apps.wrd.state.or.us/apps/gw/well log/Default.aspx	
	AND/OR	

complete Table 3. Table 3. Construction of Point(s) of Appropriation

Any well(s) in this listing must be clearly tied to corresponding well(s) described in Table 1 and shown on the accompanying application map. Failure to provide the information will delay the processing of your transfer application until it is received. The information is necessary for the department to assess whether the proposed well(s) will access the same source aguifer as the authorized point(s) of appropriation (POA). The Department is prohibited by law from approving POA changes that do not access the same source aquifer.

Describe the construction of the authorized and proposed well(s) in Table 3 for any wells that do not have a well log. For proposed wells not yet constructed or built, provide "a best estimate" for each

requested information element in the table. The Department recommends you consult a licensed well driller, geologist, or certified water right examiner to assist with assembling the information necessary to

Watermaster Alternate Reservoir Application Review Sheet

In lieu of the water right application process set forth in ORS 537.140 to 537.211, an owner of a reservoir may submit an alternate reservoir application for a reservoir that has a storage capacity less than 9.2 acrefeet or a dam or impoundment structure less than 10 feet in height. ORS 537.409 describes the criteria used to evaluate alternate reservoir applications.

The review shall be limited to issues pertaining to: a) water availability, b) potential detrimental impact to existing fishery resources; and c) potential injury to existing water rights. (ORS 537.409 (6))

Within 60 days after the Water Resources Department provides public notice, any person may submit detailed, legally obtained information in writing, requesting the Department to deny the application for a permit on the basis that the reservoir: (a) Would result in injury to an existing water right; or (b) Would pose a significant detrimental impact to existing fishery resources. (ORS 537.409 (5))

Applicant's Name Colin Moris Agent: John Warinner								
 Does the proposed reservoir have the potential to injure existing water rights? ■ YES □ NO Explain: Instream water rights C-72697 and C-59795 are not always met. 								
2. Can conditions be applied to mitigate the potential injury to existing water rights? YES NO Explain: Use may be made at times when sufficient water is available to satisfy all prior rights, including prior rights for maintaining instream flows. Installation of measuring device. Installation of outlet pipe. Rogue Scenic Waterway condition.								
3. Is water available for the proposed reservoir? ■ YES □ NO								
4. If yes, during what period? Beginning: January End: March Attach a WARS printout at 50% exceedance. If WARS does not cover the proposed location, make a recommendation for a storage season based upon regulation history and your knowledge of the location. (Water Availability for Reservoir Policy found under OAR 690-410-0070(2)(c))								
5. Did you meet with staff from another agency to discuss this application? ☐ YES ■ NO

MENU OF CONDITIONS FOR WRD, ODFW, DEQ AND ODA

Revised June 24, 2011

Use this menu to identify appropriate conditions to be included in the permit, and indicate the abbreviations on the review form:

fishpass: As required by ORS 509.585, a person owning or operating an artificial obstruction (AO) may not construct or maintain any AO across any waters of this state that are inhabited, or historically inhabited, by native migratory fish (NMF) without providing passage for NMF. A person owning or operating an AO shall, prior to construction, fundamental change in permit status or abandonment of the AO in any waters of this state, obtain a determination from ODFW as to whether NMF are or historically have been present in the waters. If ODFW determines that NMF are or historically have been present in the waters, the person owning or operating the AO shall either submit a proposal for fish passage to ODFW or apply for a waiver or exemption. Approval of the proposed fish-passage facility, waiver, or exemption must be obtained from the department prior to construction, permit modification or abandonment of the AO. Approved fish-passage plans, waivers, and exemptions shall maintain adequate passage of NMF at all times (ORS 509.601) as per the approved plan, waiver or exemption.

fishself: The permittee shall install, maintain, and operate fish screening and by-pass devices consistent with current Oregon Department of Fish and Wildlife (ODFW) standards. Fish screening is to prevent fish from entering the proposed diversion while by-pass devices provide adequate upstream and downstream passage for fish. The required screen and by-pass devices are to be in place and functional prior to diversion of any water. Permittee shall obtain written approval from ODFW that the installation of the required screen and by-pass devices meets the state's criteria or the permittee shall submit documentation that ODFW has determined screens and/or by-pass devices are not necessary.

fishapprove: The permittee shall install, maintain, and operate fish screening and by-pass devices consistent with current Oregon Department of Fish and Wildlife (ODFW) standards. Fish screening is to prevent fish from entering the proposed diversion while by-pass devices provide adequate upstream and downstream passage for fish. The required screen and by-pass devices are to be in place and functional, and approved in writing by ODFW prior to diversion of any water. The permittee may submit evidence in writing that ODFW has determined screens and/or by-pass devices are not necessary.

fishdiv33: If the riparian area is disturbed in the process of developing a point of diversion, the permittee shall be responsible for restoration and enhancement of such riparian area in accordance with ODFW's Fish and Wildlife Habitat Mitigation Policy OAR 635-415. For purposes of mitigation, the ODFW Fish and Wildlife Habitat Mitigation Goals and Standards, OAR 635-415, shall be followed.

The use may be restricted if the quality of the source stream or downstream waters decrease to the point that those waters no longer meet existing state or federal water quality standards due to reduced flows.

The permittee shall install, maintain, and operate fish screening and by-pass devices consistent with current Oregon Department of Fish and Wildlife (ODFW) standards. Fish screening is to prevent fish from entering the proposed diversion while by-pass devices provide adequate upstream and downstream passage for fish. The required screen and by-pass devices are to be in place and functional, and approved in writing by ODFW prior to diversion of any water. The permittee may submit evidence in writing that ODFW has determined screens and/or by-pass devices are not necessary.

fishmay: The permittee may be required in the future to install, maintain, and operate fish screening and by-pass devices to prevent fish from entering the proposed diversion and to provide adequate upstream and downstream passage for fish.

b52 Water may be diverted only when Department of Environmental Quality sediment standards are being met.

b5 The water user shall install and maintain adequate treatment facilities meeting current DEQ requirements to remove sediment before returning the water to the stream.

b51a The period of use has been limited to through

b57 Before water use may begin under this permit, a totalizing flow meter must be installed at each diversion point.

b58 Before water use may begin under this permit, a staff gage that measures the entire range and stage between full reservoir level and dead-pool storage must be installed in the reservoir. The staff gage shall be United States Geological Survey style porcelain enamel iron staff gage style A, C, E or I.

futile call: The use of water allowed herein may be made only at times when waters from the (NAME OF SURFACE WATER) would not otherwise flow into a tributary of the
River or sufficient water is available to satisfy all prior rights, including rights for maintaining instream flows.

riparian: If the riparian area is disturbed in the process of developing a point of diversion, the permittee shall be responsible for restoration and enhancement of such riparian area in accordance with ODFW's Fish and Wildlife Habitat Mitigation Policy OAR 635-415. For purposes of mitigation, the ODFW Fish and Wildlife Habitat Mitigation Goals and Standards, OAR 635-415, shall be followed.

wq: The use may be restricted if the quality of the source stream or downstream waters decrease to the point that those waters no longer meet existing state or federal water quality standards due to reduced flows.

fence: The stream and its adjacent riparian area shall be fenced to exclude livestock.

blv: Water must be diverted to a trough or tank through an enclosed water delivery system. The delivery system must be equipped with an automatic shutoff or limiting flow control mechanism or include a means for returning water to the stream source through an enclosed delivery system. The use of water shall not exceed 0.10 cubic feet per second per 1000 head of livestock.

Re: OWRD Land Use Information Form for Colin Morris & John Warinner of Watersolving LLC Map No: 34-06-02-00, TL 1900 – 327 Leland RD

To Whom It May Concern,

Agriculture, Farming, and farm use are permitted uses outright in the Exclusive Farm (EF) zone per Section 19.64.020.A, *JCC*.

A Development Permit is required for all development in a flood hazard area per Section 19.69.A080, *JCC*. This includes grading, excavation, new/replacement irrigation equipment, etc. Should any development be proposed in the special flood hazard area, a development permit will be required prior to commencement of such development. Applicant must obtain any necessary permits from the Department of State Lands for work within identified Wetland areas prior to making application for a development permit. The development permit will be subject to review by the Oregon Department of Fish and Wildlife for compliance with their regulations and Riparian corridor setbacks.

Sincerely,

Veronica Brown Associate Planner 541-474-5109 ext 2423
